SIX-MONTHLY INDEXES TO COMPUTER & CONTROL ABSTRACTS

Twice a year as part of their subscription to Computer & Control Abstracts subscribers receive cumulative indexes for the periods January-June and July-December. Each index is in two parts—a Subject Index, and an Author Index which comprises personal and corporate author indexes, and indexes to conferences, book titles, and bibliographies. The List of Journals and other Serial Sources abstracted by INSPEC in the particular year is also included with the July-December issue of the Author Index while the supplement to that List is included with the January-June issue. Cumulative indexes for earlier years are also available: for details please see the inside back cover.

Subject index

The Subject index provides an alphabetical subject key to the articles included in the abstracts journal. Some general guidance on its use is given below:

1. Look in the index for the name of the specific subject in which you are interested. In most cases this name will be a heading in the index and you will find relevant articles listed under it. The majority of the subject headings fall into the following categories: property, phenomena, substance or named objects, instrument, device, theory, method, process, application, event.
2. Occasionally you will be directed from the subject heading chosen to a different heading under which the relevant or additional articles are listed.
3. If you do not find the subject heading you first chose, try a more general heading.
4. Each entry under the heading relates to an article appearing in the abstracts journal and gives the serial number of that article in the journal preceded by the last digit of the current year, e.g. 4-12345; i.e. Abstract number 12345 in the abstracts journal for 1984.

The language of the article, if it is not in English, is also indicated. e.g. Logic programming language PROLOG and its application to AI (Japanese) 4-17880.

Each entry starts with a Keyword or Keyphrase considered to be most relevant to the heading. On sorting these Keywords, the qualifying prefixes are usually ignored. (e.g. α-brass, 5-sulphosalicylic, 31 Cygni, n-Ge are sorted under brass, sulphosalicylic, Cygni, Ge respectively).

There are three main Keyword lists: alphabetical A-Z, elementary particles, and chemical symbols (organic substances are written and not given as chemical formula). More than one Keyword list may be present under each subject heading.

For document on, say, 'photoemission of germanium' at least two access points 'photoemission' and 'germanium' are provided. Under the heading 'photoemission' the Keyword will be 'Ge' and under 'germanium' the Keyword will be 'photoemission'.

In a case like this, it is advisable and quicker to use the heading 'photoemission' and go straight to the chemical symbol list for 'Ge'.

Intermetallic compounds are indexed under the appropriate alloy headings. The chemical formula is used as Keyword. However, it is important to realise in searching the chemical symbol list that, at present, alloys and intermetallic compounds are sorted separately. For example FeCo is sorted at the end of the Fe- list e.g. Fe-Al,... Fe-Co,... Fe-Si,... Fe-Si-B,... FeCo,... FeSi and so on in this order.

COMPUTER & CONTROL ABSTRACTS is published twice monthly by the Institution of Electrical Engineers in association with the Institute of Electrical and Electronics Engineers Inc. 2nd Class postage paid at Piscataway, N.J. 08854, USA. POSTMASTER: Send address changes to INSPEC/IEEE SERVICE CENTER, 445 Hoes Lane, Piscataway, N.J. 08854.

Abbreviations and Acronyms

Abbreviations and acronyms are used in the modifiers in all INSPEC Cumulative Subject Indexes. Individual terms should be readily understood in the context of the subject heading.

ABS resin	acrylonitrile-butadiene-styrene
AC	alternating current
ACV	air cushion vehicle
A/D	analogue-to-digital
ADC	analogue digital conversion
ADP	administrative data processing
AF	audio frequency
AFC	automatic frequency control
AFL	abstract family of languages
AGC	automatic gain control
ALU	arithmetic logic unit
AM	amplitude modulation
ARMA	autoregressive moving average
ASCII	American standard code for information interchange
ASK	amplitude shift keying
ATC	air traffic control
ATE	automatic test equipment
ATM	automatic teller machine
AVC	automatic volume control
BCD	binary-code decimal
BER	bit error rate
BWR	boiling water reactor
CAD	computer aided design
CAE	computer aided engineering
CAI	computer assisted instruction
CAM	computer aided manufacturing
CATV	community antenna TV
CB	citizen band
CBI	computer based instruction
CCD	charge-coupled device
CDM	code division multiplexing
CERN	Conseil Europeen pour la Recherche Nucleaire
CFSK	coherent frequency shift keying
CMI	computer managed instruction
CNC	computer numerical control
COM	computer output to microform (fiche or film)
CPA	critical path analysis
CPM	critical path method
CPU	central processing unit
CRO	cathode ray oscilloscope
CRT	cathode ray tube
CW	continuous wave
D/A	digital-to-analogue
DAC	digital analogue conversion
DBMS	database management system
DC	direct current
DDC	direct digital control
DDL	diode-diode logic
DFT	direct Fourier transform
DIP	dual in-line package
DM	delta modulation
DMA	direct memory access
DMM	digital multimeter
DOS	disc operating system
DP	data processing
DSS	decision support system
DVM	digital voltmeter
EAROM	electrically alterable ROM
EAX	electronic automatic exchange

ECG	electrocardiography (-gram)
EDP	electronic data processing
EEG	electroencephalography (-gram)
EEPROM E^2PROM	electrically erasable PROM
EFT	electronic funds transfer
EHV	extra high voltage
ELF	extremely low frequency
EM	electromagnetic
EMC	electromagnetic compatibility
EMF	electromotive force
EMG	electromyography (-gram)
EOF	end of file
EPROM	erasable prom
ESS	electronic switching system
FAMOS	floating gate avalanche MOS
FDM	frequency division multiplex(ing)
FDMA	frequency division multiple access
FET	field effect transistor
FFT	fast Fourier transform
FM	frequency modulation
FPLA	field programmable logic array
FSK	frequency-shift keying
GAMBIT	gate modulated bipolar transistor
GTO	gate turn-off
HF	high frequency
HV	high voltage
IC	integrated circuit
IF	intermediate frequency
I^2L	integrated injection logic
I^3L	isoplanar I^2L
ILS	instrument landing system
IMPATT	impact avalanche transit time
INTELSAT	international telecommunications satellite consortium
I/O	input/output
IPSS	international packet switching service
IR	infrared
IRS	information retrieval system
ISDN	integrated services digital network
LAN	local area network
LC	inductance-capacitance
LCD	liquid crystal display/device
LED	light emitting diode
LF	low frequency
LV	low voltage
MESFET	metal-semiconductor field effect transistor
MF	medium frequency
MHD	magnetohydrodynamics
MIMD	multiple input multiple data
MIS	metal-insulator-semiconductor or management information system
MIT	Massachusetts Institute of Technology
MNOS	metal-nitrode-oxide-semiconductor
MOS	metal-oxide-semiconductor
MOSFET	metal-oxide-semiconductor field effect transistor
MOST	metal-oxide-semiconductor transistor
MS	management science

MSI	medium scale integration
MTBF	mean-time between failures
NAND	not-and(logic)
NC	numerical control
NDT	nondestructive testing
NHS	National Health Service
NOR	not-or(logic)
OCR	optical character recognition
OEM	original equipment manufacture
OR	operations research
OS	operating system
PABX	private automatic branch exchange
PBT	permeable base transistor
PBX	private branch exchange
PC	printed circuit
PCB	printed circuit board
PCM	pulse code modulation
PF	power factor
PFM	pulse frequency modulation
PID(PI,PD)	proportional+integral+differential (derivative)
PLA	phase locked array or programmable logic array
PLC	programmable logic control
PLL	phase locked loop
PM	pulse modulation
POS	point of sale
PROM	programmable read-only-memory
PSK	phase shift keying
PTFE	polytetrafluoroethylene
PTM	pulse time modulation
PVC	polyvinyl chloride
RAM	random access memory
RC	resistance-capacitance
R & D	research and development
RF	radio frequency
RFI	radio frequency interference
RLC	resistance-inductance-capacitance
RMS	root-mean-square
ROM	read-only memory
RPM	revolutions/minute

SCR	silicon controlled rectifier
SDM	space division multiplexing
SIMD	single input multiple data
S/N	signal-to-noise
SOS	silicon on sapphire
SPC	stored program control
SSB	single sideband
SST	supersonic transport
STD	subscriber trunk dialling
STOL	short take-off and landing
SW	short wave
SWR	standing wave ratio
TASI	time assignment speech interpolation
TDM	time division multiplex(ing)
TDMA	time division multiple access
TTL	transistor transistor logic
TV	television
UART	universal asynchronous receiver transmitter
UHF	ultra high frequency
UHV	ultra high voltage
UKAEA	United Kingdom Atomic Energy Authority
ULA	uncommitted logic array
ULF	ultra low frequency
US	ultrasonic
UV	ultraviolet
VCR	video cassette recorder
VDU	visual display unit
VHF	very high frequency
VHSIC	very high speed integrated circuit
VLF	very low frequency
VLSI	very large scale integration
VS	virtual storage
VTOL	vertical take-off and landing
VTR	voltage transformation ratio or video tape recorder
WDM	wavelength division multiplexing
WP	word processing

Subject Index

1/f noise *see random noise*
A/D conversion *see analogue-digital conversion*
abacs *see nomograms*
aberrations
  aberrations in optics and particle optics only
  see also lenses; optical instrument testing; particle optics
  active mirror segment figure control 4—436
  aerial reconnaissance lens computerised evaluation by automated lens testing system 4—23204
  holographic memory with two-wavelength reading-recording, aberrations compensation *(Russian)* 4—5258
  multichromatic visual-display terminals, visual accommodation and convergence 4—5578
  optical design program for microcomputers 4—18806
  optical disc storage, objective lens design *(Russian)* 4—12706
  submicron focused ion beam system optics, computer simulations 4—18815
aberrations (visual) *see vision defects*
absolute pressure measurement *see pressure measurement*
absorbers (surge) *see surge protection*
absorption wavemeters *see wavemeters*
abstracting
  knowledge-based report generation: a technique for automatically generating natural language reports from databases 4—3043
  patents *(Russian)* 4—13991
  patents and dissertations, abstracting, aspect technique anal. *(Czech)* 4—13998
  selection of patents for the Chemical Abstracts Service data base 4—23111
a.c. machines
  see also a.c. motors; asynchronous machines; synchronous machines
  switched voltage source-fed, stator current vector predictive controller 4—7834
a.c. motors
  see also capacitor motors; induction motors; synchronous motors
  AC servo motor drive for precise positioning control 4—4373
  actuating motor selection for automatic control systems *(Russian)* 4—20516
  CNC machine tool trend towards AC servomotors 4—7939
  economical motor protection using microcomputer technology 4—14372
  electronically controlled propulsion. Present state and development *(German)* 4—20433
  invertor-fed AC motor speed control and invertor waveform harmonic analysis by microprocessor 4—7827
  microdrive, third generation AC motor speed controller 4—20515
  new motor control and driving device for high speed elevators, Mitsubishi Electric 4—1142
  rotating field motors, microprocessor controlled test rig *(German)* 4—4460
  servomotor, flat type, design and robot servo system appl. *(Japanese)* 4—4590
  speed control equipment, design for synthetic fibre manufacturing appl. *(Spanish)* 4—4476
a.c. network analysers *see network analysers*
acceleration control
  see also acceleration measurement
  pneumatic cylinder deceleration system 4—702
  step motor microcomputer control, automatic seeking of optimal law of accel. and deceleration *(Chinese)* 4—4452
acceleration measurement
  see also acceleration control
  aircraft tracking, position, velocity and acceleration meas. from noisy radar meas. 4—20971
accelerators (particle) *see particle accelerators*
accelerometers
  see also acceleration measurement
  computer-controlled test facility for high-performance/price ratio instruments 4—8145
  dry-tuned accelerometer/gyro instrument, design method 4—20506
  vibration sensors, piezoelectric accelerometers, design, appls. *(German)* 4—11560
accidents
  see also electric shocks; explosions; safety
  1300 MW nuclear power station control room organisation for post accident operation *(French)* 4—20589
  advanced simulator for real time simulation of two-phase flow transients 4—19240
  computer centre disaster planning 4—19729
  contingency planning, case study 4—7056
  event tree/fault tree risk assessment of a potentially hazardous pilot plant 4—1096
  impact of the accident at Three Mile Island on plant control and instrumentation philosophy 4—852
  LMFBR shutdown heat removal for transients up to HCDA, SASSYS code 4—20588
  mainframe computer disaster recovery 4—15017
  USA roadworks site traffic control technologies and refinements 4—11992
accounts data processing
  access and communication controls in an accounting information system 4—13784
  accountants' payroll and bookkeeping microcomputer services 4—22860
  accounting software OS design criteria 4—18342
  algorithm for operation accounts *(German)* 4—13739
  allowance accounting system, computer aided, of Hessian Electricity Corporation *(German)* 4—18319
accounts data processing continued
  applications software survey 4—22871
  audit microcomputer downloading 4—13765
  audit planning and control for local authorities 4—2801
  auditing, automated techniques *(Dutch)* 4—2811
  auditing, impact of computers 4—2772
  auditing and analysis technique *(Italian)* 4—13780
  auditing online systems, parallel vs. continuous and intermittent simulation evaluation 4—22867
  AUDITMAN software package review 4—13763
  automated accounting subsystem based on matrix modelling *(Russian)* 4—9537
  automatic processing of accounts, provisions *(French)* 4—9550
  automation of production expenditure control and calc. of production in industrial works *(Russian)* 4—18332
  automation procedure for accounting firms *(French)* 4—9547
  Axis, integrated accounting package for micros 4—2777
  book-keeping, microcomputer-based financial management packages 4—2770
  BusCom accounts package from Studio Software 4—9528
  Business Management System, multi-user package 4—5988
  chartered accountants, student education in DP 4—3688
  choosing a system 4—13753
  Commodore 64 WP and accounting packages 4—23782
  computer managed tool works, management decision making *(Russian)* 4—9538
  computer use *(French)* 4—9548
  computer-aided accounting for wholesale trading *(Russian)* 4—22962
  computerised accounting systems, auditing, statistical sampling concepts 4—6092
  computerised colour graphics sales program 4—6084
  computing within the accounting curriculum: a methodology for integration 4—10663
  corporate accounts, true and fair picture *(French)* 4—9551
  cost accounting system design 4—18298
  cost and manufacturing accounting, integrated systems 4—22881
  county council accounting system *(Hungarian)* 4—18390
  Cyma automated accounting packages 4—9533
  Easy and Pulsar, accounting packages for IBM pc 4—18324
  EasyTABS accounts package review 4—22883
  electricity bills, portable billing machines for meter readers 4—22866
  Express Dairies, computerized accounting system 4—9516
  Express Dairies computerised general ledger and payables systems 4—22958
  Famis accounting package, used by GTSI for NASA 4—13741
  Financial Director, accounts software package review 4—13764
  financial report presentation 4—13751
  fixed price contracts and subcontracts with progress payments, financial management and DP considerations 4—6076
  French accounts plan, financial analysis *(French)* 4—9552
  general ledger automation 4—13740
  general ledger system at Maritime Life Assurance 4—13744
  glass industry in Czechoslovakia, implementation and experiences *(Czech)* 4—18452
  Greenacres Sales, upholstery supplier, accounts and stock control packages 4—6140
  Groundstar Sales Order and Accounting System review 4—9531
  HAI*Line accounting package for ICL Personal Computer 4—6098
  Hayden's big-5 modular accounting packages 4—6090
  health authority accounts DP, use of personal computers 4—2844
  home money management by computer 4—18313
  hotel communications and computerization 4—18504
  IBM 5550 Multistation desktop computer, business applications workstation 4—1850
  IBM personal computer, accounting software package 4—6099
  IBM Personal Computer, integrated software for accounting 4—2804
  Imag, interactive management accounting generator 4—13743
  in-house computer system, appl. in accounting firm 4—13748
  income tax program in Applesoft Basic *(German)* 4—22865
  InfoStar accounting package at Bob's Flying Service 4—9499
  integrated accounting and payroll package for construction industry 4—22888
  integrated accounting packages, review 4—9532
  integrated accounting program for micros, Sage 4—9509
  integrated financial management software 4—6083
  Jarman business accounting software, review 4—22855
  Jones and Partners, microcomputer software appls. 4—9514
  La Spirotechnique, diving equipment supplier, microcomputer appls. 4—9512
  library online general ledger system design and implementation 4—22898
  local government accounts DP, use of personal computers 4—2835
  Lotus 1-2-3 management planning system software package, review 4—9543
  Martin Marietta Data Systems IT range of software 4—19766
  medical accounting packages, selection 4—13795
  methodological problems of automated management systems *(Russian)* 4—9661
  microcomputer appls. in British Petroleum 4—9508
  microcomputer selection for accounting appls. 4—9513
  microcomputer software, users support 4—6001
  microcomputers for chartered accountants 4—22863
  Milk Marketing Board's use of 1-2-3 super-spreadsheet 4—22882
  MIS development in Czechoslovakia, economic subsystem, using SMEP computers *(Slovak)* 4—6093
  MTS accounting using Commodore 8096 and TABS accounting packages 4—22889
  newsagents, microcomputers for customer accounts 4—22955

accounts data processing continued
newsagents, microcomputers for customer accounts 4−22956
nursery management, microcomputer applications 4−2930
Octopus microcomputer, evaluation and accounting appls. 4−8595
office automation prospects *(French)* 4−9549
Olivetti M20 personal computer 4−17153
Omicron accounting software packages for use with separate cost centres 4−2756
Oracle Systems, turnkey accounts packages for micros 4−9511
overhead costs, calc. by computer 4−18286
packages for IBM PC, market size and lack of imagination 4−2795
Pegasus, integrated accounts program 4−18305
planned supply calcs. for machine engineering works using databases *(Russian)* 4−9662
PlusPlan financial modelling package for IBM PC 4−13768
postal cheque management program listing, in M-SPEAK *(German)* 4−13760
profit center from organisation of DP department, segment reporting 4−2816
program for tax deductions and allowances calc. *(German)* 4−18314
programs for accounting, ten programs review 4−9521
retroactive data handling for accounting-type database appls. 4−22896
robotron A5120/A5130 for consumer goods companies accounts data acquisition 4−2776
Sage 400 package 4−18335
selection and implementation of accounting systems 4−9520
small micro accounting packages 4−9510
software packages, review 4−9524
solicitor, microcomputer appls., Solpack system 4−6164
solicitors, accounts and word processing systems 4−6033
solicitors, computer applications 4−6163
solicitors computerised accounting systems, STARSOL and SOLPACK 4−9542
specialised software for business 4−14993
STORR and Integrated Accounts System LB13 software packages 4−18326
survey of accountant systems 4−6094
system selection criteria 4−13762
systems dynamics, theory *(Polish)* 4−2812
tax preparation and planning, software packages 4−13775
textile supplier, Sirius 1 microcomputer appl. to manufacturing DP and accounting 4−22924
VARS MIS, economic information subsystem 4−9540
vehicle fleet fuel and oil consumption, acquisition, accounting using robotron A5120/A5130 4−2775
water authority accounts DP, use of personal computers 4−2802

accumulators *see secondary cells*

acidity *see pH*

acoustic detectors *see acoustic transducers*

acoustic devices
see also acoustic generators; acoustic transducers; surface acoustic wave devices; ultrasonic devices
No entries

acoustic echoes *see echo*

acoustic equipment
see also acoustic wave interferometers; ultrasonic equipment
No entries

acoustic field
vibroacoustic field reproduction via solution of constrained inverse linear problem 4−11472

acoustic generators
see also loudspeakers
AY-3-8970 sound generator for Sinclair ZX81 *(German)* 4−13205
Compumuse music synthesizer using computer with Centronics port and SN76489AN IC 4−3565
Dragon's sound generator 4−2267
minicomputer based system for acoustic stimuli synthesis and analysis 4−9893
Spectrum effects unit 4−2269
ZX sound boards 4−2268

acoustic imaging
medical and industrial appl., technical and economic problems 4−10038
US projector, radiated pressure, computer control 4−20416

acoustic insulating materials *see noise abatement*

acoustic intensity measurement
No entries

acoustic measurements *see acoustic variables measurement*

acoustic noise
helicopter rotor, circulation control, acoustics 4−16468
office acoustics related to its layout 4−14794
road vehicles, pass-by external noise, computer program for prediction 4−19158

acoustic noise measurement
microcomputer based analysis system, appl. to diesel fuel injection pump testing 4−6593
printer noise meas. 4−2210

acoustic signal processing
bit-slice structure for US signal processing 4−16985
digital recording and signal processing systems for hydrophone arrays 4−21665
frequency identification by complex spectrum *(Japanese)* 4−11146
machine analysis appl. 4−14284
NDT of multilayered structure, US signal processing methods 4−16993
neural counting model of auditory system applied to response of individual neural fibres 4−15727
real-time signal processing in US imaging system 4−16992
shear wave transducer array for real-time digital synthetic aperture imaging system 4−18836
spatial processing of sound, general model, C music sound synthesis 4−6764
underwater acoustics, pattern recognition processing appl. 4−11142

acoustic surface wave devices *see surface acoustic wave devices*

acoustic transducers

free decay of acoustical standing waves meas., in resonant tube, computerised system 4−18832
JBL's central array design program 4−10127

acoustic wave interferometers
optical fibre, phase instabilities elimination 4−4208

acoustic wave velocity measurement
see also ultrasonic velocity measurement
No entries

acoustical laboratories
No entries

acousto-optical devices
acoustic beam position control, piezoelectric transducers phased array appl. 4−4307
filter for astronomical spectrophotometer under microcomputer programmable control 4−16595
systolic acousto-optic binary convolver 4−21681

acoustoelectric devices
see also acoustoelectric transducers
No entries

acoustoelectric transducers
see also hydrophones; loudspeakers
No entries

actinometers *see radiometers*

actinometry *see radiometry*

active circuits *see active networks*

active filters
800 kVA current injection type active filter for AC line harmonic suppression 4−944
adaptive equaliser for digital data transmission *(German)* 4−12847
bootstrap and Sallen and Key cct. calcs. using programmable calculators 4−19000
CAD method 4−23384
circuit design, computer aided 4−23396
elliptic filter design using TI-59 calculator 4−19002
low-pass, calcs. using TI-59 calculator, program 4−19001
RC type, tolerance theory and CAD based on Monte Carlo simulation/optimisation *(Hungarian)* 4−19003
switched-capacitor filters, iterative optimisation, cct. parameter sensitivities calc. *(German)* 4−3308

active networks
see also active filters; gyrators; impedance convertors; negative impedance convertors
switched capacitor networks, SWITCAP analysis program for network simulation 4−23406
tolerance theory and CAD based on Monte Carlo simulation/optimisation *(Hungarian)* 4−19003

active transformers *see impedance convertors*

actuators
see also electric actuators
AC actuating motoring selection for automatic control systems *(Russian)* 4−20516
antibiotic plant, automatic flow controller 4−20891
back-up flight control systems, three approaches 4−12034
control valves in optimized systems, factors to consider 4−4381
dislocated actuator/sensor positioning and feedback design for flexible structures 4−8037
dual-path electromagnetic actuator for a high performance magnetic disk drive 4−12609
elastic aerospace structures, sensor/actuator location principles 4−8049
electrohydraulic drive, 2-channel loaded, interaction 4−11664
energy and maximum amplitude comparison for standard forms of set-point control transfer function *(German)* 4−11583
fluid power actuator infinite position locking 4−7695
HP 7933/35 disc drives servomechanism design, actuator spindle base assembly 4−17556
hydraulic actuation of conservative loads, controlled fluid recirculation 4−11584
integrated magnetic actuator and sensor for use in linear or rotary magnetic bearings 4−11600
large capacity disk drive with two rotary actuators 4−12611
low-cost automation of pneumatic machinery 4−11870
magnetic disc drive, high performance, actuator design rules for minimum access time 4−12608
magnetic recording head disc file actuator, technology and systems advantages 4−12610
manipulating mechanisms, reduced-scale modelling of motion *(Russian)* 4−15831
manipulator trajectories, dynamic scaling 4−12239
microprocessor-based induction motor controller for high torque position control 4−23577
NC machine tools status and development trends in CNC controls and servo actuators *(German)* 4−11913
optical storage, servo system for head position control 4−12710
optimal, synthesis for multi-input oscillatory system *(Japanese)* 4−15826
Parker Hannifin hydraulic actuators for industrial robots 4−7683
rail vehicle ride control, lateral active pneumatic suspensions 4−12002
robot manipulator, optimal control with actuator constraints 4−11932
sand mould compaction using air-oil cylinders, for metal casting 4−11844
shape memory alloy actuator for position control *(Japanese)* 4−16008
shock absorbers and power actuators 4−11593
trends in control and measurement systems and components 4−20432
vibratory movers, moving velocity and moving direction control *(Japanese)* 4−1342

Ada
Ada, development, possibilities for the commercial software developer 4−2438
ANSI Ada and the UK M-Chapse 4−9208
APSE environment for Ada programming 4−22292

Ada continued
  C^3I systems, software cost reduction 4—5829
  C machine support for other block-structured languages 4—5120
  CHILL and Ada, language comparison 4—22522
  code generation, automatic, for Ada resource controller tasks 4—22335
  comparison with PASCAL, large-scale, real-time systems appl. *(Czech)* 4—13429
  compiler and tool set for defence projects 4—9226
  compiler symbol processing mechanisms from specifications 4—2459
  compilers, ANSI standards for the military 4—9227
  conversion of Fortran to Ada using an intermediate tree representation 4—9157
  distributed system programming in Ada 4—5689

test analysis for high quality machine translation 4−6777
text understanding systems, memory based parsing techniques appl. 4−13983
thinking by man and computer *(German)* 4−15341
thinking machines, man's response 4−11036
THYAID expert system for thyroid disease diagnosis, judgmental knowledge 4−23257
trade weighing and measuring equipment, control of intelligence 4−21069
transport system, 2 rail studies reviewed, areas of further investigation highlighted *(Japanese)* 4−15691
tribological coating selection, intelligent knowledge-based systems appl. 4−14682
Turing Test, historical perspective 4−15337
UC, the UNIX consultant, knowledge structures 4−5927
uncertain knowledge handling *(Japanese)* 4−11047
USA fifth-generation computing efforts and social implications 4−3725
USAF command, control, communications and intelligence systems software 4−5849
vehicles, autonomous, control using AI techniques 4−20914
vision, image processing hardware, parallel image understanding algorithms 4−1706
visual process and knowledge, content, form and use 4−11109
weapons systems, applications 4−9633
Xerox 1100 personal lisp work stations for artificial intelligence 4−8626
C-13 nuclear magnetic resonance spectra, appl. of artificial intelligence 4−23179

artificial kidneys *see artificial organs*

artificial limbs
EMG controlled above-knee prosthesis development, using microcomputer 4−1337
fluidic foot-sole pressure sensory feedback device, design *(Japanese)* 4−21185
hand prosthesis system, multifunctional, using EMG controlled animation, evaluation 4−18849

artificial organs
see also prosthetics
blood pump development for artificial heart with polarized EM drive system 4−3186
heart, digital system for P-wave detection and synchronisation 4−8180
heart-lung bypass machines, power and weight characts. of thermoregulating devices 4−1324
kidney unit, portable type *(Japanese)* 4−1332
microcomputer-controlled devices for human implantation 4−8176
microprocessor-controlled driving unit for artificial hearts 4−1333

artificial satellites
active microwave instrumentation for Europe's first remote sensing satellite 4−21056
attitude control, appl. of radiation press. damping 4−4702
attitude control, three-axis *(Japanese)* 4−12026
attitude control using minimum horizontal rotations, [satellite attitude control] 4−12025
attitude dynamics and control in presence of environmental torques, survey 4−16453
attitude measurement, Earth-to-space laser beam detect. by TV camera 4−12017
attitude stability for the yaw-wheel class of orbiting gyrostats 4−16443
autonomous navigation at five times synchronous altitude 4−20966
autonomous navigation for high altitude satellites 4−16465
autonomy and fault tolerant design 4−4726
beam coverages, Satellite Coverage Assessment Program, antenna beamwidths *(Japanese)* 4−3381
Blue Cube, US satellite tracking station 4−6123
DSCS III A-1 ACS flight experience 4−4738
electronics and aerospace systems, conf., Washington, DC, USA (Sept. 1983) 4−10426
EURECA platform, orbit prediction and control 4−12019
geostationary satellite, optimum low thrust transfer to geosynchronous orbit 4−4700
geostationary satellites strategies and schemes for rendezvous on transfer orbit 4−4701
geosynchronous satellites, semiautonomous stationkeeping 4−20965
global positioning system, satellite selection 4−16454
lateral drift compensation for satellites in non-equatorial synchronous orbits through attitude control 4−16473
magnetic attitude control systems for satellites 4−8055
magnetically suspended flywheel for satellite 4−4740
magnetically suspended satellite flywheel, development 4−4741
meteorological Czechoslovak experiences with MDA reception equipment *(Czech)* 4−18889
meteorological data, automatic transmission of surface data, automatic transmission of surface data from remote stations via satellite 4−17434
Meteosat-2 images, rectification method for satellite attitude/position var. 4−10053
orbital control system status and trends *(Italian)* 4−12052
orbital parameter estimation using extended Kalman filter *(German)* 4−8044
recursive attitude determination from vector observations direction cosine matrix identification 4−20964
Shuttle-based tethered satellite retrieval with thruster augmented control 4−20963
solar power satellite, investigation of quasi-inertial attitude control 4−16472
Space Telescope, thermal control test demonstration on simulated main ring assembly 4−4710

artificial satellites continued
- spin satellite with flexible booms, attitude stability, criteria and anal. *(Chinese)* 4−16442
- synchronous satellites, autonomous compensation for orbital disturbances of known frequency 4−4722
- three-axes stabilized, yaw attitude error estimation by state observer *(Japanese)* 4−16471

CAD/CAM at Istel, contrib. to ESPRIT project 4—22928
component handling for measurement by robot *(Spanish)* 4—7933
computer supported quality assurance for purchased parts *(German)* 4—4400
computer-assisted manufacturing using robots 4—20764
diesel particulate filters, design modification 4—4413
Dutton-Forshaw Kent, motor trade company, computerization programme 4—7045
exhaust gas anal. test system 4—19123
Farington Bus Plant, flexible manufacturing systems implementation 4—23556
flexible asembly automation *(German)* 4—11910
flexible NC production line, automatic measurement *(German)* 4—4576
Ford engine plant, computerised quality control 4—4852
Ford Motor Company electronic mail system 4—13831
General Motors, computer graphics appls. 4—23614
industrial robots, pneumatic and microprocessor controlled, in Great Britain *(German)* 4—16338
industrial Robots for the {assembly of petrol engines *(German)* 4—16339
inspection of car bodies, automatic acquisition and evaluation of meas. data 4—1072
parts manufacturing industry, use of standard machines 4—16264
Porsche, warehouse automation system 4—20542
Porsche cars, automated warehouse 4—1016
portable thickness meter for car bodywork coatings 4—13837
product design graphics system at Ford of Europe 4—20794
programmable controllers in industrial automation 4—16253

automobile industry continued
QC in mass production, using automatic multicoordinate meas. machine 4—1067
retail trade, market for computer systems 4—6157
robot vision system 4—20768
robot welding line with tray-type conveyor *(German)* 4—4573
robotic NC painting system for motor car bodies 4—4604
robotics, ASEA IRB functional packages 4—4638
Sormel, three phase assembly and testing line for motor component manufacturer 4—11825
spare parts, computer-assisted manufacture *(French)* 4—4565
stock control software, off-the-shelf 4—9647
Toyota interactive body CAD system 4—10406
training for new technology, strategy of Ford Motor Company at Dagenham 4—3640
truck gearbox manufacture using FMS 4—1000
UNISURF, from styling to tool-shop 4—10403
use of personal computers 4—18433
van interior painting, robot system 4—20770
vehicle body shell production, production automation *(German)* 4—20767
Volvo's computerised line system for 24-hour production *(Swedish)* 4—4613
welded-frame random loading of flexible manufacturing system 4—7919

automobiles
5-speed microprocessor controlled economy transmission 4—20925
air mass flowmeter for test cell instrumentation 4—20418
automatic overdrive control 4—11989
Automobile Association, ICL equipment user 4—13674
car on-board computers 4—1131
climate control, microprocessor based system, characts. 4—20931
computer data network with portable terminals, in car operation *(German)* 4—21990
computer-aided analysis of front wheel drive transmission systems 4—19140
computer-aided design tool for automobile crashworthiness, system model overview 4—564
computer-aided test beds, Heavy Duty transient facility for exhaust emission meas. 4—16556
computerised electronic ignition with closed loop knock control 4—20930
computerised urban navigation system, using stored memory location coordinates *(German)* 4—8013
continuously variable transmission, electronic control concept 4—16402
crash dummy two-dimensional simulation program 4—10333
customized LPC speech system for cars 4—13189
diesel car integrated electronic control systems, Bosch developments 4—832
diesel fuel injection 4—8010
digital fuel injection and ignition system, instantaneous engine condition readout 4—16403
driver information system, using IR keyboard transmitter, voice synthesis 4—23811
electronic engine control, microprocessor driven air by-pass valve for idle speed control 4—16401
electronic fuel control carburettor system 4—20929
electronic gear control unit 4—11986
electronic group gear-changing 4—11988
electronic ignition module 4—20926
electronic instrumentation for motor cars *(German)* 4—14672
electronic secondary air and carburettor bleed control, three-way catalyst 4—16406
electronic systems, conf., London, England (Nov. 1983) 4—20924
Electronic voltage regulator 4—693
electronics, market survey, technical solutions *(Italian)* 4—11634
electronics, testing trends 4—21095
electrostatic precipitation devices for diesel particulate emissions control *(Korean)* 4—16027
engine control strategy development using the Ricardo microprocessor engine control kit 4—16404
engine gears—new elements of electronic control 4—11987
engine indicator diagrams, meas. and anal., high-speed data acquisition system 4—19157
engine oil level monitoring with a new optical method among common solutions 4—20419
engine speed control using microprocessor for enhanced life 4—16408
exhaust emissions and energy consumption, forecasting by computer 4—10453
exhaust gas anal. test system 4—19123
five-speed mechanical drive transmission, microprocessor controller, data logging 4—16084
Ford Motor cylinder disablement strategies, using microprocessor control 4—20581
fuel conservation programs in Australia, policy analysis 4—4134
fuel economy improvements, consumer discounting 4—11268
fuel efficient vehicle system test facility, distributed microprocessor-controlled data acquisition 4—16555
fuel meter calibration system, computer-controlled, config. and operation 4—16591
fuel metering, Central Fuel Injection engine control system 4—15919
Gas Mileage, petrol consumption analysis program 4—14760
gas sensors development, for automotive industry 4—819
ignition system with U882 single-chip microcomputer *(German)* 4—19104
instrumentation speech synthesizer *(French)* 4—13184
interior temperature electronically controlled, using electromagnetically driven bi-stable water valve, sensor 4—20415
internal combustion engine hybrid vehicles, minimisation of energy storage requirements 4—4432

digital filter CAD, TI-58 programmable calculator appl. *(Czech)* 4−23415
digital filters, CAD using interactive optimisation techniques 4−12555
digital filters, VLSI implementation using CAD system 4−10190
digital ICs, CAD using DANCADDS program software *(Danish)* 4−3286
digital matched filters, design and construction using microprocessor 4−14466
digital signal processing, filter CAD, DISPRO package 4−3293
digital transmission systems, trunk line design 4−14465
digitiser, using multicolour drawings recognition method for LSI cell drawings 4−10194
EDS-2100 CAE workstation, sofware packages 4−10150
electronic CAD/CAM system implementation and management 4−3324
electronics CAD/CAE, microcircuits and PCs, interactive displays *(German)* 4−6500
Elektronik Centralens, LSI design centre for Danish electronics industry *(Danish)* 4−3290
Facet, automated synthesis of digital systems 4−1945
Ferranti Silicon Design System 4−23386
fifth generation computers, VLSI system design 4−8435
fin line semiconductor circuits, anal. and design *(German)* 4−23409
FIR digital filters, linear and min. phase, Chebyshev magnitude response, computer design program 4−8476
FIR multiband digital filters, min-max technique for CAD appl. 4−12549
frequency multipliers, using step-recovery diodes 4−10143
gate array design for a stand alone development system *(German)* 4−3285
gate array silicon compiler ULA interconnection design package 4−8400
hardware description language, CAP/DSDL based, supports VLSI design 4−23453
hardware design automation 4−14473
heuristics for the circuit realization problem 4−3344
HF self-excited oscillator for dielectric materials heating, circuit design using electronic calculator 4−19021
high-level hardware description languages appl. 4−23389
hybrid, thick film trimmed resistors, CAD-moderate RESISTOR, iterative algorithm for characts. evaluation 4−3322
hybrid IC, thick film multilayer, CAD system for layout and testing 4−14394
hybrid ICs, CAD, thick film resistor design, models 4−14390
hybrids, CAD technique, Proof of Design, optimisation of thermal/reliability/producibility factors 4−14392
IC, semicustom, CAE 4−10148
IC CAD, design work-stations 4−21594
IC design, CAD development consideration 4−23405
IC design, CAE/CAD workstations, applications libraries 4−6483
IC design rules, user's perspective 4−3329
IDEA 1000 system with M-SPICE simulator, hardware, software and features *(German)* 4−6493
IDL, control microprocessor design 4−23483
IDL, top down design, COMDEC algorithm, VLSI macro, examples 4−23482
IDL (Interactive Design Language) features and philosophy 4−22518
Inmos circuit CAD system 4−18980
integrated or printed circuits, automated design 4−14449
interactive graphics systems, hierarchical dialogue structures 4−9132
interactive network design and analysis using the IBM personal computer 4−14548
interactive schematic entry for circuit design and simulation 4−23505
intermediate level language for VLSI design 4−9155
JBL's central array design program 4−10127
large circuit simulation, general-purpose CAD program 4−10159
large scale functional and testability analysis simulation 4−10197
LC ladder networks, open circuited and short circuited, computer synthesis 4−14460
Logicomp structured custom design system for VLSI 4−1600
low phase-noise microwave-feedback oscillators, optimisation and synthesis 4−10162
LSI circuit topology design using symbol methods *(Russian)* 4−14454
mainframe-based system, workstations, role of, in CAD environment 4−23457
Marmet's filter on-line realisation 4−23413
Mentor Graphics CAE systems 4−10135

circuit CAD continued

topographical databases for mobile communication service area determination 4−6553
topographical mesh data bases for computer-aided analysis of RF propag. characts. 4−6552
TR820 electronic charge recording system for charge-data acquisition 4−6525
tracking radar, target centroid location estimation, amplitude-angle signature based algorithm 4−3453
training system for communication methods 4−14506
TRANSDATA 9.600 system from Siemens, programming the system 4−14544
Transend PC, communications package for the IBM PC 4−10220
TRS 80 program for DXer 4−10243
TRS-80 BASIC program for net-control station 4−6532
TRS-80 Model I, 48K memory update with 64K chips 4−5207
TRS-80 terminal emulation program, in assembly language 4−8798
TU II interface for VIC-20 and Commodore 64 computers 4−10231
TV appls. of computer technology *(Japanese)* 4−14526
TV stations operations support system, independent computer systems network 4−16513
two-screen freq. selective surface design for C/Ku-band satellite links 4−6566
Universal Communications Controller design package 4−3394
urban mobile radio field strength prediction using databases 4−6556
value added network services, definition, their provision 4−23538
VHF sound broadcast transmitter, useful field strength, multiplication method, pocket calculator *(German)* 4−14532
VHF/UHF land mobile propag., computer prediction technique 4−6554
viewdata database conversion in communication processing node 4−6238
vocoder, log area ratio, implemented on signal processing microcomputer 4−22246
voice oriented auto dialer keyboard phone, appl. 4−6544
wire antennas, use of MININEC mininumerical electromagnetics code 4−6565
X-Y display for CW and single-ended RTTY TU signals 4−10230
ZX81 QRA programs on cassette 4−10253

community antenna television
broadband metropolitan networks, design considerations 4−12906

community planning *see town and country planning*

commutation
see also commutators
autoadaptive chopper for speed regulation of a wound rotor induction machine 4−20647
current frequency converter for chemical industry multimotor application *(Czech)* 4−23309
induction motors with slip power recovery, transient behaviour in open-loop and with direct current control 4−915
invertors, 3-phase, digitally modulated control method *(Hungarian)* 4−20616
sixpulse bridge convertor with direct voltage commutation, commutation process 4−925
zero current modulated single phase voltage source inverter with an induction heating tank load 4−941

commutators
see also commutation
autoadaptive chopper for speed regulation of a wound rotor induction machine 4−20647
electromagnetic processes in a semiconductor switch of a DC machine with mechanical commutator and operating in transient conditions *(Russian)* 4−10145
electronic commutators, HV, thyristor control systems design principles 4−20662

compacting *see densification*

compandor transmission *see compandors*

compandors

comparators (circuits)
see also phase comparators
8-bit absolute-magnitude comparator for 2's complement red. 4−1461
4805 fast precision latching voltage comparator, ADC appl. *(German)* 4−12471
ADC convertors, ultrafast, using comparators 4−5077
correlators with four-level quantisation, error patterns 4−15437
data acquisition, linear CMOS ICs 4−2131
DC offset correction with fast recovery in write to read recovery times 4−5219
dual-input, flexible swtiched, model AD630 4−12463
Proximity Filter PF 474 string similarity determination 4−21483
ROM programs, error detection, trace facility using comparator logic 4−1578
symbol-string comparator IC 4−8357
two-step comparator with low hardware requirement 4−8300

compensation
see also error compensation
A/D and D/A cyclic convertors, ratio independent, recirculating reference compensation, switched capacitor/op. amp. implementation 4−5076
aberration compensation in holographic memory working with two-wavelength reading-recording *(Russian)* 4−5258
AC motor speed control system using GTO convertors 4−934
adaptive controllers, stability robustness assessment 4−11427
adaptive nonlinear distortion compensators in dynamic system *(Russian)* 4−20386
application of a thyristor controlled VAR compensator for damping subsynchronous oscillations in power systems 4−20638
application of Static Var Compensators in longitudinal power systems 4−20673
arc furnace supply regulation employing thyristorised compensators 4−863
articulated robot, software servo-system *(Japanese)* 4−16614
aspects of design of multifunctional fast devices for raising the quality of the electric power *(Russian)* 4−7801
automatic digital regulator of reactive power for dynamic compensation equipment *(Russian)* 4−20658

compensation continued
automatic power regulation of capacitor banks in terms of load parameters *(Russian)* 4−4480
constrained quasi-continuous compensation for discretization of multivariable systems 4−20320
coordination of static VAR compensators with long distance radial transmission system for damping improvement 4−20640
crystal growth from melt, pulling system for automatic control of crystal diameter *(Czech)* 4−12230
cycloconvertors, circulating current type, reactive power control system 4−4497
decoupling linear systems, by dynamic compensation with internal stability 4−15839
discrete systems, parameter variation compensation 4−11407
distributed parameter systems, compensator design using direct approach 4−15887
dynamic compensation schemes comparison 4−7499
EHV lines, reactor-compensated, overvoltages due to open-phase occurrence 4−23329
electrohydraulic servomechanisms for articulated robots, pressure feedback compensation 4−1085
FET voltage regulator circuit, temp. compensated 4−4297
flywheel energy storage system distorted power compensation by cycloconvertor 4−948
FPC-1800 programmable DC motor controller facilitates flexible servo system design 4−11542
generic invariant factor assignment results using dynamic output feedback 4−3950
HF circuits, production techniques *(German)* 4−7488
HVDC convertor static var compensator control in AC/DC power system 4−911
HVDC transmission systems operating characts. improvement by static reactive power compensator 4−10123
I^2L memory, input current compensation technique for restore circuits 4−1792
I-PD controller, design by dominant pole assignment *(Japanese)* 4−20280
industrial robots, control structure investigation 4−16331
line current harmonic's compensation scheme for power distribution system *(French)* 4−10097
linear diffusion systems, feedback stabilisation 4−677
linear multivariable feedback systems, algebraic theory 4−11395
linear system decoupling based on linear feedback 4−4182
linear systems, factorisation, generalised framework 4−3955
linear systems, stability and nonsingular stable precompensation, algebraic approach 4−10979
linear systems over Bezout domains, pole placement 4−20270
linear systems over rings, dynamic output feedback 4−20314
low order compensators, design using parameter optimisation 4−20325
manual control systems, compensation mechanism for human operator time delay *(Japanese)* 4−7570
material flow process controllers, connection of microcomputers *(German)* 4−4529
milling, compensation for surface errors due to tool deflection, CNC appl. *(Japanese)* 4−16326
model following system, internally stable type, compensating control synthesis procedure *(Japanese)* 4−15863
model reference adaptive control systems design using frequency domain methods 4−7554
MOS A/D converter, successive approx., inherent self-compensation *(Japanese)* 4−12478
multichannel electrohydraulic servosystem controller CAD 4−7762
multidelay observer based compensation, simulation tests 4−11789
multivariable L∞ sensitivity optimization and Hankel approximation 4−11402
multivariable systems, two step decoupling algorithm 4−11379
nonlinear systems, linear compensator design for bounded input bounded output stability 4−11488
nonminimum phase system, unstable, pole placement self-tuning control 4−11443
operational amplifier response characteristics, compensation program 4−14420
optimal design and control scheme for continuous capacitive compensation of distribution feeders 4−4468
optimal servomotor control, used for motor-tachometer mechanisms 4−791
pneumatic coupling condenser principles and appl. 4−753
pneumatic transmission lag compensator, development and appl. 4−752
power system stabilization, HVDC link control capability exploitation 4−912
precision laser machine for focusing a beam of light, microcomputer control *(Dutch)* 4−11502
precompensator design for achieving decoupling condition in frequency domain 4−11317
proportional-derivative output feedback dynamic compensator, pole assignment with output feedback 4−20263
reactive power, adaptive nonlinear compensation 4−11755
reactive power compensation, regulator characts. *(Russian)* 4−11696
reduced order compensator design, appl. of similarity invariants of linear systems 4−4185
regulation of the reactive power and voltage in a power supply system using fast static thyristor compensators *(Russian)* 4−4481
satellites in non-equatorial synchronous orbits, lateral drift compensation through attitude control 4−16473
solar power satellite, investigation of quasi-inertial attitude control 4−16472
space systems, flexible structure controller design method using mode residualization and output feedback 4−20970
synchronous generator with thyristor controlled load, performance anal. 4−946
synchronous satellites, autonomous compensation for orbital disturbances of known frequency 4−4722
teletext echo compensator *(German)* 4−17256
thermocouple monolithic signal conditioner, cold-junction compensation design and operation 4−20408
thyristor dual converter for DC motor drives, cascade nonlinear compensation 4−16171
thyristor-controlled reactor used as static reactive power compensator, microprocessor control 4−4498
time-delay systems, decoupling control and arbitrary coefficient assignment 4−15876

compensation continued
  totally active DC-type mag. bearings, control system design *(Japanese)* 4—20305
  variable inductor control for improved power system waveforms by harmonics suppression 4—945

compilers (program) *see program compilers*

compiling programs *see program compilers*

complementary metal-oxide-semiconductor integrated circuits *see field effect integrated circuits*

complete computer programs

  3D-game-animation program, in BASIC *(French)* 4—14752
  10 bit gray code to BCD conversion, using 6800 routine 4—6533
  64 character creator in BASIC 4—5872
  6502 assembly language program for fast multiplication 4—6498
  6502 machine code, space invaders program 4—3610
  6502 machine code disassembler for the Oric 4—17909
  6502 miniassembler/interpreter *(French)* 4—22544
  6502-based systems program analysis software in machine code 4—17957
  6551 serial port, software to drive, in FORTH 4—12862
  8085 microprocessor assembly language routine for 16-bit multiply 4—3291
  accessory element distribution in metallurgical processes, modelling, smelter plant computerisation 4—10452
  Acorn Electron RS423 communications interface, control registers, demonstration programs, in BASIC 4—17245
  address filer program for the Apple in Basic 4—3621
  adventure game, Colorbot in Basic 4—14769
  adventure game, Goodbye Charlie in BASIC 4—10521
  adventure game, SAS assault in BASIC 4—19430
  adventure game, Spectrum, submarine mission for two players, I/O routine, machine code, BASIC 4—10555
  adventure game Vic-20, Night Forest, BASIC, machine code listing 4—10557
  AF amplifier noise factor optimisation, HP 41 C pocket calculator program *(German)* 4—3301
  AFSK convertor, reverse frequency discriminator, sending/receiving programs *(German)* 4—3377
  air-cooler, size and other parameter calc., program for HP41CV programmable calculator 4—19171
  algebraic computation in general relativity, computer program in REDUCE 4—6415
  amateur radio, program for long distance listening 4—19063
  amplifier interstage matching network design using shunt-open stubs 4—14450
  amplifiers, low-noise design, HP-41 and TI-59 calculator programs 4—3270
  antenna design, personal computer appl. 4—3275
  antennas, design and construction 4—23387
  antennas, design program for VIC-20 4—19053
  Apple, circle and ellipse generation, in BASIC and assembly language 4—17732
  Apple CAD, Logo interfacing to digital plotter 4—22423
  Apple directory menu, assembly language program 4—10581
  Apple II, menu-driven utility program, in BASIC 4—10539
  Apple II, Pascal program for reading and printing bar codes *(German)* 4—9116
  Apple II CAD program in LOGO 4—18910
  Apple II overview and game in BASIC 4—6813
  Apple II relocator, machine language programs *(German)* 4—17127
  Apple Music Writer for composing or reproducing songs, in BASIC 4—10531
  Apple sounds, demonstration programs 4—6798
  Applesoft strings, commas and colons, in BASIC 4—13238
  appointments calendar construction in JRT Pascal version 3 4—23778
  arcade game, Capman for Spectrum, BASIC, hex code listing 4—10546
  arcade game, Cosmic Balance II in BASIC 4—19424
  arcade game, Crazy Climber in BASIC 4—10522
  arcade game, Demons of Osiris in Basic 4—14768
  arcade game, Gotcha in BASIC 4—19421
  arcade game, Millipods program for centipede game 4—23766
  arcade game, Pathway in BASIC 4—10524
  arcade game, Quatrainment in BASIC 4—19420
  arcade game for Atari, Breakup in BASIC 4—23786
  arcade game for BBC microcomputer, Fruit Worm in BASIC 4—19429
  arcade game for Spectrum, Quazimodo in Basic 4—19426
  arcade game Missile Command, BBC BASIC, machine code program 4—10553
  arcade games for the BBC Micro, in BASIC 4—14777
  arithmetic at speed, Speed Math, programs in TI BASIC and Applesoft BASIC 4—23742
  array operations in Microsoft BASIC, assembly language listing 4—10583
  Art Museum, SAVE and LOAD character graphics, in BASIC 4—13341
  Asteroid Lander arcade game for CBM-64 in BASIC 4—23771
  astronomical ephemerides, BASIC program for calculation *(French)* 4—14249
  Atari, automatic variables, PILOT program 4—10533
  Atari, disk file reading, BASIC program 4—10543
  Atari Bats, complete listing of the game, BASIC 4—10547
  Atari Chartmaker, in BASIC 4—13345
  Atari directory menu, BASIC programs 4—10586
  Atari disc file copying program, in BASIC 4—10541
  Atari Disk Detective, string location utility in BASIC 4—9248
  Atari game, Balloons, in BASIC 4—10574
  Atari graphics, program for output of text *(German)* 4—13339
  Atari graphics notepad in FORTH 4—10587
  Atari GTIA Textwriter 4—10535
  Atari Key Panic, computer game in BASIC 4—10525
  Atari master disk directory in BASIC 4—5868
  ATARI moving graphics, in BASIC 4—23740
  Atari music player, BASIC program 4—23722
  Atari programmable character editor, in BASIC 4—17945
  Atari screen editor, in BASIC 4—17944
  automobile maintenance scheduling program in Basic 4—14767
  autoregressive spectrum analysis program in FORTRAN 4—6402
  Avenger, fast action machine code game for BBC micro 4—23756
  bad blocks in data cartridges, using RT-11 with discs 4—5216
  Balloon Hopper, game for Spectrum in BASIC 4—3600
  bank transaction processing in BASIC 4—9526

complete computer programs continued
  bank-switched JSR [for SuperPET] for SuperPET, assembly language program 4—10584
  bar charts, program for CBM computers *(German)* 4—6167
  bar code generation on dot matrix printer, program in Basic 4—2894
  Bar Graph Generator for the Apple, in BASIC 4—17766
  BASIC, antenna design 4—18986
  BASIC, phased vertical antennas beam patterns plotting 4—19019
  BASIC, receiver specifications comparison 4—6529
  BASIC, telephone traffic, Erlang B, CCS and required trunks calculation 4—6543
  BASIC, transformer parameters calculation *(Spanish)* 4—3311
  BASIC downloading via telephone on the PET, VIC-20 and Commodore 64 4—23515
  BASIC program, party game for ZX81 *(French)* 4—19388
  BASIC program for computing PC-board density 4—3292
  BASIC program for customer file on VC 20 *(German)* 4—5736
  BASIC program for differentiating functions *(German)* 4—18773
  BASIC program for Fourier analysis and synthesis *(German)* 4—18772
  BASIC program for HX-20 Epson computer *(German)* 4—17989
  BASIC program for multiple choice generator, educational aid *(German)* 4—19326
  BASIC program for overdraft or loan *(German)* 4—6069
  BASIC program for QSL generation 4—6530
  BASIC program for radio amateur data logging 4—6531
  BASIC program for simulating signature analyser 4—3294
  BASIC program for solving simultaneous eqns. 4—1802
  Basicalc, table oriented calculation program *(German)* 4—14078
  Basicode-2 interface for the Junior Computer 4—2485
  BBC, RAM addition in ROM socket, programs in BASIC and assembly language 4—17019
  BBC Micro, BASIC program for using a modem 4—10560
  BBC Micro, sophisticated graphics system in machine code 4—9114
  BBC microcomputer, sideways RAM board, software in assembly language 4—17750
  BBC microcomputer, terminal emulation 4—2022
  BBC microcomputer graphics handling utilities in BASIC 4—14772
  BBC Model B microcomputer, arcade game, Snoopy 4—10569
  BBC scrambler in BASIC 4—3590
  benchmark based on discrete Fourier transforms, with listing in CBASIC 2 4—17953
  Benchmarks—computer performance evaluation programs, in BASIC 4—10861
  binary/decimal conversion and vice versa program, in machine code 4—23171
  binomial distribution, sampling, program, basic, PET 4—14710
  biorhythms, Mbasic program *(Norwegian)* 4—6784
  bitmapping on the Commodore 64, in BASIC 4—13342
  bitmaps, 6502 coding and documentation to speed data-handling 4—5755
  bivariate data set regression line estimation, BIREG program in BASIC 4—18779
  bleep system simulation program in BASIC 4—19432
  blind card-pairing game program, in BASIC *(French)* 4—23729
  Blockman, computer game for Sinclair 16/48K spectrum in BASIC 4—23759
  bond quotations anal. program in BASIC 4—2762
  braille learning, Commodore PET program in BASIC 4—19330
  bubble sort, machine code listing 4—17747
  bug tracer program for 48K and 16K Spectrum, in machine code 4—2494
  buildings, heat loss through roof, U-value calc., BBC 'B' program in BASIC 4—3430
  business risks, Monte Carlo venture analysis, BASIC program 4—22967
  buying for maximum profit, listing in Basic 4—13873
  CalcSheet, spreadsheet program for BBC Model B computer, in BASIC 4—10563
  calendar printing program, in FORTRAN 4—22509
  Calorie Cop, dieting aid, in BASIC 4—14757
  can design program, in BASIC 4—3436
  cannibals game program listing, in BASIC 4—19440
  cassette data file program for ZX81 in machine code 4—2482
  catalogue sorter program for Apple microcomputers in BASIC 4—22582
  CB2 used as output line, signal generator, or sound source for the PET 4—10578
  CBM-64 for electronic music, in machine code and BASIC 4—23723
  central heating system calculations, program in Basic 4—19446
  character editor program for Commodore 64 and VIC 20, in BASIC 4—17942
  character generator with umlauts and reverse video, BASIC listing *(German)* 4—13479
  character sets, user definable for EPSON FX80 printer on Commodore 64 4—23787
  character sets for Spectrum, alternatives, BASIC program 4—5765
  chemistry, flow injection analysis, computer controlled system, in BASIC 4—18812
  Chopperoids, chopperoid flight simulation program, in machine language 4—14763
  circus game in BASIC 4—19419
  cluster anal. and data anal. in FORTRAN, book 4—4001
  Color Computer, modem-to-modem communication, MODCOMM, BASIC program 4—23520
  colour graphics, high resolution, for Dragon micro, Frogsy arcade game appl. 4—23770
  colour photography from a black and white display, in MBASIC 4—13317
  Commodore 3032 micro, BASIC program for filing of personal record collections *(German)* 4—10576
  Commodore 64, adventure game in BASIC, Hell Maze 4—10568
  Commodore 64, colour selection in CP/M, machine language program 4—23744
  Commodore 64, game, U-boat, BASIC program 4—10544
  Commodore 64, program variables lister, in BASIC 4—10540
  Commodore 64, word counting program, screen print utility, game, and test generating package 4—22578
  Commodore 64 alarm clock demonstration program in BASIC 4—23781
  Commodore 64 directory menu, machine language routine 4—10585
  Commodore 64 sound tester program in BASIC 4—10529
  Commodore and BBC Micro connection, in BASIC 4—21895
  Commodore and condominiums, program for computing rent, mortgage payments, cash flow and tax savings 4—6073
  Commodore EXEC program in BASIC 4—5867

complete computer programs continued
- Commodore microcomputer, machine code routine, graphic character conversions 4–22438
- Commodore microcomputers, communication routine in machine code 4–23522
- communications program for handicapped people, VIC program in BASIC 4–10595
- complex eqns., program to solve, in IBM BASIC 4–3115
- conlog solution, program for radio operators 4–23513
- conservation of momentum for ATARI and COMMODORE in BASIC 4–3481
- context optimizing concordance program in ALGOL 68 4–14735
- contour plotting subroutine for Earth gravity anomalies in Fortran 4–3188
- control valve sizing program for HP-67/97 calculator 4–14636
- Cosmazoigs arcade game for 16K or 48K spectrum in BASIC 4–23772
- Cosmic Clash arcade game for BBC micro in BASIC 4–23773
- coupon filing, program in BASIC 4–6791
- CPM Plus bootstrap loader in JANUS/Ada 4–17995
- Crohn disease and ulcerative colitis diagnosis for the HP 41C programmable pocket calculator 4–9955
- crossword puzzle pattern generator, in BASIC 4–19409
- CRT phosphor life, program for the TI-59 programmable calculator 4–14179
- cryptograms and anagrams, BASIC programs for soln. 4–19393
- cursor control and CP/M for dumb terminals, program in assembly language 4–17974
- curve plotting, programming methods and BASIC listings *(German)* 4–13320
- curve tracer, BASIC program for PC1500 *(French)* 4–17727
- curve-tracing using printer, in BASIC *(French)* 4–13478
- cylindrical gears geometry calc., for TI 58/59 *(Croatian)* 4–14608
- data acquisition and anal., in BASIC 4–18763
- data copying with one diskette drive *(German)* 4–5737
- data transfer between PET and KIM-1, machine-language programs 4–13510
- data transfer control program for microcomputer, in BASIC *(Japanese)* 4–9234
- De Muur, arcade type machine code game 4–23754
- definite integral calculation program *(Spanish)* 4–23173
- determination of continuous lengths of material on rolls *(German)* 4–18435
- diffusion system analysis program for TI-59 pocket calculator 4–23196
- disc drive alignment verification, Digital Diagnostic Diskette, in assembly language 4–17933
- disk dump program for Apple microcomputers in BASIC 4–22583
- displaying PET's keyboard matrix in BASIC 4–5883
- DML parser 4–13454
- DOS loading program for the Apple, in BASIC 4–17642
- DOSPLUS, utility functions for Commodore 64 4–22584
- downloading BASIC software to C64, RS232 download program 4–17983
- downloading program for VIC-20, in BASIC 4–10241
- Dragon, Explorer, complete listing of the game 4–10548
- Dragon 32 arcade game, Sky Shield in Basic 4–19427
- Dragon 32 game program in BASIC, Dungeon 4–10564
- dragon curves on an IDS Paper Tiger printer, in BASIC 4–13318
- Dragonmaster, computer game in BASIC 4–6792
- drill program creation program 4–19436
- dungeon adventure game, in BASIC 4–14764
- Dvorak keyboard, alteration program in Basic 4–2270
- dynamic multidimensional arrays in Modula-2 4–16638
- education game, Alpha Blast in BASIC 4–10523
- elbow joint pattern lengths, parallel-line method and program in BASIC 4–10346
- electronic circuit drawing using Apple microcomputer, in machine code and BASIC 4–18985
- Elektor Junior computer conversion to synthesizer, machine code program for audio signal prod. 4–3617
- English language education using Photofit program in BASIC 4–19362
- EPROM programmer for BBC Microcomputer, in BASIC and assembly language 4–1833
- Epson bit plot graphics, electron density maps program in Microsoft BASIC 4–9905
- Epson MX 80 printer and VIC 20 interface, in BASIC 4–13521
- equipment availability, simulation program for HP-41C calculator *(Croatian)* 4–3213
- erase protection for Commodore diskettes *(German)* 4–17753
- Escape from Pyramid of Doom, computer program for Commodore 64 in BASIC 4–23755
- event timing with BBC Microcomputer, BASIC program 4–6803
- F Matinv program in FORTRAN 77 4–18903
- factoring program in machine language 4–14770
- ferrite pot cores, coils calc. using TI-59 calculator *(Czech)* 4–23296
- file protection, encryption program in Z80 and 6502 machine language and BASIC *(French)* 4–22575
- file transfer from Apple III to IBM PC, program in BASIC 4–17982
- Financial Operating System, property buying with TRS-80 Basic 4–23739
- finite element analysis, brittle fracture in FORTRAN 4–10329
- Flex utility program for removing names from your discettes *(French)* 4–17930
- flight simulation program listing for CP/M, in Microsoft BASIC *(French)* 4–23625
- food cooperative record handling program in BASIC 4–19415
- foreign language vocabulary testing program *(German)* 4–19380
- FORTH, a version for the BBC microcomputer 4–22487
- FORTH, compiler program for ZX-Spectrum in BASIC 4–23763
- FORTRAN, MULTIVOL, an extension of BIVOL blowdown code 4–6630
- FORTRAN IV PROGRAM WAGNER for calculation of ground wave attenuation over irregular media 4–10277
- Fortran program for designing compensating networks 4–3279
- FORTRAN subroutine from OMSI PASCAL 4–2487
- Fourier analysis program *(German)* 4–14076
- Frogger, game for 48K and 16K Oric, in BASIC 4–3602
- frozen food monitor for Sharp MZ-80K *(German)* 4–18432
- FUMBLE, PASCAL program for memory initialisation 4–17921
- function optimisation by linear programming, in BASIC *(French)* 4–14070
- game paddle interface program in BASIC 4–19290

complete computer programs continued
- game programming in Apple PASCAL 4–19417
- gamma distribution generalisation, nomogram and program for parameters selection *(Rumanian)* 4–6331
- Gas Mileage, petrol consumption analysis, in BASIC 4–14760
- GASCHROMATOGRAPH quantative analysis of results of chromatograph in Forth for the Apple II 4–9922
- generalized transmission line transformers complex impedance matching 4–23407
- GENIE, TRS80, LNW80 microprocessors BASIC II programs for Ohm's/Joule's laws calculations *(Spanish)* 4–14461
- Genie I, coding in Basic *(German)* 4–5812
- geodesy, latit., longit. and ellipsoid height conversion from NAD-27 to predicted (NAD-83) 4–14238
- geophysical prospecting methods, computer programs for hand-held calculator for Texas Instruments and Hewlett-Packard calculation 4–18891
- golf game for Vic-20 with 8K or 16K expansion in BASIC 4–3603
- graph drawing software for Commodore, in BASIC 4–17764
- graph plotting on the BBC Micro, in BASIC 4–18764
- Graph-Demo, Ada package demonstration 4–5772
- graphics, coordinate geometry for pixel specification, point and line editor, in BBC BASIC 4–22426
- graphics display commands for 16K and 48K spectrum, utility program in machine code 4–22424
- graphics routine for Commodore microcomputers, in BASIC 4–22437
- Hayes Smart Modem for Apple, BASIC program 4–23519
- Hayes Smart Modem for Atari, BASIC program 4–23518
- Hayes Smart Modem for Color Computer, BASIC program 4–23516
- Hayes Smart Modem for Commodore 64, BASIC program 4–23517
- helical spring design program, in BASIC 4–19147
- Hershey character font generation on microcomputers and plotters, utility programs 4–8909
- high speed mazer, game in BASIC 4–6797
- HP 41 calculator, interpolation program 4–6499
- HTURTLE, Turtlegraphics Interpreter, in Atari BASIC 4–17737
- IBM PC sorted diskette directory listing, in Assembler 4–22406
- IBM PC sorting program in BASIC 4–17741
- IBM Personal Computer, character editor, BASIC program 4–9095
- IBM Personal Computer, graphics editor, BASIC program 4–9093
- IBM personal computer, screen display enhancement, assembly language program 4–9092
- impedance matching using double stub appl., analytical method *(Spanish)* 4–3310
- in BASIC 4–2483
- in BASIC 4–6794
- in Basic 4–17936
- in Selectric terminal for word processing, conversion program in Basic 4–2686
- industrial inspection by morphological virtual gauging, in BLIX 4–14303
- infant and childhood mortality estimation by indirect technique, BASIC program 4–23249
- instructional authoring system in UCSD PASCAl 4–3496
- integration, BASIC program 4–3116
- interactive language experiences between students and computers in BASIC 4–3538
- interface between BASIC and assembly languages, using jump and data tables 4–5676
- intermolecular energy analysis program in FORTRAN 4–23195
- investment planning program in BASIC 4–9507
- investment value calculation program in Basic 4–2808
- invisible disk directory for VIC and 64, program in BASIC 4–5869
- jungle adventure game, Lord Quatermain's search, in BASIC *(French)* 4–23730
- justification for a proportional printer, program in Basic 4–18209
- Krazy Ape arcade game, listing in BASIC 4–23768
- ladder networks, general purpose analysis program for HP-41 calculator 4–3271
- least-squares cubic approximation, BASIC program for maxima of Cepheid variables 4–14252
- Letter Drop, word game in Basic in BASIC 4–23757
- LETTERMASK: a check protecting algorithm in BASIC 4–2764
- lie detector/relaxation aid, biofeedback interface for microcomputers, with BASIC program 4–3631
- Life in Modula-2 4–3619
- linear searching of string arrays on the Apple II 4–10582
- linear-phase FIR filters implemented with signal processor *(German)* 4–14417
- Logo Graphics on computer printout, interface program, in Logo 4–17738
- Logos 64, word processing program *(German)* 4–6004
- Lower Case, machine code program for Dragon 32K 4–23761
- LV room thermostat performance, switch-feedback model computer simulation 4–7755
- machine code string array sort for OSI 4–2383
- magnetic resonance spectra simulation, programs in FORTRAN 4–23198
- map recording system in BASIC 4–19450
- MAPGRF program for graph generation in overlay design 4–5875
- mass data entry program for DEC VT100 or VT52 terminal 4–17940
- master directory for the Apple in assembly language 4–22381
- MASTER for VIC-20 and COMMODORE 64 in BASIC 4–3576
- Mastermind-type game program listing, Saint-Exupery, in Forth *(French)* 4–14750
- matrix transformations, graphic display manipulation aid, in Acorn BASIC 4–17751
- maze game, Flip and Flop in BASIC 4–19423
- Maze-Miner arcade game 4–23774
- MC68705 cross-assembler program in BASIC 4–17910
- MC 68000 kernal, in C 4–13511
- medical record keeping program in BASIC 4–19414
- meetings scheduling program in BASIC 4–22792
- memory location monitor programs in Timex Sinclair BASIC 4–17935
- Mercury Mine, a strategy game for Atari, in BASIC 4–19411
- merging BASIC programs from Commodore disk, program in BASIC 4–5866
- Michaelis-Menton equation, pocket computer program for fitting by non-linear regression analysis, for the Radio Shack TRS 80 or the Sharp PC 1211 4–9954
- Micro Calc calculation program for Atari in BASIC 4–23785
- Micro Calc calculation program for Commodore machines in BASIC 4–23780
- Micro Calc calculation program for the Apple in BASIC 4–23783

complete computer programs continued
- Micro Calc calculation program for TRS-80 in BASIC 4—23784
- microcomputer programs for the HVAC industry, solar gain 4—6591
- microcomputer programs for the HVAC industry, U value calc., occupancy gains 4—14601
- microcomputer programs for the HVAC industry 4—10338
- microcomputer-based scheduling algorithm, program in BASIC 4—537
- millisecond timer programs, in Z80 machine language 4—14688
- mobile radio channel data communication problem, analytical and numerical approach, in FORTRAN 4—14545
- modular arithmetic and computer art, in BASIC 4—19376
- Modulus 11 Check Digit Calculator, program in BASIC 4—17785
- monitor program for Commodore 64 *(German)* 4—13340
- monitor test programs 4—13121
- Mosaic Puzzle, in BASIC 4—14765
- MOSFET static power invertor, config. and design using computer programs, household photovoltaic appl. *(Spanish)* 4—14358
- motor selection program, in BASIC 4—23372
- Moving maze, computer game in BASIC 4—6793
- multichannel software event counter for the MC6809 4—10599
- multicolor Atari character editor in BASIC 4—5870
- multicolour graphics, Commodore 64, programs in BASIC 4—22447
- multiple file, program listed in BASIC *(Spanish)* 4—13296
- multiprocessing, running 6502 and 6809 in the same computer simultaneously, in machine code 4—1842
- multitasking program in BASIC 4—22635
- Music, program for Oric-1 which plays music in BASIC 4—23752
- music program listing for Videogenie, in BASIC *(French)* 4—6763
- music synthesizer program for CBM 64 in BASIC 4—3604
- mutual fund files in BASIC 4—2763
- neuronal resonances inequality patterns, program for calculating n-gram coefficients in FORTRAN 4—18852
- Nightflyer, flight simulation game, in BASIC 4—14761
- NITPACK, interactive tree package, user's guide 4—14001
- NITPACK, interactive tree package 4—14000
- noise figure by computer 4—10173
- number system explanation, program in Basic 4—3584
- numbers, converting between bases in BASIC 4—3577
- numerical anal. in BASIC language, book 4—23176
- numerical methods for microcomputers, theory and BASIC listings, book 4—16618
- nutritional assessment on hospitalized patients, pocket computer program, for the TRS 80 4—9953
- operational amplifier response characteristics, compensation program 4—14420
- optical fibre bandwidth prediction program in BASIC 4—6542
- organisational chart drawing, Basic program for Apple III micro 4—2933
- Oric 1, Matrix Run, games program 4—10554
- ORIC centepods in BASIC 4—3592
- Oric-1, tape verifying, machine code routine 4—10558
- Oric-1 Space Invaders program in BASIC 4—10565
- Osborne 1, graphics program in BASIC 4—2403
- Otelo game of strategies, computer programs in assembly language *(Spanish)* 4—23796
- output formatting program for Atari in BASIC 4—6788
- paged ROM for the BBC micro, list program in assembly language 4—17020
- pandiagonal magic squares, TI-59 algorithm and program listing *(German)* 4—14075
- panel fundamental modal displacement response, evaluation of Jx^2 on MICRO-2200 desk calculation 4—10330
- particle settling velocity calculation program for TI-59 programmable calculator 4—6614
- PASCAL pretty-printer, program design 4—5774
- pattern drawing program in BASIC 4—6795
- paycheck analysis, in BASIC 4—14758
- payroll computing, Nine to Five payroll program in BASIC 4—9535
- PBASIC, verifier program for American National Standard Minimal BASIC 4—13491
- PC-1500 potentiometer linearity error correction program in BASIC *(German)* 4—3302
- PCB layout CAD program listing, Origraph, in BASIC *(French)* 4—14381
- PCM decommutation system, CMOS microprocessor CDP 1802 based design 4—7671
- PERFECT V FORTRAN program for ^{3}H bound state calcs. 4—14094
- PERFECT V-A FORTRAN programs for ^{3}H wave function calcs. 4—14095
- personal teletext on the ZX81 *(French)* 4—19391
- PET BASIC program for amateur radio log book data processing 4—14517
- Pet to BBC, program interface in BASIC 4—13490
- pET-to-PET communications in machine language 4—1965
- Petri net simulation using Modula-2 sets 4—6330
- physically handicapped user computing: external keyboard for microcomputers, esp. Epson HX20 in BASIC 4—14753
- physicochemical parameter optimization by unidimensional search, calculator program 4—9918
- picture-drawing routine for ZX81 4—5162
- Plane Annoying, puzzle for Sinclair ZX81 in BASIC 4—23751
- poker game program, in BASIC *(French)* 4—23728
- porous materials extrusion, FORTRAN IV program for investigation *(Russian)* 4—14603
- portability example program, in Pascal 4—22491
- POS terminal simulation program in BASIC 4—2926
- postal cheque management program listing, in M-SPEAK *(German)* 4—13760
- powder diffr. data, POWLS program for calc. and refinement, in FORTRAN 4—14186
- power transformer design, BASIC program 4—14322
- PPL, nonlinear type, analysis program for TI-58/59 calculator 4—18987
- prime numbers, program to find consecutive odd integers which are prime, in BASIC *(French)* 4—23168
- printer benchmarking: dot matrix and daisywheel printers, in BASIC 4—17518
- printing and other operations simultaneously, program in assembly language 4—17937
- production planning program in Applesoft Basic 4—13845
- Progaid toolkit program for ZX-81 in machine code 4—22581
- program analysis, Document utility program, in BASIC 4—22579
- programmable frequency synthesizer construction program in assembly language 4—18974

complete computer programs continued
- psychophysical thresholds, computation using probit technique, in Applesoft BASIC 4—6674
- queue simulation program in Applesoft BASIC 4—19830
- queueing system simulation, single server, microcomputer program, for the TRS-80 and the PET, in BASIC 4—13646
- quiz program, general multiple choice 4—19351
- Ram test using machine code program *(German)* 4—17021
- Raman spectrometer-minicomputer software interface in FORTRAN 4—9917
- random Morse computer program for radio amateurs 4—19051
- raster display image generation, in OCCAM 4—22445
- rational interpolation of Lagrange data, reliable and numerically stable program 4—14077
- reading level analysis, Fog Index, computer program 4—13896
- reliability assessment methods, BASIC program for calc. of factors, confidence levels *(Italian)* 4—354
- remote-communication program, Lmodem, in BDS C languages 4—10221
- renumbering of ZX81 BASIC program lines, machine-code listing *(French)* 4—5862
- Reportmaster, report generating program Commodore 64 4—5983
- RF amplifier, design program for HP-41 calculator 4—10129
- RFI with communication cables, in BASIC 4—19086
- RI word processor, in BASIC 4—13344
- robot, Teachmover, computerised position control using BASIC and Pascal programs *(Spanish)* 4—1351
- robot arm control program for AIM 65 Microcomputer controlled robot Gyro cleaning station, in Forth 4—7904
- robot command program in forth 4—10288
- rooms, optimal corrective absorpt., computer-aided procedure 4—3420
- RSX11M Connect to Interrupt Vector Directive 4—5879
- RTTY for TRS-80C 4—1988
- Runway 180, game listing in BASIC 4—6796
- sales prospect sorting of UK postcodes 4—2927
- SCANN, PDS spectrum scanning program, description 4—3200
- school fieldwork results recording, program in BASIC 4—3495
- school savings bank program in BASIC 4—13779
- score-ranking and tie-resolution program, in BASIC 4—14693
- screen editor program for Commodore computers, in BASIC 4—17763
- screen editor program for the Apple, in BASIC 4—17947
- screen editor program for TRS 80C, in BASIC 4—17943
- SECTOR, adventure game on Apple II using BASIC *(French)* 4—19389
- securities analysis program for Commodore 64 and VIC, Atari, IBM PC and PCjr 4—22869
- sensors for personal computers, programs for Color Computer 4—23391
- sequential X-ray spectrometer, versatile program for data capture in multielement anal., in BASIC 4—23230
- sheet metal design, segmented bends in round ducting, BASIC program 4—19155
- simple graphics for printer in PASCAL 4—13322
- simulated DOS for ZX-81 in BASIC and machine code 4—10550
- Sinclair Spectrum, alternative uses of 'open' and 'close' for microdrive 4—23762
- Sinclair Spectrum, arcade game in BASIC, Maggot Stomp 4—10567
- Sinclair Spectrum assembler program in BASIC 4—10571
- Sinclair ZX81, arcade game in BASIC, Scram-81 4—10566
- Sinclair ZX81 Merge facility, program listing in BASIC 4—10572
- Sinclair ZX-81 line renumbering program in BASIC 4—10570
- slide show, computerised, in 380Z structured BASIC 4—6054
- sliding tile puzzle for Dragon microcomputer, in BASIC 4—3605
- Small-C help facility 4—9291
- Smith chart anal. program for TRS-80, in BASIC 4—14451
- sort demonstration program in BASIC 4—17742
- sorting, timing comparison program in Forth 4—2340
- sorting and ranking program, SORTRANK, in BASIC 4—5752
- sorting procedure for biological data, program for the TI59 pocket calculator 4—9952
- Space Invaders-type game program listing, Squadron, in BASIC *(French)* 4—14751
- Space Thief, game of strategy, in BASIC 4—14762
- SPACEFIL program modifications to produce shaded space-filling mol. models with perspective 4—3134
- spectroscopic dispersion/absorption line shapes, computerized data processing in PASCAL 4—9915
- Spectrum, routine for filling in irregular shapes, machine code 4—10552
- Spectrum time slider game in BASIC 4—3587
- speech, digital storage and reproduction using 6502-based microcomputer, in hexadecimal and assembly language 4—3383
- speech synthesis, vocabulary acquisition and word replay, programs in BASIC and machine code 4—13368
- speech synthesis on ZX spectrum, cct. and BASIC program 4—22239
- speech synthesiser, Talker, makes programming spoken text easier in Z80 assembly language 4—6820
- spelling quiz program in BASIC 4—6690
- split stream processing, shuttle program, in Pascal 4—22547
- Sprite, graphics program for Sinclair Spectrum 4—23753
- sprite animation program for BBC micro in BASIC 4—23769
- sprite editor for Commodore CBM 64, BASIC, machine code 4—10551
- statistical distributions, in APL 4—10875
- stepper motor ramp table, BASIC program to generate 4—3408
- stereoscopic graphics, demonstration program in Basic 4—2374
- stock market, BASIC program 4—6089
- stock market analyser program in BASIC 4—9523
- storage in memory augmented using a character graphics program—mode 10 in mode 0, in BASIC 4—17999
- storage oscilloscope, BASIC programs for TRS-80 Color Computer 4—23294
- string/substring searching, rapid, Applesoft BASIC program 4—9120
- structural dimension calculations, addition and subtraction of feet and inch dimensions, in BASIC 4—18780
- submarine game for ZX-81, in BASIC 4—3607
- substation earthing, computer based procedures for complex systems 4—14361
- Super Barricade, two-player game for BBC Micro, in BASIC 4—3601
- Swag, basic computer game for Atari in BASIC 4—23758
- switching power supply stability anal., BASIC program for Casio FX-702P 4—3280
- tax deductions and allowances calc. using program on Apple II *(German)* 4—18314
- Tektronic-type plots on a microcomputer, program in BASIC 4—5754

complete computer programs continued
  telephone directory and dialling program for TI computer, in BASIC 4—10240
  telephone directory management program in BASIC 4—19447
  temperature coeff. of resistance, meas. using BBC microcomputer, in BASIC 4—23205
  temperature scale conversion program in BASIC 4—13267
  tennis game for ZX81, in BASIC and machine code *(French)* 4—3571
  Term-Mite ST intelligent video display terminal, graphics programs, in BASIC 4—17972
  terminal emulation program for CP/M-based microsystems, in machine code and assembly language 4—1993
  terminal emulator for Commodore 64, machine language program 4—10242
  terminal program for SuperPET, in machine code 4—3573
  text exchange system, transportable system for management and exchange of programs and other text 4—14002
  text-processing on BBC microcomputer, program in BASIC 4—23792
  thermal imaging analysis, numerical simulation by integral of differential radiant emittance in BASIC 4—3467
  TI 59 programmable calculator, agitator design, impeller size and motor HP selection 4—23586
  TI Extended BASIC intricacies and programs 4—22501
  TIMECHange.BAS program to set RSTS/E system clock 4—5880
  trackball interfacing technique, in BASIC 4—12830
  TRIOBE, Fortran program for triton bound state with vel.-depend. OBE potential 4—9898
  TRS 80 program for DXer 4—10243
  TRS-80 BASIC program for net-control station 4—6532
  TRS-80 terminal emulation program, in assembly language 4—8798
  TRS-80C Color Computer directory menu, BASIC program 4—10589
  truck travel time in open pit mines, microcomputer simulation program CALCUL 4—10457
  turtle graphics for the BBC microcomputer program in BASIC 4—23679
  twin-trace scan for VIC 20, BASIC program 4—6485
  two-dimensional Delaunay triangulations, implementation of Watson's algorithm 4—23270
  universal monitor, programs in BASIC 4—23167
  UNIX to CP/M floppy disk file conversion in Z80 assembly language 4—9290
  Utility Bill Audit, household costs analysed, in BASIC 4—14759
  variance estimation using staggered, nested designs 4—9875
  VIC, game, U-boat, BASIC program 4—10544
  VIC, program variables lister, in BASIC 4—10540
  VIC 20 character design program in BASIC 4—6785
  Vic 20 output/input routines for binary part displays, stepping motor control 4—20520
  Vic BASIC, extending its command vocabulary 4—10559
  VIC BASIC expansion program 4—17833
  VIC Gridmania complete listing of game BASIC object code 4—10549
  VIC-20, character design, enlargement and display, BASIC programs 4—10542
  Vic-20 arcade game in BASIC, Sky Hop 4—10562
  Vic-20 BASIC expansion 4—10573
  Vic-20 Flying Saucer Attack in BASIC 4—3591
  VIC/64 clock, in BASIC 4—14766
  Vicman, version of Pacman for Vic 20 in machine code 4—23750
  video camera, Micro D-Cam computer interfaces and control software in BASIC and 6502 assembly language 4—4797
  video game for ZX81, BASIC program *(French)* 4—19390
  VisiCalc-based program for real estate investing 4—6072
  VLSI artwork verification, data structure and algorithm, programs in C 4—23464
  voice input robot control program, in Apple Integer BASIC 4—21187
  voice technology, state of the art in voice input and output, in BASIC and machine code, book 4—2258
  water corrosion and scaling treatment calculation program for the TI-59 4—6613
  wave-digital filters, pole displacement due to coefficient quantization 4—6517
  whole numbers conversion to string representations, coding 4—5873
  wide-band triple tuned circuits 4—14384
  wind chill calculation program in Basic 4—19413
  window program for Osborne (and other) computers 4—22599
  with HP41C programs 4—6506
  yam game program for ZX81, in BASIC *(French)* 4—6781
  yatzee game program for ZX81, in BASIC *(French)* 4—6781
  Z80 processor programming, assembler routines *(German)* 4—5123
  Z80 scheduler with task editing, in assembly language 4—13532
  Z 80 machine language, introduction, clear text for ZX 81, program listing in machine language *(German)* 4—13386
  ZR-81 GT compiler in machine code 4—2464
  ZX81, machine code version of Pac-Man 4—10556
  ZX 81 software for musical effects generation, program descriptions in BASIC *(German)* 4—14744
  ZX spectrum selected lines erasure program in BASIC *(German)* 4—23790

composite systems *see large-scale systems*

composition measurement *see chemical analysis*

compression, bandwidth *see bandwidth compression*

compressor-expandors *see compandors*

compressors
  air-to-water heat pump, control algorithms for systems operating with variable speed compressor 4—7750
  cavity resonance and noise reduction in a rotary compressor 4—20421
  centrifugal compressors, operation and control principles, book 4—4511
  computer aids in motor driven pump and compressor system analysis 4—14371
  group control for compressors *(Japanese)* 4—4510
  power input and storage devices 4—11592
  pressure control system, automatic, in pneumatic grid, stability analysis *(Russian)* 4—16175
  refrigerant liquids using alternative compressors, anal. of compression processes *(Italian)* 4—4508
  refrigeration compressors, economic control of energy consumption *(Italian)* 4—842
  refrigeration machines computerised control, in food processing plant 4—1112
  screw compressor unit, oil cooling *(Italian)* 4—4509

compressors continued
  turbocharger, airflow control system for improving transient response 4—16073
  turbochargers for diesel engines, CAD 4—14600

computability and decidability
  see also computational complexity
  algebraic relations and presentations 4—16681
  asymptotic form of decision tree sequence 4—8282
  conclusiveness, natural languages and the recognition of images, conclusiveness 4—15330

frequency changes ccts., using microprocessor based invertor controllers, thyristors *(Spanish)* 4—10291
frequency convertors, microprocessor controlled, design and operation *(Spanish)* 4—4475
frequency convertors, microprocessor-controlled, unrestricted type, operation and harmonic cancellation *(Spanish)* 4—11734
fully automated parcel sorting system *(German)* 4—20564
furnace for physics expts., microcomputer controlled 4—1316
gas dispatch control system specification 4—817
gas turbine microprocessor control system 4—4462
glutamic acid production, optimal control of fermentor *(Japanese)* 4—16358
grab cranes automation and control with PROWTIC DP800 programmable controller 4—16029
graph-schematic-algorithm design problems, computer-aided soln. *(Russian)* 4—17655
heart rate, canine, microcomputer control through chronotropic drug infusion 4—6380
heat treatment, robots appl. 4—11810
heating system, self-tuning control, microprocessor based, implementation 4—11659
heating systems, structural organisation of control complexes *(Russian)* 4—7745
home control network, Homenet 4—12231
HP77900A ultrasound controller for HP77020A ultrasound imaging system 4—12215
hump yard inventory control system 4—16424
HV impulse generators, electromagnetic interference effects on microprocessor based digital control system *(French)* 4—16149
HV/MV distribution station, computer-operated, implementation and checking methodology *(French)* 4—7819
HV/MV distribution stations automation, implementation of computers 4—7818
hybrids, thick film, computer controlled direct writing equipment, design and operation 4—1080

computerised control continued
hydraulic closed loop controls, use of 16-bit microcomputers *(German)* 4—15964
induction motor drive, microprocessor-controlled three-phase PWM invertor 4—7828
induction motor drive digital electric current control design *(Czech)* 4—20615
induction motor drives, vector control *(Japanese)* 4—887
induction motors, PWM-invertor-fed, digital speed control 4—923
industrial plants, optimal control of electrical demand within a sliding window billing structure 4—11760
industrial robot control using VIDEOMAT system for parts recognition and angular position calc. 4—16334
industrial robots, colour sensor *(Japanese)* 4—20498
industrial robots, learning controls, microcomputer based *(German)* 4—20023
industrial robots, SCEMI six axis flexible system with computerised control *(French)* 4—16336
industrial robots and their microcomputer controls 4—4619
insulin controller, CMOS microprocessor based 4—16606
intelligent drives, microprocessor appls. 4—962
intelligent graphic terminal, microprocessor control, multiprocessor system *(German)* 4—8904
interactive man-machine interface utilizing programmable controller based macroprocessor 4—13519
interactive robotics technology for the severely disabled 4—12234
interrupt control, design *(German)* 4—3416
invertor-fed AC motor speed control and invertor waveform harmonic analysis by microprocessor 4—7827
iRMX-86 real time operating system for operation in microprocessor system *(Swedish)* 4—9305
Kent-Enraf Microlect computer system for tank farm control 4—7979
laboratory controller, microprocessor-based, for neurophysiological appls. 4—15957
laser system, multichannel, optics alignment process control 4—8165
learning control systems using semicond. memory chips 4—17017
LEC crystal growth technique, computer controlled, appl. to GaP *(Japanese)* 4—1317
lines and data latching 4—3410
liquid crystal multiplexed/non-multiplexed displays, microprocessor control *(French)* 4—23567
LMAC, modular programming system for robotics *(French)* 4—20858
LMAC system for robot cooperation, synchronisation tools 4—6581
LMFBR components testing under thermal transients, data acquisition and control 4—10442
local communities heating management and energy economy by remote control *(French)* 4—16079
logical control systems for automated production, reliability *(French)* 4—23572
Logo used to direct a turtle through a maze 4—23802
luminescence spectrometer, study of time resolved emission of Eu^{3+}:Y_2O_3 4—21162
MACBASIC 3 enchancements, Booleans, 8-color plotter, 10 MB Winchester, buffers [MACSYM] 4—13390
machine manufacturing system with hydraulic components, intelligent multiprocessor system appl. *(German)* 4—1036
machine tools computer-controlled commissioning with Sinumerik System 8 4—1052
MACSYM 150 and 350, data acquisition information systems, menu-driven 4—14555
MACSYM measurement and control systems, multitasking 4—14554
MACTUS 600 integrated instrumentation and control systems *(Japanese)* 4—15939
magnetic bubble memory modules for microprocessor control systems *(German)* 4—8548
mass spectrometer automated control by distributed microprocessors 4—12186
measuring and testing stations, use of instruments from MGS 625 instrument family 4—16553
memory-programmed indicator, signalling and operational states *(Hungarian)* 4—7626
metallurgical heat treating furnace, computer aided multivariable control 4—4427
metallurgical industries, application software development for backed-up computers *(Czech)* 4—23547
MICROARM articulated robot arm, motion control *(Japanese)* 4—16287
microcomputer control of physical processes, temperature 4—23560
microcomputer controlled heat pump for shop air conditioning *(Japanese)* 4—11640
microcomputer interfacing using stepping motors 4—20514
microcomputer regulator, four-channel, synthetic perturbation supplementary circuit *(German)* 4—6578
microcomputer robot control 4—8188
microcomputer SDK-85 for position and velocity control system 4—4308
microcomputer-based substation control equipment 4—20592
microcomputer-based temp. control system, high accuracy, calorimeter appl. *(Chinese)* 4—20428
microcomputer-controlled automated spot welding lines for ralroad car construction 4—11898
microcomputer-controlled brushless motor without a shaft-mounted position sensor 4—4501
microcomputer-controlled devices for human implantation 4—8176
microcomputer-controlled lift system *(Croatian)* 4—8024
microcomputers appl. in monitoring instruments, data acquisition, anal. and control 4—8131
microelectronic systems for energy control and management, latest developments 4—18945
microelectronics assembly design, development and production with computerised control *(German)* 4—1061
microprocessor applications, book contrib. 4—5055
microprocessor control chip, R65F11, with Forth in ROM 4—16811
microprocessor control of a 2R-P-3R industrial robot 4—11919
microprocessor control of a robot arm step motor 4—66
microprocessor controlled space heating system *(German)* 4—4421
microprocessor controlled synthesized beat freq. oscillator 4—23435
microprocessor operated heat pump and electric central heating system *(German)* 4—4420
microprocessor-based control system, dynamic props. *(Polish)* 4—4525
microprocessor-based controller for pulse width modulated inverters, appl. in traction *(Hungarian)* 4—16116
microprocessor-based controller for temp. self-adaptive control 4—742

computerised control continued
microprocessor-based controllers 4−4345
microprocessor-based controllers for chemical industry *(Polish)* 4−1093
microprocessor-based digital controllers 4−4531
microprocessor-based engine and transmission control system 4−834
microprocessor-based heat pump controller for use in an air/water heat pump system *(German)* 4−4422
microprocessor-based high speed relay for overcurrent protection, algorithm *(Russian)* 4−20634
microprocessor-based induction motor controller for high torque position control 4−23577
microprocessor-based industrial controllers 4−4532
microprocessor-based mixed event programmable controllers, development system, universal compiler, CCDL 4−22540
microprocessor-based multipoint data recorder, Philips 8237A unit, features and IEEE interface facility *(French)* 4−12124
microprocessor-based pressure controller, ion-atom scattering expt. appl. 4−16584
microprocessor-based programmable temperature control system, design 4−709
microprocessor-based speed control systems for motor drives 4−4486
microprocessor-based trigger unit for high power converters *(Hungarian)* 4−16117
microprocessor-controlled nonlinear heating system for thermoluminescence studies 4−14170
microprocessor-controlled steerable array for metre-wave radio astronomy 4−1314
microprocessors optimize switch timings of heating and air conditioning installations 4−16082
microprogramming automation system for Kedr control microcomputer *(Russian)* 4−12516
microscopy, automation using image processing languages 4−21175
MIKRO-80 microprocessor system in metallurgy *(Polish)* 4−995
mine monitors, microcomputer-based environmental chamber controller 4−814
mining computer appl., conf., S Queensland, Australia, (May 1983) 4−6647

- remote data acquisition and control system with low-cost microcomputer 4—22164
- remote sensing photographic equipment system developed by VEB Carl Zeiss Jena 4—18883
- remote sensing photographic system FEAG digital photowrite and photoscan system 4—16521
- remote supervision system for power supply equipment in central offices 4—4818
- respiratory gas meas. system, computerised mass spectrometer and flowmeter 4—3155
- road transport velocity measurement, automatic meter calibration by microcomputer *(Russian)* 4—14679
- robotic displacement meas. device using linear voltage differential transducers 4—1241
- Rohde & Schwarz automatic test receiver ESVP for 20 to 1300 MHz 4—16544
- Rohde & Schwarz Signal Generator SMK for 10 Hz to 140 MHz 4—4821
- Rohde & Schwarz Signal Generator SMPC appl. 4—4823
- rotating field motors, microprocessor controlled test rig *(German)* 4—4460
- rotational behaviour meas. using inexpensive rotometer, biomedical appl. 4—1329
- routing protocol that maintains packet sequency [instrumentation applications] 4—22118
- Royco 218 portable particle counter automation implemented by a microprocessor system 4—14171
- ruggedised microcomputer-based systems to withstand harsh environments 4—1254
- scanning electron microscope, model for microcomputer conntrol 4—8166
- seawater parameters meas. using computerized suite of optical instruments 4—8150
- self checking, capacitance level limit switch with full function monitoring 4—1291
- SEM cathodoluminescence mode detection system, computer controlled, appl. to semicond. study 4—16593
- semiconductor electrophysical properties meas. using computing complex AMTS 1533 *(Russian)* 4—16549
- semiconductor manufacture, computer controlled mass spectrometry for gas purity assurance 4—3269
- sensors for microprocessor-based applications 4—767
- sensors for personal computers 4—23391
- SINDRUM detector, FAST-BUS trigger processor for $e^+e^-e^+$ events 4—8153
- single-board solution to distributed measurement and control, μMAC 5000 4—15932
- Skoda mobile measuring system for industrial plant meas. 4—1242
- SKYMNK-02 array processor appl., programming method 4—12204
- SM-3 minicomputer application in structural mechanics *(Polish)* 4—3309
- software development 4—1288
- software reliability control in scientific instruments 4—1243
- sonic elastic moduli and internal friction meas., microcomputer-controlled device 4—8163
- sound absorption in gases meas., using Apple II microcomputer 4—18832
- Spacelab computer-controlled particle beam expts. *(Norwegian)* 4—8167
- spectral analysis using microcomputers 4—21182
- speed meas. system using microprocessor 4—7594
- spike processing at low cost, microcomputer based system 4—3168
- static and fatigue full-scale tests, desktop computer appls. 4—8172

computerised instrumentation continued
steam turbine efficiency, experimental checking by varying the main parameters 4—3250
stereoscopic digitising plotting system for cartography 4—14246
storage oscilloscope, using a TRS-80 Color Computer and an analogue-digital converter 4—23294
storm water overflow chamber, microcomputer controlled laboratory tests 4—7713
strain gauges, computerised techniques 4—7659
strain gauges direct meas., without signal conditioning 4—4809
stress meas. system, for thin-walled framed structures *(German)* 4—3435
surface science microscopy, interfacing and computer control 4—23226
surveying instrument, portable, microprocessor-controlled, design and operation 4—16592
tachycardia treatment microcomputer-based system to evaluate cardiac pacing 4—9975
tactile sensor with decentralised signal conditioning, industrial robots appl. 4—770
tape recorder recoiled tape measurement, microprocessor system *(Bulgarian)* 4—21062
TASK industrial analog measuring system with computerised data collecting process control *(Hungarian)* 4—2134
temperature meas. using microprocessor-based, resistance thermometer 4—1292
temperature measurement, SAB 80215 microcomputer chip and Si sensors 4—1275
test instrumentation fundamentals, for aerospace appl., conf., Albuquerque, NM, USA (May 1983) 4—8147
test/measurement equipment advances 4—21085
TGA/FTIR interface to computer 4—8698
thermocouple linearisation using microprocessor-based instrument *(Russian)* 4—7664
thermocouple temperature meter, single-channel, μP-based 4—12130
thermonuclear fusion expts., automatic diagnostic system for strong shock waves 4—18820
thick film sensors and their integration 4—776
titration automation, using Sinclair ZX81 4—12179
TLD readers electronic design 4—16594
torsion pendulum, internal friction meas. using microcomputer *(French)* 4—16577
trade weighing and measuring equipment, control of intelligence 4—21069
transducer interfaces and computerised measurement 4—21855
transmission network maintenance work, operating systems appl. 4—4817
transverters active power meas., real-time *(German)* 4—11732
Traster stereo satellite terminal for measuring 3D objects, microprocessor-based system 4—2189
Trio CS-1720 programmable oscilloscope *(German)* 4—12140
TRS-80 for real-time control, book 4—727
two-wire interface bus for automation of experiments 4—12875
UART-based circuit translates BCD for RS-232-C 4—21886
ULTRAMAT 21 and 22 microprocessor-based gas analysers for standard applications 4—16587
ultrasonic imaging system, mechanically scanned, Forth based software for real time control 4—12177
ultrasonics in level meas. and control, Challenger One system 4—15918
US time delay meas. system using EM acoustic transducers 4—4849
validating analyzer data: an approach to on-line process performance evaluation 4—14638
Video Noise Meter UPSF 2 for noise and chroma-noise measurement 4—4825
vision system, Saab EVS 300, computer-controlled meas. and inspection, automated production appl. 4—17443
VLSI architecture for a virtual instrumentation based laboratory waveform generator 4—23506
VLSI test system, MegaOne 4—8114
voice I/O for scientific instruments 4—13187
waveform recorder-computer combination for moulded case circuit breaker testing 4—12138
Wavetek, instrument computers, signal generators and function generators *(Italian)* 4—8119
weighing systems, industrial, microprocessor controlled 4—16533
wide-range precision speed measurement with adaptive optimization using a microcomputer 4—12135
X-ray powder diffractometry, computer aided search/match system 4—21167
X-ray stress/strain distribution meter, two dimensional, computer controlled 4—8155
Al conductor steel-reinforced cable testing machine 4—6477
Pt resistance thermometry, microcomputer-based instrument 4—1265
Si, dislocations, deformation-induced, computerised EBIC contrast meas. 4—10164

computerised manufacturing control *see manufacturing computer control*

computerised materials handling

flexible manufacturing system technology, advantages and limitations 4—11868
flexible manufacturing systems, concepts and goals 4—20868
flexible manufacturing systems, selection and procurement guidelines 4—16340
flexible manufacturing techniques, turning, gauging, grinding in one cell 4—16293
fully automated parcel sorting system *(German)* 4—20564
General Electric locomotive plant FMS 4—11879
goods handling equipment, higher usage parameters through programmable control *(German)* 4—4403
grab cranes automation and control with PROWTIC DP800 programmable controller 4—16029
grocery warehouse automated handling requirements 4—11619
guided vehicle systems 4—7717
handling and quality assurance system HQS *(German)* 4—4579
hybrid IC assembly, automated materials handling system 4—11613
IBM's new distribution centre employing unit load and mini-load AS/R systems 4—20548
industrial vehicles, resolved motion rate control 4—4402
integrated material flow with mobile data communication *(German)* 4—7734
liquid process control and work transporter system 4—4676
machining, flexible production system appl. *(German)* 4—7964
mail sorting installations for Danish Postal and Telegraphic Administration *(Danish)* 4—829
manufacturing engineering companies, integrated computer supported production systems *(Swedish)* 4—4612
material flow process controllers, connection of microcomputers *(German)* 4—4529
materials management system with real time data processing, Japanese SIZAE system *(Japanese)* 4—22923
metalworking, flexibility and automation *(German)* 4—7968
microcomputer systems in piece goods conveying and storage systems, experiences and problems *(German)* 4—7737
microcomputer-based net change material requirements planning system, design 4—22926
microprocessor-based controllers for fork lift trucks 4—823
miniloads and carousels appl. 4—16049
multilayer circuit boards, fully automatic presses with peripheral and transport system *(German)* 4—11842
optimising, robot productivity, industrial engineer's role 4—1028
orderpicking system used on racks and carousels 4—11618
organic pigments handling system for container filling *(German)* 4—7716
overhead conveyor and pick and place robots in flexible automation 4—16048
overhead conveyors, microcomputer-based control *(Russian)* 4—7720
paper mill integrated operation management and control system 4—4667
PCBs, chip component placement machine using microcomputer *(French)* 4—20558
PCBs, loaded, handling system for unattended automatic testing *(German)* 4—11627
Pegard FMS for chassis machining 4—11876
plant layout, product oriented, cellular, just in time, product concept 4—11851
plastics processing, bulk materials flow control by monitoring *(German)* 4—11946
production scheduling and material requirement planning with inventory management system 4—6151
PROGENI Tally-Jet system for automated carton dispatch 4—11608
programmable controllers, criteria and guidelines 4—7730
PWB, computerised manufacture and testing, automated handling requirements 4—20832
reliability of microcomputer-based control systems, improvement *(Russian)* 4—16304
robot tactile sensing, book contrib. 4—21196
robotic vehicles, manufacturing applications 4—1030
rolling mill production control with computer-controlled grip manipulators 4—7876
seaport, automated equipment *(German)* 4—16030
sheet metalworking, flexible production cells and systems appl. *(German)* 4—16346
storage systems automation 4—16047
textile industry, computer controlled warehouse and distribution system, optimal communication between stages *(German)* 4—11962
transport system selection for flexible manufacturing 4—7942
turbine blade image processing/robot vision system 4—4405
two-sided multi-operation lathe centres 4—16245
unmanned lift trucks, computer controlled, future in automated factories 4—11611
vertical carousels for small parts storage and protection 4—11621
vision systems, for use with ASEA robots 4—16236

computerised materials handling continued

- Volvo's computerised line system for 24-hour production *(Swedish)* 4—4613
- warehouse material handling systems, developments 4—16064
- welded-frame random loading of flexible manufacturing system 4—7919
- whisky production automated at Hiram Walker 4—20906
- X-ray fluoroscopy inspection system 4—16531
- Yamazaki's machine tool plant, Japan's showcase flexible factory 4—20782
- yarn reel handling by robot in textile industry *(German)* 4—16367
- U, low-enriched scrap assay using end-crop box counter 4—19187

computerised monitoring

- 1300 MW nuclear power stations centralised data processing *(French)* 4—11672
- 8039 microprocessor-based monitor for motor operating conditions in mines 4—1250
- ABROS automatic performance accounting for an operating system *(German)* 4—7060
- Acurex Netpac monitor function and applications *(Swedish)* 4—6571
- advanced foetal monitoring system, report 4—6387
- alarm monitoring and reporting systems in a distributed control environment 4—4467
- application of the computer program COOLING to the ELIN DC machine series *(German)* 4—18941
- applying microcomputers to highway lighting management 4—4474
- Arrhycomp arrhythmia monitor, appl. *(Dutch)* 4—4861
- arrhythmia monitor, portable, microcomputer-based: design, implementation and evaluation 4—18862
- AS220E automation subsystem for use in power plant control, design and features 4—16160
- AS230 automation subsystem in industrial, district heating and refuse incineration power plants 4—16083
- Atlantic Electric System control center 4—11700
- automated monitoring and control of power consumption in iron and steel industry *(Russian)* 4—11798
- automated supervisory system in new cruise liner 4—1143
- automatic washing machine microprocessor controlled ATE, high level test language design 4—12171
- automation technology, development trends 4—7860
- automobile five-speed mechanical drive transmission, microprocessor controller, data logging 4—16084
- automobile speech synthesis systems 4—23813
- Bearcat CompuScan/2100 scanning receiver linked to Commodore-64 computer 4—19064
- blast furnace process automation and monitoring techniques *(German)* 4—20738
- blood utilisation, computer monitoring 4—2850
- blooming mills, automatic materials audit system *(Russian)* 4—18446
- borehole portable level and temp. monitor with data compression and error correction 4—12202
- breath-to-breath occlusion pressure and ventilatory parameters, automatic monitoring system 4—14217
- building access control system with Alarm monitoring 4—12223
- bulk-HVDC power transmission system high reliability control/protection system 4—913
- bus monitor chip for digital system built-in testing 4—8402
- BWR core performance monitoring and predicting systems 4—14661
- CAD/CAM systems, introduction process experiences *(German)* 4—7962
- CNC systems security aspects *(German)* 4—4601
- colour graphic system for monitoring and control of hydraulic plant 4—16015
- combustible gases, digital monitoring 4—14635
- communication networks, CIT-Alcatel's centralized maintenance 4—3367
- commutatorless motor drives microprocessor-controlled speed regulator 4—943
- computer system activity display using service processor 4—1906
- computer-based universal monitoring system 4—1144
- computerised reporting systems for plant maintenance 4—6643
- cotside microcomputer monitoring system for use in the neonatal intensive care unit 4—9956
- data communication linkage monitor for system using SNA/SDLC 4—2009
- decentralised systems, distributed microprocessor approach to industrial monitoring and control *(French)* 4—7852
- development of an operational computer-based flood forecasting and warning system 4—10344
- diesel engines, real-time signal processing of measurements, data collection and monitoring *(German)* 4—6546
- Digistrip IV and Digi-link IV process monitor/control systems 4—717
- digital equipment produced EMI, automatic measuring equipment *(Danish)* 4—21077
- display and use of historical data within the nuclear plant 4—6475
- display cursor location, direct extraction from display, monitoring by microprocessor system 4—2181
- display refresh buffer, direct data extraction, microprocessor command 4—2182
- distributed event monitoring system, microcomputer-based system, shielded cable 4—21153
- Dortmund overhead tram system, motor comparison *(German)* 4—4687
- economical motor protection using microcomputer technology 4—14372
- electric drive rotation speed digital meas. using microcomputer *(German)* 4—23345
- electrostatic precipitator monitoring and control microcomputer system 4—7843
- energy management, computer-based systems in industry, guidance 4—23318
- environmental chamber complex control and monitoring by microcomputer 4—7757
- evolutionary concepts in electric heat tracing for the Great Plains Synthetic Fuels Project, microprocessor equipment specification 4—14373
- extrusion blow moulding processes, monitoring by microcomputer *(German)* 4—4663
- eye movement monitoring, image processing algorithms 4—8113
- F-16 aircraft ATE centralised data collection system 4—22163
- fail-safe power supply unit technology, development and marketing *(Italian)* 4—21487
- flexible manufacturing system hardware components, interfaces and programs 4—16333
- force shoe data acquisition system 4—10027

computerised monitoring continued

- gas leaks, accident countermeasure system, microcomputer-based sensing and control system *(Japanese)* 4—12116
- gas turbines, microprocessor-based digital control and monitoring systems 4—839
- graphics dialogue systems monitoring tools and techniques 4—10740
- Gulf States Utilities Power System monitoring and control implementation 4—11697
- gun drilling process automation *(German)* 4—4610
- hardware monitors, high-speed attachment for data collection, IBM Series/1 4—1907
- harnessing microcomputer power for the plant monitoring and control market 4—4456
- hospital boiler efficiency monitor design, construction and programming 4—4429
- IC manufacture, computerised real-time process control and monitoring system 4—11820
- IEC-bus controlled test set up for VDE/CISPR interference meas. *(German)* 4—12163
- industrial control networks, Z8 microprocessors connected by telephone pair *(French)* 4—973
- information model for studying fault conditions in computerised 6-20 kV distribution networks *(Russian)* 4—16131
- Intelligent Protection Device for motors and plant 4—7678
- interactive computer system for materials inspection, optimum sampling plans determ. *(German)* 4—6644
- IPC 620 programmable controller system 4—4562
- LAVET motor characts., automatic measuring device *(French)* 4—14327
- LED alphanumerical seven-segment displays, computer-aided test method *(German)* 4—14479
- log generation, process computers for measurement processing 4—16353
- machine tool diagnosis and monitoring during production and installation *(German)* 4—4615
- maintenance processors for mainframe computers 4—21831
- MELSENTRY remote-monitoring system for buildings *(Japanese)* 4—20512
- metallurgical plants, power monitor subsystem within a technology-management automated control system *(Russian)* 4—4536
- Mic Robot X-10 domestic robot monitor, used for controlling electrical appliances *(German)* 4—3632
- micro computers and condition monitoring: plant maintenance of the future 4—3468
- microcomputer control of physical processes, temperature 4—23560
- microelectronic systems for energy control and management, latest developments 4—18945
- microprocessor controlled space heating system *(German)* 4—4421
- microprocessor operated heat pump and electric central heating system *(German)* 4—4420
- microprocessor self-testing for mine monitor systems 4—813
- microprocessor-based algorithm for high resistance earth fault distance protection 4—6459
- microprocessor-based high speed relay for overcurrent protection, algorithm *(Russian)* 4—20634
- microprocessors optimize switch timings of heating and air conditioning installations 4—16082
- microwave network surveillance and control system, trans-Canada 4—1221
- mine monitors, microcomputer-based environmental chamber controller 4—814
- miniaturised measurement and test system, MMP, microprocessor based universal appl. *(German)* 4—12162
- mining industry technical conference, Houghton, MI, USA (1983) 4—812
- multiprocessor-based distance relay: design features and test results 4—23366
- network-based direct digital control 4—716
- new computer based flux restrained current differential relay for power transformer protection 4—23367
- new quadrilateral distance relay using microprocessor 4—4377
- newborn intensive care monitoring system 4—14227
- oil-fired central heating systems, polluguard automatic monitoring device *(German)* 4—20572
- oil/gas pipelines and supply networks monitoring using SINAUT LS2 centralised control system 4—16022
- paper machines, sectional control, microprocessor based system for regulation and monitoring *(French)* 4—16371
- personal computers appl., evaluation 4—19810
- plastics processing, bulk materials flow control by monitoring *(German)* 4—11946
- pollution control, low-cost environment monitor, 16 remote stations *(Spanish)* 4—20537
- power generation and transmission operation coordination, New England Power Exchange pool control center USA 4—20675
- power network parameter monitoring, programmable front-end 4—23373
- power plant TELEPERM M system OS254E operator-process communication and monitoring subsystem 4—16163
- power system real-time reactive monitoring for security 4—11707
- process control operator interface systems design requirements 4—16178
- process monitoring, microcomputer appl. 4—4514
- process monitoring and control, A/D and D/A converters appl. 4—968
- production automation, monitoring systems *(Russian)* 4—8127
- program-controlled monitoring stations in the communications instrumentation field 4—16488
- radiation monitoring, digital system using a personal computer *(Japanese)* 4—23252
- radio reception stations, microprocessor based, 10 kHz to 1000 MHz, receiver classes *(German)* 4—1222
- radioisotope measurement, P-8080 microcomputer based devices *(Polish)* 4—1298
- rail network simulation and control, 3D colour graphics system 4—16430
- raster-scan CRT monitor evaluation criteria 4—5543
- real time sputter deposition monitoring using glow discharge mass spectroscopy 4—12201
- real time systems with separate processor 4—19116
- remote traffic tracking using automatic monitoring system 4—1130
- respiratory variables monitoring during sleep 4—9971
- review 4—1246
- rotary machining, computer-aided quality assurance *(German)* 4—4617
- rotating machinery data acquisition and diagnostic information systems, impact of microprocessors 4—6594
- secretarial branch exchange, PABX enhancement by program-controlled communication monitoring 4—8066
- steam-turbine generators, online monitoring and availability 4—6461

computerised monitoring continued

steel wire production plants, integrated sales/production system 4—4547
STINA-system for computerised monitoring of Sweden's coastline *(Swedish)* 4—8087
structured rotating machinery information system 4—9683
supertanker mooring monitoring system *(German)* 4—12009
synchronous generator, real time torque angle, hardware and software for power stations 4—14354
TELEPERM M process control system OS252 operator communication and monitoring subsystem 4—16202
temperature measurement means, automatic measurement and checking 4—3143
test stations, telemetry system appl. 4—16525
three-phase power protection device for commercial ATE 4—21148
tractor performance monitor with microcomputer data acquisition 4—14683
traffic monitoring in Sydney metropolitan area, use of computer graphics 4—16419
transmission lines, digital distance protection, based on 6809 microprocessor *(Dutch)* 4—10098
TV camera monitoring system, microcomputer processing of picture information, appls. *(Danish)* 4—11773
universal monitor 4—23167
use of a microcomputer for stabilizing three-phase synchronous motors *(German)* 4—7784
vehicle monitoring system for taxi fleet management 4—1129
vision system for industrial appls. 4—1020
white sugar refining process, computer control 4—11978
workstations with visual displays in process monitoring, ergonomics *(German)* 4—20450

computerised navigation

aircraft laser-gyro-based navigation aid 4—4704
aircraft map display using SR-128 speech recogniser 4—5643
astronomical navigation principles and BASIC program for position finding *(French)* 4—18896
automobile urban navigation system, using stored memory location coordinates *(German)* 4—8013
autonomous navigation for high altitude satellites 4—16465
celestial navigation, use of calculators computers and almanacs 4—14677
dynamic positioning with optimal control, Japanese MES system *(Japanese)* 4—20951
flight management computers, trends *(French)* 4—1154
harbour navigation traffic control system *(Japanese)* 4—20953
HICANS navigation system for high speed ships 4—16435
MANAV integrated navigation system for giant tankers *(French)* 4—1146
marine systems, computerised navigation, techniques and improvements 4—14676
robot perceptual system design 4—22165
ship instrumentation, appl. and characts. of portable personal computers/calculators 4—14678
Space Shuttle, digital autopilot for thrust vector control of orbital manoeuvring system 4—16449
Space Shuttle, minimum impulse limit cycle design to compensate for measurement uncertainties 4—16448
Space Shuttle entry guidance performance results 4—16450
Space Shuttle Orbiter approach and landing analyses 4—16451
Space Shuttle Orbiter stellar-inertial reference system 4—16447
Space Shuttle powered-ascent flight phase, guidance, navigation and control 4—16446

computerised numerical control

3D measuring machine in computer-aided production planning *(German)* 4—19133
abrasive machining, benefits 4—4582
advances in CAD/CAM, conf., Leningrad, USSR (May 1982) 4—4620
AUTAP NC STANZEN pressing and nibbling machines *(German)* 4—19092
automatic mill routing from solid geometry information 4—11922
automatic turning machine with numerical control *(German)* 4—16313
automobile industry, QC using automatic multicoordinate meas. machine 4—1067
AUTOTECH-NCM/ESER CNC programming system *(German)* 4—4570
balancing machines, digital, vertical/horizontal/NC correction types, computerised control and calibration *(Japanese)* 4—4848
CNC end-section machining as a complex task *(German)* 4—20817
CNC lathes, three-axis, for milling and drilling, trends 4—20780
CNC machines with manual operations, in manufacturing cell 4—20809
computer aided determination of the behavior of flexible work-piece handling systems *(German)* 4—20826
computer-aided NC programming trends in USA. 4—20811
computer-controlled factory reduces its stock *(German)* 4—20819
computers for factory applications, current trends 4—20705
coordinate measuring machines contribution 4—1015
craftsman robot, appls. 4—7850
desk computer NC tool design *(Hungarian)* 4—19091
distributed control, National Bureau of Standards, research into automation using Forth 4—10289
DNC/CNC—a way to improve quality and reliability in NC machining 4—20877
drilling machine, trends 4—20793
Editor function for data input, based on MPCS concept *(German)* 4—5784
efficient use of NC machine tools *(Russian)* 4—7923
electric discharge machine programming 4—4602
electrohydraulic linear amplifier for linear axis drives on CNC machines *(German)* 4—7701
EXAPT: NC programming of curved surfaces *(German)* 4—19093
EXAPT NC programming system—Ausburg manufacturer *(German)* 4—16279
F-16 military aircraft, manufacturing methods 4—16341
factory automation computer systems, Mitsubishi Factory Land *(Japanese)* 4—16286
fault diagnosis by telephone *(German)* 4—11908
flexible automated production system for the complete machining of precision turned parts *(German)* 4—20814
flexible grinding system using CNC continuous-path profiling 4—1057
flexible manufacturing systems, computer controlled machine tools *(German)* 4—20822
flexible manufacturing systems—information flow and control components 4—1051

computerised numerical control continued

flexible manufacturing techniques, turning, gauging, grinding in one cell 4—16293
gear cutting machines, development trends *(German)* 4—7966
GOBI—a system for geometric computations *(Polish)* 4—19094
graphical geometric modeller for NC machining 4—4652
hardware and software developments *(German)* 4—13843
industrial robot utilisation with CNC turning machines *(German)* 4—11838
industrial robots, interactive programming via graphic processing *(German)* 4—6590
industrial robots control systems development *(Slovak)* 4—16229
KAD P CAD/CAM system for prototype development *(German)* 4—10305
knee-type milling machine with slide-mounted tool head 4—16248
laser, advantages 4—20808
laser beam, precision hole-cutting tool 4—16292
machine control, comparison of numerical controllers and programmable controllers 4—20474
machine tool trend towards AC servomotors 4—7939
machine tools, adaptive control, distributed CNC system *(Rumanian)* 4—7880
machine tools, manpower training and skill polarisation 4—20882
machine tools, numerically-controlled, programming, with System P-G 4—1053
machine tools, selection using systems approach based on key machined components 4—11833
machine tools, training of skilled workmen *(German)* 4—19464
machine tools, universal programming system for computerised numerical control *(German)* 4—20807
machine tools control *(German)* 4—11688
machine tools numerical control using microcomputer-based robots *(German)* 4—16332
machinery investment justification 4—7971
machining cell, ideal for small parts, manned by robots 4—1059
machining centres, main types and features 4—16302
machining complex jobs, CAM-NC as soln. 4—11817
method of design for a microprocessor-based numerical control machine—with an example 4—1026
microprocessor-based automatic programming CNC for machining centre 4—20878
microprocessor-based programmable logic controller for honing machines 4—20781
microprocessor-programmed NC machines, information-linguistic model of software organisation *(Russian)* 4—7950
milling, compensation for surface errors due to tool deflection *(Japanese)* 4—16326
milling computer for rational tool construction *(German)* 4—20805
mining machinery production with CNC machine tools and automated handling 4—11616
modular high-throughput for flexible manufacturing systems 4—20876
multi-spindle automatic lathes, contamination-tolerant control hydraulics *(German)* 4—7760
multiple-slide lathes continuous path control by Sinumerik 3TT system 4—1048
NC machine tools, computer-assisted programming 4—1014
NC machine tools status and development trends in CNC controls and servo actuators *(German)* 4—11913
NS 720 continuous control system for machining centre *(Czech)* 4—11805
Numericon 880-CNC high-level language 4—22484
octree encoding for computer-integrated manufacturing of surfaces 4—20749
PCB drilling, specialized machine tool, CNC system 4—20912
pipe welding process mechanised with CNC *(German)* 4—11861
planning aids for introducing EDP and NC technologies into small businesses *(German)* 4—18463
portable desktop automatic NC programming system, design *(Japanese)* 4—16257
precision drilling machine, six-spindle *(German)* 4—20818
production database for selecting key machined components 4—14598
programming numerically controlled multi-machine systems *(German)* 4—23564
robotic NC painting system for motor car bodies 4—4604
rotation with four controlled axes, Gildemeister, Carlowitz *(German)* 4—7906
sawing machinery, latest technology compared and discussed 4—11878
security aspects of modern CNC systems *(German)* 4—4601
software structure of NC machines *(Russian)* 4—10294
spark erosion machines using POLI-SPARK numerical control unit *(Spanish)* 4—16301
stampings, prototype production by laser beam 4—7944
three-axis CNC turning/milling centre versatility 4—7941
tooling systems of fully automatic lathes *(Hungarian)* 4—11882
training machines, 5 CNC lathe and CNC932 drill 4—14800
turning attachment for manual lathes 4—11871
turning machines, programmable NC equipment *(Japanese)* 4—4589
two-sided multi-operation lathe centres 4—16245
unmanned machining cell quality control system 4—11927
vacuum pump 4—1004
vacuum pump manufacture, increased throughput using CNC 4—1003
videocontrol device using NC for camera *(Bulgarian)* 4—4517
Wadkins machining centres, design for economic manufacture 4—20758
work planning system *(German)* 4—16349
workpiece measurement and tool control in CNC production *(German)* 4—16312

computerised pattern recognition

3-D real object, spatial data acquisition 4—14499
applications, conf., Geneva, Switzerland (April 1983) 4—19056
asparagus picking by robot, automatic recognition of moving objects appl. 4—14496
attributed languages, adaptive error-correcting parsing for pattern recognition 4—21278
automated spectral classification in astronomy 4—6416
automatic pattern extraction and collection applied to radar derived rain maps 4—23261
automatic recognition and interpretation of sketches and drawings, review *(Japanese)* 4—13085
automatic spectral classification as pattern recognition problem *(French)* 4—6419
binary image anal. techniques, appls. 4—14495

computerised pattern recognition continued
binary image processor, preprocessor in computer vision system 4—8874
cast metals, surface defect inspection system 4—20038
chemical compounds, structure-property relationships, pattern recognition 4—6359
chromosomes, human, appl. of C-matrix for shape recognition 4—6393
cluster anal. and data anal. in FORTRAN, book 4—4001
clustering, VLSI systolic architecture 4—12530
color recognition system for automation engineering 4—16552
colour image segmentation using convexity criterion, iterative process 4—14490
colour recognition, linear discriminant direct optical computation 4—20060
component board inspection, model based, computer vision system 4—14456
computer architecture for pattern anal. and image database management, conf., Pasadena, CA, USA (Oct. 1983) 4—13093
computer vision, review *(French)* 4—12579
computer vision and pattern recognition, conf., Arlington, VA, USA (June 1983) 4—4007
computer vision for industrial applications 4—8866
connected spoken digit recognition by O(n) DP matching *(Japanese)* 4—17584
CONSULT-I$^{(R)}$, training as expert system 4—9991
contour separation of computer graphic images by automatic graphical transformation *(Polish)* 4—16966
contour texture modelling for image data compression 4—19062
coordinate transformation, invariant feature extraction, bionic eye appl. 4—7288
curvilinear feature extraction and approximations 4—19060
defect detection in mass production lines, using computerised vision systems 4—987
defect location clustering schemes 4—15368
diagnostics using pattern recognition *(French)* 4—6434
digitiser, using multicolour drawings recognition method for LSI cell drawings 4—10194
digitising error of geometric features in a digital vision system 4—11091
distortion invariant recognition using moment feature space 4—5532
distributed active sensory processor system 4—5529
document handling system 4—5533
document input to computers 4—9483
drawing reader with high-speed hierarchical processors 4—10086
dynamic time warp pattern matching using an integrated multiprocessing array 4—12583
Earley's parallel recognition algorithm, VLSI architectures 4—8456
ECG anal. using body surface potential images 4—14207
EEG sequential time series segmentation algorithms, comparative study 4—23253
electron-optical and digital image processing, computer system architecture *(Russian)* 4—10259
elliptic cross-section, recognition, X-ray images of agricultural images 4—14787
EPL-based VLSI architecture 4—12522
fast-moving objects location in TV-images in presence of motion blur 4—14502
feature based US inspection system, reflector classification analysis, pattern recognition 4—23605
filtering in artificial intelligence *(French)* 4—23800
GAGESIGHT: a computer vision system for automatic inspection of instrument gages 4—11778
galaxies morphological type determ., automatic structural pattern recognition method *(French)* 4—23277
generating object descriptions for model retrieval 4—8869
handwriting reader 4—8871
hierarchical image processing 4—14500
histopathology, pattern recognition by orders of textures 4—23250
hot rolling of steel strips, on-line shape recognition system, using high-speed image processing techniques 4—20746
hybrid optical-digital image processing system for pattern recognition 4—2136
IC defect location, image processing of SEM micrographs 4—3274
IC fabrication, automatic wafer inspection system 4—23393
image database systems, survey 4—13089
image enhancement, edge detection and smoothing, techniques 4—3997
image sequence analysis of real world human motion 4—11112
image target tracking simulation, in disturbed environment 4—5190
image thresholding for OCR and other appls. 4—20045
Indian characters recognition, computer-aided determ. of nearly optimal dot matrix display 4—17441
industrial part recognition program, parallelisation 4—14633
industrial robots, machine vision systems, camera, illumination and process applications, human vision comparison 4—14278
industrial robots for picture recognition *(Dutch)* 4—14667
industrial vision system, meas./inspection appl. 4—1068
industrial vision systems, conf., NC, USA (May 1982) 4—11862
inspection system for hot steel slabs 4—11796
inspection system for PCBs 4—14447
INSPECTOR: a computer vision system that learns to inspect parts 4—11863
integral fluctuation method of image recognition *(Russian)* 4—13084
integrated pattern-recognition system for automated wire bonding 4—13086
intelligent vehicle, artificial eye, obstacle recognition method *(Japanese)* 4—8014
invariant numerical shape modeling 4—4035
laser time-of-flight range scanner for robotic vision 4—8870
line drawings, mathematical structures 4—20058
linear discriminant function classifier, VLSI architectures 4—12594
logic circuit diagram understanding algorithm 4—14455
LSI photomask pattern visual inspection, automation by comparing extracted local features *(Japanese)* 4—19023
machine vision systems, commercial 4—17439
MACSYM image processing system, hierarchical parallel-processing, for pattern understanding 4—13090
map-guided image anal., aerial features recognition 4—18878
mapping techniques 4—7257
materials testing and quality control, by microstructure analysis 4—3472
mechanical parts, location and orientation detection, Hough technique use 4—14595
memory management, distributed system for PASM 4—12600
microscopy, automation using image processing languages 4—21175

computerised pattern recognition continued
minimum-distance classification, VLSI architecture 4—21600
moving objects, digital processing technique for recognition and tracking 4—5189
moving objects recognition, nonlinear digital image processing techniques appl. 4—15359
moving organs, digital coding of images 4—14204
multicluster approach to computer vision 4—12527
multilayer thick film circuits, automatic high speed visual inspection system 4—14391
multisensor integration and data acquisition system 4—4326
OCR, document reading processor-based OCR system 4—20044
OLREC, visual pattern recognition system 4—13088
Opt Vision VS-6502A pattern recognition system, inspection and OCR appl. *(Japanese)* 4—5181
optical pattern recognition system, PanaDac-800 series, features and assembly appl. *(Japanese)* 4—5180
overlapping bar-like patterns, separation by iterative method 4—4027
paper research, image anal. at STFI 4—2145
papermaking, grey-tone evenness evaluation using band-pass filtering on video-scanning analyser 4—2144
parallel algorithms for computer vision 4—12588
PCB inspection using Teknispec automated vision system 4—3281
petrography, image analysis 4—10047
PIPS, pattern information processing system 4—5527
polyethylene cable insulation breakdown phenomena, computerized image anal. 4—10124
powder diffraction pattern peak identification, second derivative algorithm 4—21168
powder diffractometer, qualitative phase anal., search/match/identify program 4—21169
PPI-II programmable high-speed image processor, flexible real-time eye for industrial robots 4—20730
preperceptual processing of form, computer simulation 4—19057
probability-based scoring technique for phase identification in X-ray powder diffraction 4—21170
programmable diagnostic candidate select 4—8868
pulmonary nodule evaluation system, design, function and performance evaluation 4—10032
real-time product characterization by fault modeling and pattern recognitions 4—23442
recognition memory, for database management and pattern recognition 4—12694
reconfigurable VLSI arrays for pattern analysis and image processing 4—12531
region matching in pyramids 4—12590
relaxation labeling using modular operators 4—14489
robot control M system sensor signals processing 4—1050
robot perceptual system design 4—22165
robot vision, 3D system *(German)* 4—16961
robot vision by optimal contour sensor with associative memory 4—11891
robot vision for location determination and obstacle avoidance 4—12244
robot vision system identifies components in assembly process 4—16290
robot vision system matching algorithm 4—7977
robot vision system with multiprocessor architecture, real-time speeds 4—13080
robot vision systems, real-time, using fast hardware and image-processing techniques 4—10284
robotic vision, distributed system for symbolic computation 4—5843
robotics vision based on local detectors 4—11119
robots, second generation, vision systems, book contrib. 4—20828
rotation invariant texture classification using circular random field models 4—4036
row-by-row dynamic image analysis of a matrix of scanned points 4—20043
satellite images, rain cell classification for rainfall estimation 4—6413
seam tracking robots appl. 4—7912
segmentation of images, minimum spanning trees appl. 4—14491
sensor-based robotic systems, language extension 4—22529
signature analysis of microprocessor-based circuits *(Polish)* 4—2141
sintered carbide inserts visual inspection, electro-optical computerised system 4—14670
speech-recognition dynamic programming-based matching LSI 4—5658
steel surface inspection, using online image processing 4—997
stereoscopic depth perception for robot vision 4—21675
surface normals, determined by radiometry, error analysis 4—11093
surveillance system for nuclear reactors based on sequential pattern recognition methods 4—3463
symbolic differences used to organize relational models 4—5956
syntactic-semantic automation appl. 4—7256
system construction *(Japanese)* 4—13091
systolic VLSI matrix for a family of fundamental searching problems 4—21438
tactile matrix for shape recognition 4—2143
textile webs inspection, principal component anal. appl. 4—14668
texture analysis using two-dimensional quadrature filters 4—12592
theory of learning expansion *(Japanese)* 4—11101
three-dimensional motion anal. in blocks world 4—11111
tomography, translation-invariant transformation for reproducible 2D patterns recognition 4—15408
turbine blades image processing system 4—14497
TV image processing system for real-time meas. of pedestrian flow *(Japanese)* 4—10264
underwater acoustics, pattern recognition processing appl. 4—11142
user-oriented language for image processing and object recognition, LIVIA 4—13437
V-1000 Control Automation computer vision system, production environment, robotic visual assists 4—20729
VIDEOMAT optical recognition system for industrial applications 4—19107
viewer independent shape recognition 4—11094
vision automation with the ICOS 2000 image computer 4—13071
vision by computer, information theory anal. of sensor-array imaging systems 4—15431
vision system, Saab EVS 300, computer-controlled meas. and inspection, automated production appl. 4—17443
vision system architecture 4—12525
vision system for location of glass tubes on a mesh belt conveyor 4—16235
vision systems, for use with ASEA robots 4—16236
vision systems for automated production *(Russian)* 4—16297

computerised pattern recognition continued
vision systems for factory automation appl. 4—22166
vision systems for workstations, prospects 4—17442
visual process and knowledge, content, form and use 4—11109
visually driven tactile recognition and acquisition 4—5195
VLSI architectures for feature extraction and pattern classification 4—16905
vLSI arrays with limited I/O bandwidth for pattern analysis 4—12521
VLSI computer architecture for scene matching 4—21677
VLSI pattern matching chip, design using string processing architecture 4—8440
weather charts, knowledge-based picture understanding system 4—14245
weld visual inspection system, computerised image processing of X-ray photograph 4—16969
wood processing system, locating defects, optimum cutting 4—11964
workpiece recognition and inspection by a model-based scene analysis system 4—11890
X-ray powder diffractometry, computer aided search/match system 4—21167

computerised picture processing

IBM systems, X.25 networks support 4—4782
IBM users, network system design *(Japanese)* 4—16496
IBM/Apple communication, file transfer programs 4—17932
identification in computer networks 4—13052
IEEE 802.4 Token Bus standard and ANSI X3T9.5 Local Distributed Data Interface 4—17319
IEEE 802 project setting standards for local-area networks 4—17309
IEEE Computer Society Project 802 local area network standards 4—13031
image data communication system for medical information system *(Japanese)* 4—14215
Incotel's store-and-forward/message switching system, appl. 4—21912
Indian LAN and computer communications, R&D and economic aspects, review 4—21984
industrial electronics, computer's role in manufacturing 4—20774
information network of the future, model systems *(Japanese)* 4—12893
information technology, status, trends and implications 4—2619
Infoswitch Canadian network, digital and packet switching services provision 4—4783
infrastructure, development for system users *(Dutch)* 4—12878
INS model system, interface for communication processing services *(Japanese)* 4—14515
INS model system, signalling system and numbering system design *(Japanese)* 4—14513
INS model system framework *(Japanese)* 4—14511
INS model system services *(Japanese)* 4—14512
INS model system test plan *(Japanese)* 4—14516
INS model system user/network interface *(Japanese)* 4—14514
INS realization, technologies research and development *(Japanese)* 4—14510
inspection tool control, advanced data transmission design 4—1071
integrated digital communication network, packet transport system parameter calculation *(Russian)* 4—17290
integrated material flow with mobile data communication *(German)* 4—7734
integrated services digital network for New Zealand 4—21913
integrated systems approach 4—5793
integrated voice/data networks, performance requirements 4—21920
Intel 82586 VLSI local communication controller chips 4—13019
Intel NDS-II Network Development System, config., operation and features *(French)* 4—8809

data communication systems continued
interactive network design and analysis using the IBM personal computer 4—14548
interconnected ring communication systems with unique loop-free routing, capacity 4—2070
International Federation for Information Processing technical committees 4—3651
International Federation for Information Processing work 4—21907
introduction to data communications, book 4—2092
IPC 620 programmable controller system 4—4562
ISDN, Swedish digital network *(Swedish)* 4—21930
ISO model of open systems interconnection 4—17324
ISO reference model, higher levels *(French)* 4—2039
ISO-OSI reference model implementation 4—13053
ISO/NBS class 4 transport protocol for local area networks 4—13025
Italian Autostrada company data transmission network *(Italian)* 4—16416
ITT's systems for office communication 4—8696
ITT Communications and Information Services Inc 4—10246
KAYAK, French office automation system 4—2675
KBUS local network, programmable automatic systems appl. *(French)* 4—20987
LAN, physical level *(Russian)* 4—22136
LAN, sliding window link level flow control, performance analysis 4—13057
LAN optical networks and architecture, limitations *(French)* 4—17360
LAN/OCS, fibre-optic broadband system using PBX 4—5468
LANs, broadcast protocol performance 4—13063
LANs, efficient multiple access scheme, performance anal. 4—4778
LANs, emerging trends 4—12995
LANs, multicast algorithm analysis 4—13062
LANs and PBXs, report 4—21938
laser communications in information systems 4—2085
layered network protocols for packet voice and data integration 4—21921
legal aspects of data transfer *(Dutch)* 4—12877
library mechanisation, strategic planning aspects 4—18509
local area data and voice transmission integration, DCS-2 appl. 4—8084
Local Area Data Transport—a packet-switched network for exchange area services 4—5438
local area data transport network, development 4—12095
local area network, beyond bus and ring 4—13016
local area network, building-wide system evaluation 4—13004
local area network, centralised-bus system performance 4—13013
local area network, geographically distributed system 4—13005
local area network, management and control of CATV data network 4—2107
local area network based on centralised bus architecture 4—13012
local area network controller based on MIL-STD-1553, low cost 3 M bit/s 4—13018
local area network simulation methodology for factory floor networks 4—13026
local area network standardisation, progress report 4—2111
local area network user needs 4—13001
local area network using optical fibre cables 4—5484
local area networks, appls. 4—13002
local area networks, choosing right system 4—13003
local area networks, end-to-end cryptosystem 4—13028
local area networks, hardware selection, implementation 4—5463
local area networks, hybrid TDMA/CSMA accessing scheme, for variable traffic characteristics and operating delay metric minimisation 4—5487
local area networks, multilevel security 4—12910
local area networks, possibilities and consequences for users *(German)* 4—2061
local area networks, reliability 4—12909
local area networks, window-controlled multiaccess protocol 4—5486
local area networks for business microcomputers 4—12986
local area networks in a hospital setting 4—10005
local distribution networks, impact on regulation and competing industries 4—12913
local network performance 4—22002
local networking and internetworking in the V-system 4—13049
local networks, organisation, with high speed channels *(Russian)* 4—22134
long-haul computer communication networks, three heuristics for improving centralised routing 4—2122
M/M/1 queue, throughput time delay function 4—12969
MACS, mini-packet switched multi-network bridge 4—12908
Marconi U4100 Marshall dual-mode AFTN message switching system 4—4703
mathematical model of a control system for a data transmission network *(Russian)* 4—16503
MCI Communications, development and strategy 4—14823
medical data delivery, computer system integration 4—9607
merging voice and data communication 4—8812
message display system with a local data network *(Japanese)* 4—22032
meteorological data, automatic transmission of surface data, automatic transmission of surface data from remote stations via satellite 4—17434
methods for data communications 4—21985
micro to mainframe connection 4—21875
micro-mainframe links, review 4—8702
microcomputer appls. in telecommunications 4—17270
microcomputer communications software 4—17284
microcomputer telecommunications, software considerations 4—23528
Micronet 800 and Prestel, guide 4—22995
microprocessor system with unlimited data transmission in automatic mode *(Italian)* 4—3375
microprocessor-based cryptoprocessor 4—12562
Midnet communications network for Midland Bank 4—6071
Mil-Std-1553B, nonmilitary appls. 4—1974
Milton Keynes, information technology strategy for 21st century 4—22809
Minerva, international messaging service on Midas 4—9812
MIS in Laboratory Instruments enterprise, remote data transmission system *(Czech)* 4—2077
mobile digital datalink for field work applications 4—8828
mobile radio channel, analytical and numerical approach to problem, in FORTRAN 4—14545
movable slot TDM characteristics 4—22070
multi-media communications *(Japanese)* 4—12889
multi-station point-to-point protocol for duplicate data processing centres 4—8821
multimedia communications integration 4—2945
multiple access, window protocols for time-constrained communication 4—13055

data communication systems continued
multiple logical link protocols, design issues and complexity of implementation 4−5436
multiplexer selection, interactive communications 4−8770
multistage interconnection networks for multiprocessors, performance 4−21996
Net-One local area network, simple terminal concentrator service 4−2041
NET/PLUS, local network architecture for multi-vendor compatibility 4−13017
Netherlands national electricity generation optimisation computer and information transfer system *(Dutch)* 4−6447
network architecture, implementation techniques *(Japanese)* 4−12888
network architectures, introduction 4−5470
network management, technical control 4−7040
network performance measuring device, multiprocessor built around 8080A microprocessor 4−22132
network protocols, standardisation 4−21939
network services, current options from British Telecom 4−5509
networks, security of information, review 4−7064
No.1 Packet Switching System, efficiency and reliability 4−12869
No.2B ESS for suburban communities: adding data links 4−1165
noise immune codes, microcomputer decoding feasibility 4−14467
NONSTOP system for international message switching *(French)* 4−8841
Novanet: communications network for a control system 4−13058
off-line long-distance data transmission using the 1255 robotron [computer] *(German)* 4−8747
office and factory systems, conf., New York, USA (June 1983) 4−13000
office automation, data communications technology implementation, management support 4−6986
office automation, development *(Italian)* 4−22779
office automation, telecommunications costs, auditing 4−6985
office communications, technology and integral systems, administrative productivity *(German)* 4−2654
office integration via intelligent switching systems 4−14547
office systems, evolution 4−8693
office systems, networks and standards, Ethernet and XNS, LANs 4−17346
Omega-type message switching network for shared-memory MIMD parallel processing computer 4−8683
online handprint data entry for IBM 3270 systems 4−8692
Open Systems, modularity in design and standardisation 4−17332
open systems interconnection problems 4−5425
optical data transmission in computer systems 4−12871
optical fibre local loop network, time division multi-access, office automation system appl. *(Japanese)* 4−12985
optimal organization of data interchange in a computer system 4−17221
optimisation by Response Time Analysis systems *(German)* 4−5458
OSI, connections and connectionless data transmission 4−22012
OSI, open systems interconnection, standard session protocol 4−2116
OSI, user's programming interfaces 4−17330
OSI network layer, standard development 4−2110
OSI reference model, network layer progress 4−2117
OSI reference model standards 4−2108
OSI services and protocols of the Data Link Layer 4−22014
OSI session and transport layers, standards 4−2109
OSI virtual terminal services, access from COBOL application programs 4−17331
PABX, digital, services centre implementation using EDP 4−21021
PABX selection 4−8059
packet communication systems appl., performance anal. of preemptive priority queue 4−12933
packet commutation with various degrees of priority *(Russian)* 4−17294
packet radio, data transfer between computers by ham radio 4−17235
packet switched data link for aeronautical broadcast channels 4−8031
packet switched data networks, experiments and experiences 4−12832
packet switching from the user's viewpoint 4−5481
packet switching network management 4−7039

packet-switched data networks, private and public, interworking methods 4−17372
packet-switched multiprocessor bus system, custom NMOS LSI chip implementation 4−8840
packet-switching communications networks, adaptive control of routing 4−17222
parallel processing system for data communications control 4−12814
PBX, installation and wiring 4−17232
PBX based LANs, 3 Motorola UDLT devices 4−21940
PBX comparison with LAN rel. to local networking appls. in office automation 4−21956
PBXs and LANs, report 4−21938
PCM data transmission system, field bus data security with microcomputers *(German)* 4−5433
performance anal. and computer communications, report 4−5372
performance assessment of data transmission systems 4−5479
personal computer local networks and network hierarchies 4−13030
PET and KIM-1, machine-language programs for data transfer 4−13510
pET-to-PET communications 4−1965
Plessey Integrated Business Information System overview 4−17364
power supply system disturbances effect on data processing and communication equipment *(German)* 4−16788
prepainted steel surface inspection laser gauge computer system 4−7878
priority data transmission networks with packet commutation *(Russian)* 4−17292
priority regimes in power systems data networks *(Czech)* 4−20622
private communication networks−the backbone of office communications *(German)* 4−21872
private information network for data, text and voice communications 4−6041
process control, communication and management structure of the MODIAC local network *(Italian)* 4−12916
processor synchronization in distributed processing networks 4−1211
program-to-program communications, logical units 4−17318
protocol considerations, report 4−8752
protocol emulation and analysis tool 4−17366
protocols, reliable design, methodology verification 4−13061
protocols, SDL as formal description technique 4−12941
protocols of distributed systems, Client-server model 4−13024
protocols overview 4−21925
Proway, evolving standard for process control data highways 4−8826

data communication systems continued
public educational entities linking using Florida Information Resource Network (FIRN) 4−2746
public non-voice communications techniques 4−17240
public-key cryptosystem suitable for digital multisignatures, intraoffice communication appl. 4−13706
queueing network analyser, performance 4−14486
queueing networks in equilibrium, optimal flow control 4−8081
railway station management, Videopult system appl. 4−11995
Rank Xerox LAN, user experience 4−21042
recovery blocks for communicating systems 4−1841
regional-computer-network design, equipment for increased utilisation efficiency *(Russian)* 4−17355
remote control of digital data transmission line 4−8083
remote control systems with extended applications *(German)* 4−11575
remote data transmission linking EC *(Czech)* 4−12954
remote data transmission system, effectiveness analysis *(Czech)* 4−5428
reselling of long-distance services 4−6925
ring structured peer-to-peer communications network, multiplex interface control 4−8818
routing protocols, incorporation of multi-access links 4−13056
SAC DIN network, command and control data communication system, multilevel security architecture 4−5512
scientific research automation, Czechoslovak CSAV development *(Czech)* 4−12917
Scotland's interactive cable services, development 4−8076
SDLC and BSC, operational characts. 4−8769
security interface unit for secure communications between microcomputer systems 4−1978
selective-repeat automatic repeat request protocol, queueing anal. 4−22116
self-reconfiguring communications ring for distributed computer control schemes 4−8077
serial bus, used for multicomputer communication 4−22030
serial data transfer in process automation *(German)* 4−17233
serial interfacing standards 4−5444
ship-to-shore data communication for remote fleet management *(Italian)* 4−12012
Siemens System EDX-P ESS in packet-switching data networks 4−21038
signature analysis in data processing using computers *(German)* 4−11082
simulation of computer communication systems, book 4−10266
simulator for data communication systems, multiprocessor 4−19047
SITR data processing for Japan's Power Reactor and Nuclear Fuel Development Corp. *(Japanese)* 4−16495
small area networks for serial data transfer 4−21032
SNATCH project, SNA and TRANSDATA networks coupling 4−4774
social impact of changing telecommunication services 4−19651
software aspects of multi-level secure data communications *(German)* 4−5414
software for data communications, guide 4−5899
software metric for cost estimation and efficiency measurement in data processing system development 4−17652
SOPHO-NET Synergetic Open Philips Network, open network for computer communication *(Danish)* 4−12963
specialised host computer and user programs arrangement, mathematical model 4−17300
state-of-the-art in data communications 4−17241
STELLA European exp. on satellite interconnection of local area networks, architecture and protocols 4−13050
store-and-forward networks, delay-guaranteed service 4−8820
Swedish Telecommunications Administration has the network *(Swedish)* 4−21929
switched communication links, establishing SDLC primary/secondary relationship 4−2071
SYDNET packet network, node processors 4−17368
SYDNET packet switching data network, physical layer 4−17367
Sytek LocalNet network control center for broadband local area networks 4−13027
T-carriers, delivering data with big pipes 4−13042
tactical data distribution architecture 4−12900
Technical Control and Analysis Centre 4−6131
telecommunications facilities for remote computing 4−5513
telecommunications law and telecommunication networks improvement *(Japanese)* 4−12882

voltage-trimmed delay- and oscillator circuitry for data processing instrumentation *(German)* 4—17282

delay-differential systems
canonical realisation using input/output maps of bounded type *(Japanese)* 4—11475
identification of linear time varying differential systems amid modal disturbances 4—386
linear multistep methods for delay equation, stability 4—21229
linear neutral systems, hereditary realisations 4—20375
numerical methods, stability properties 4—21230
time delay systems, analysis via Walsh functions 4—15880

delay elements (circuits) *see delay circuits*

delay lines
distributed and lumped constant, multichannel models 4—1828
four-terminal network IC delay line operation and appls. *(German)* 4—5058

delays
see also delay circuits; distributed parameter systems
admissible controllability for linear retarded systems in Banach spaces 4—20377
anisochronic state theory of dynamic systems 4—336
binary sequential lag machines, optimal processes *(Russian)* 4—20376
commensurate time delays, stability test 4—11469
continuous system with dead time, method for making discrete time model *(Japanese)* 4—11414
continuously distributed time lags, polynomial representation 4—19815
criterion of closedness of attainable set 4—4273

delays continued
digital ccts., propagation delays, modelling by stochastic Petri nets 4—16721
discrete bilinear systems with time delay, MRACS design method *(Japanese)* 4—11412
discrete-time stochastic systems with switching parameters, detection and estimation 4—11408
finite spectrum assignment problem for systems with multiple commensurate delays in state variables 4—7494
haematopoesis models, periodic solns. and chaos in delay-differential eqns. 4—4174
infinite time linear quadratic controllers with continuous delays, Riccati equation solutions 4—4272
linear neutral delay-differential systems, hereditary realisations 4—20375
linear optimal control of systems with state and control variable delays 4—20373
linear retarded systems, optimal control 4—676
linear systems, optimal control via block pulse functions 4—7572
linear systems with delays in state and control, optimal control via Walsh functions 4—7567
linear systems with time delay in control action, stabilisability problem, spectral analysis appl. 4—4278
linear systems with time varying delay, Walsh series solution 4—7571
linear tracking systems with time delays, suboptimal control 4—11468
manual control systems, compensation mechanism for human operator time delay *(Japanese)* 4—7570
multidelay observer based compensation, simulation tests 4—11789
neural systems, chaotic dynamics 4—20229
nonlinear functional differential equations, estimation of delays and other parameters 4—15889
nonlinear systems with distributed delays in control, sufficient conditions for global relative controllability 4—15894
optimal control problems with time delays, decomposition method *(Ukrainian)* 4—15814
optimal digital regulator having controlling delay shorter than sampling period *(Japanese)* 4—15824
optimal linear stochastic systems with delays in controls, structural properties 4—7559
optimal time delay systems, sufficient conditions, appl. to functionally constrained control problems 4—675
parameter identification using discrete approximation methods 4—20381
passive systems, time delay estimation 4—7569
PI controller tuning of second order lag plus dead time processes subject to reference input *(Japanese)* 4—7504
pneumatic transmission lag compensator, development and appl. 4—752
population dynamics, harmless delays in a periodic ecosystem 4—20117
predator-prey systems, tradeoff between mutual interference and time lags 4—15588
process-model control for multivariable systems with multiple delays in inputs and outputs subject to unmeasurable disturbances 4—11380
regulator for linear systems with delay, robustness *(Japanese)* 4—20372
sequential IC, synchronous, timing fault location 4—21529
Smith regulator, feedback and filter properties 4—7566
spectral controllability, conditions based on finite Laplace transforms 4—15879
time delay systems, analysis via Walsh functions 4—15880
time-delay systems, decoupling control and arbitrary coefficient assignment 4—15876
time-lag control, dynamic programming method, unique optimisation problem *(Russian)* 4—7807
Z80 variable-time-delay routine, in machine code and assembly language 4—2486
zero-latency tracking of predictable targets by time delay systems 4—4276

delta modulation
adaptive ternary delta modulator for efficient image coding 4—15384
digital coding of speech *(Korean)* 4—2256
digital time-multiplex speech switching in telephone exchanges *(German)* 4—1168

demand meters *see maximum-demand indicators*

demodulation

- digital speed regulator using CMOS micrologic circuits *(Italian)* 4—11531
- digital trends in the design and application of DC drives 4—965
- drive motors and applications, control and regulation, conf. Hannover, Germany (April 1983) *(German)* 4—7682
- dynamic system with cubic nonlinearities, estimation and control 4—11483
- electric current and voltage regulators, analogue-digital and digital ccts. 4—20470
- electric drives, speed control system synthesis using digital control theory *(Japanese)* 4—11742
- energy engineering automation, problems and solutions *(German)* 4—19253
- error analysis, rel. to algorithm/hardware interaction 4—10310
- fast digital controllers of high order, realisation with signal processors *(German)* 4—7652
- fault-tolerant control system for engine applications 4—840
- flight control loading system, digital control, modular approach 4—12041
- fluorosilicate production, digital control by programmable sequential-logic controller *(Polish)* 4—1094
- Gamma C810, digital control algorithms design *(Hungarian)* 4—7648
- gas turbines, microprocessor-based digital control and monitoring systems 4—839
- guidance and control system, CAD conference Stuttgart, Germany (Sept. 1983) 4—8048
- heavy manipulator adaptive digital control 4—4622
- HV impulse generators, electromagnetic interference effects on microprocessor based digital control system *(French)* 4—16149
- HVDC bulk power transmission digital control by microprocessors 4—4464
- hybrid electric vehicle using elec. and gasoline engines, sequencing, state language 4—12056
- hydroelectric power stations, microcomputer applications to control, operation and supervision *(German)* 4—20614
- induction motor drive digital electric current control design *(Czech)* 4—20615
- induction motors, PWM-invertor-fed, digital speed control 4—923
- industrial process weighing automation for consistent performance, modular digital control systems 4—20711
- industrial processes, sequential predictive control 4—11788
- industrial robots and manipulators, automatic visual observation control, real-time digital systems 4—20750
- linguistic decision schemata for intelligent robots 4—21245
- Macsym 2 bench top data acquisition and control system 4—4315
- MACTUS 800 distributed instrumentation and control systems *(Japanese)* 4—15938
- metallurgical heat treating furnace, computer aided multivariable control 4—4427
- microprocessor-based controllers 4—4345
- microprocessor-based digital controllers 4—4531
- microprocessor-based high speed relay for overcurrent protection, algorithm *(Russian)* 4—20634
- motion control 4—15993
- motor drive, digital control, sampling period and quantisation *(Japanese)* 4—15994
- motor drive, microprocessor-based digital system for performance improvement, state observer and variable sampling 4—11680
- motor speed controller design, time delay issues 4—20598
- multirate digital control, development and applications 4—4246
- multivariable discrete time systems, design of digital two- and three term controllers 4—4249
- noise problems in digital control *(Japanese)* 4—15771
- noninvertible digital transfer functions arising from minimum phase analog process models 4—4201
- nonlinear control theory, algebraic derivation 4—4291
- nuclear fuel reprocessing plants centralised digital control *(French)* 4—11947
- nuclear reactor, digital controller appl. 4—11675
- numerical control of machine tools *(German)* 4—7899
- optimal digital control systems, design *(Japanese)* 4—15815
- optimal digital regulator having controlling delay shorter than sampling period *(Japanese)* 4—15824
- PCB drilling and routing machines, computer digitizing control system 4—1116
- PID controller with 8048 microprocessor *(Dutch)* 4—7637
- PID DASOR 600 system, sampling interval selection *(Czech)* 4—14552
- position control, Gould Model C211 microprocessor-based feedback controller 4—4304
- positional servo controller with programmable ramp movement *(German)* 4—20460
- power stations, thermal, instrumentation, control and automation, present practises and future trends 4—7788
- power systems, software package for load dispatching and digital load frequency control *(Dutch)* 4—16112
- precision pointing system, digital control system design 4—4718
- process industry, problems in appl. of digital automation systems 4—7861
- programming system for digital control *(Russian)* 4—7858
- PROVAN, proportional valve control input card for digital controls *(German)* 4—4383
- PWM invertor control using a multimode modulator *(French)* 4—20700
- reeling thin plastic film, digital computerised traction control of axially mounted motors *(French)* 4—16337
- reliability of small digital controllers, fault-tolerant techniques 4—11544
- reliable digital controller architecture for gas distribution regulators 4—811
- reluctance motors, closed loop microprocessor control system, strategy implementation study 4—16135
- RENDIS system for CAD of industrial control systems *(German)* 4—981
- robust digital set-point tracking controller design for linear multivariable plants 4—4430
- rolling iron bars, microprocessor based automatic adjustment system with digital control *(French)* 4—16223
- rotating field motors, microprocessor controlled test rig *(German)* 4—4460
- sampled data control systems *(Japanese)* 4—15854
- satellite, three-axes stabilized, yaw attitude error estimation by state observer *(Japanese)* 4—16471
- sawing machine efficiency assessment 4—7970
- self tuning control, predictor based 4—20349
- self-learning automata used in a digital control system *(Polish)* 4—7556
- selfoptimising controllers, time domain representation *(German)* 4—10295
- semiconductors for power applications, AIM conf., Liege, Belgium (October 1983) 4—20698

digital control continued
servomotors, importance of digital control *(French)* 4—11581
sewing machine, microprocessor appl. *(Chinese)* 4—8184
soft-start energy economy and control of induction motors 4—966
solar photovoltaic generator, utility grid connected, control technique 4—20650
Space Shuttle, digital autopilot for thrust vector control of orbital manoeuvring system 4—16449
Space Shuttle, minimum impulse limit cycle design to compensate for measurement uncertainties 4—16448
Space Shuttle, on-orbit and transition control, qualitative differences 4—20960
Space Shuttle Orbiter approach and landing analyses 4—16451
space stations, planning for long term control 4—4729
static converter for open-cast mines *(Russian)* 4—4479
steam turbine, governors, microprocessor based digital system, time domain design technique 4—11636
stellar spectrophotometer with photon counting, digital control panel 4—16597
stepper motor pedestal voltage, hybrid digital-analogue control 4—882
strain gauge batch doser, digital measuring-control system *(Russian)* 4—15961
system design, transient behaviour improvement *(Rumanian)* 4—11304
system design using utmost compensation type controller *(Japanese)* 4—15770
TELEPERM D microprocessor-based process control equipment, features and functions 4—16200
theory, developments, review *(Japanese)* 4—16009
thermal generating stations control in Mexico *(Spanish)* 4—7824
thermal power plant computerised control using M-118 microcomputers and SPOT-80 process interfaces *(Rumanian)* 4—20627
three-phase thyristor power convertors, digitally-controlled, sync., microprocessor control 4—11681
thyristor control using microcomputers *(German)* 4—867
thyristor regulating unit using wave packet method *(German)* 4—868
thyristor-controlled reactor used as static reactive power compensator, microprocessor control 4—4498
TI TMS 320 signal processor for digital control *(German)* 4—1251
total digital supervisory-control system for combined-cycle plants *(Japanese)* 4—20653
transistor-fed AC-servo drive with microprocessor control 4—4500
US Air Force Academy, navigation, guidance and control curriculum 4—4720
variable reluctance machine-convertor assembly, microprocessor based digital control system *(French)* 4—16151
VSCF double-fed induction machines controlling convertors digital control 4—956
wheelchair, omnidirectional, digital control 4—12220

digital differential analysers
curve generation of implicit functions by incremental computers 4—13331

digital discs *see video and audio discs*

digital filters
see also multidimensional digital filters; signal processing; wave digital filters
2-D IIR, decomposition theorem implemented, noise properties 4—16945
accumulator-error in digital transversal filters for echo-cancellers *(German)* 4—16932
adaptive digital filter, variable structure, for tachometer/torque meter signals processing 4—8508
adaptive filter, struct. and weighting adaptation, design and appl. 4—1676
arithmetically symmetrical digital band-pass (elimination) filter design by freq. transform. *(Japanese)* 4—1686
block implementation of two-dimensional digital filters 4—1681
CAD, TI-58 programmable calculator appl. *(Czech)* 4—23415
CAD of filters for digital signal processing, DISPRO package 4—3293
CAD using interactive optimisation techniques 4—12555
canonic-signed-digit code digital filters, design and optimization, PCM lowpass 4—1671
design and implementation via signal processor 4—5159
digital difference filtering 4—16935
digital edge enhancement technique for Thematic Mapper data 4—10056
digital image smoothing and the sigma filter 4—19066
distributed VLSI signal processors for digital filtering 4—21654
error-feedback digital filters with minimum limit cycle oscillations 4—16942
FIR and IIR, optimum multistage multirate filter design technique 4—12550
FIR digital filters, discrete coeff. type, design optimisation algorithm 4—5154
FIR digital filters, linear and min. phase, Chebyshev magnitude response, computer design program 4—8476
FIR filters, anal. by Darboux class D functions, order reduction *(Italian)* 4—1687
FIR filters, nonrecursive, design and implementation 4—12547
FIR filters, one-and two-dimens., decimation techniques for optical data transfer 4—21649
FIR filters, testing one-dimensional bilateral arrays of cells 4—21318
FIR multiband digital filters, min-max technique for CAD appl. 4—12549
FPC-1800 programmable DC motor controller facilitates flexible servo system design 4—11542
high-speed FIR digital filter using residue number system, hardware *(Japanese)* 4—16937
hyperstable adaptive recursive filter, elimination of error-smoothing filter 4—8478
identification of a best algorithm for digital distance protection of transmission lines 4—3973
IIR digital filters, design using differential-correction algorithm, minimax approx. 4—21644
IIR filter, design optimisation using sampling frequency decimation technique *(Czech)* 4—16934
image filters and architecture for implementation 4—12526
infinite impulse response lattice filter for adaptive line enhancement 4—12551
integrator-based digital filters *(Russian)* 4—21641
K 1520 compatible digital filter processor, U 830 basis, autonomous operation *(German)* 4—1684
Kalman, stochastic reduced evaluations for increasing accuracy *(Russian)* 4—21640
Kalman filter, computational properties, comparison with Lainiotis filters 4—21655

digital filters continued
Lainiotis filters, computational properties, comparison with Kalman filter 4—21655
large array VLSI filter 4—12560
linear-phase filter with multiple-notched property 4—14522
linear-phase FIR filters implemented with signal processor *(German)* 4—14417
low-pass, for data filtration and reduction *(Polish)* 4—5158
low-pass programmable FIR digital filter, 14-span, bit-sliced design 4—1683
Marmet's filter on-line realisation 4—23413
matched filters, design and construction using microprocessor 4—14466
median filter, single-chip, 1-D, design and implementation 4—21646
microprocessor appl., look-up tables 4—12548
microprocessor implementation, improved look-up table technique 4—1677
microprocessor selection for linear filtering 4—16936
microprocessors in signal processing, measurement and control, book 4—5370
microprogrammable digital image processing system 4—13075
minimum quantisation error, synthesis using floating-point arithmetic *(Japanese)* 4—12556
MOS VLSI implementation using CAD tool, DIGEST 4—23443
multirate digital signal processing book 4—1710
multivariable adaptive IIR filtering *(Japanese)* 4—8481
NEC μPD7720 digital processor—a laboratory-based case study 4—12584
nonrecursive type, Chebyshev weighting, design method using initialisation and search algorithm 4—5155
number-theoretic transforms for a fast convolution, VLSI design 4—21653
optimal, recursive, design using efficient iterative algorithm 4—23527
parallel architecture for digital filtering using Fermat number transforms 4—5152
parallel processing in microprocessor-based digital filters *(Russian)* 4—21639
quadrant fan filters, design procedure and realisation 4—16930
rate-of-change estimation for process parameters, tunable filters 4—7847
real time digital filtering in AF range using processor controlled by desktop computer 4—16981
real-time signal processing, use of microprocessors 4—5202
real-time signal processing and anal., fast processors, MOSIP modular system *(German)* 4—12581
recursive ε-nonlinear digital filter *(Japanese)* 4—12557
recursive noncausal filtering, sample-by-sample approach 4—21638
recursive nonlinear nth order type, overflow limit cycles study and asymptotic stability criteria 4—16940
residue arithmetic circuit, multi-valued ring counter design, signal processing/digital filter appl. *(Japanese)* 4—8471
residue number systems, digital signal processors design 4—15452
residue number systems in digital signal processing 4—21636
S-plane mapping theory extension 4—16938
SAR imagery enhancement, adaptive filtering use 4—10054
second-order, nonperiodic forced overflow oscills., theoretical study 4—5153
second-order recursive digital filter, design, stability, dynamic range and roundoff noise 4—12554
self-error feedback in recursive digital filters 4—1680
selfoptimising controllers, time domain representation *(German)* 4—10295
signal flow graph analysis *(Czech)* 4—1685
signal from noise extraction efficiency, digit finite number errors, statistical analysis 4—8479
signal processing IC, low power 4—12577
signal processing microcomputers 4—12452
single-chip video-speed digital filter 4—5151
smear-desmear transversal digital filter, design for improved data transmission quality *(Japanese)* 4—12559
special purpose computer real-time implementation 4—16941
SRF scanner-regression-filter, 2-D filtering with 1-D approach 4—474
state-space digital filters, finite wordlength implementation *(Japanese)* 4—16965
synthesis based on signal flow graphs, multiplier numbers minimisation *(Czech)* 4—8480
texture analysis using two-dimensional quadrature filters 4—12592
time-varying, stability considerations 4—15805
transversal, design and features *(German)* 4—16931
transversal resonator digital filters: fast and flexible online processors for biological signals 4—6382
variable speed drives, microprocessor based speed control, regulation and digital filtering *(French)* 4—16146
video signals, sampling rate changing by rational factors 4—15390
VLSI architecture for adaptive digital filtering utilising the number theoretic transform 4—8483

automatic test equipment software simulation techniques for quality improvement 4−5887
AutoMod and AutoGram systems for automation simulation 4−19105
bandwidth data compression using saturated Hadamard transforms 4−14492
bandwidth reduction for speech transmission, microprocessor based simulator 4−17562
barricade/shield testing, using heat flux sensors 4−7667
batch coil annealing furnace, heating and cooling computer model 4−10446
Bennett-type RF mass spectrometer, computer simulation of analytical characts. 4−18817
BETA3A user manual, oil reservoir simulation program 4−10456
BETAPLOT user's manual, black oil reservoir simulator, output processing 4−10454
biological sciences, problem solving skills enhancement 4−6397
bipolar power transistors large-signal behaviour in loaded oscillator circuit *(German)* 4−3319
bipolar RAM, single-event upset modelling 4−21724
black oil modelled reservoir simulation, report 4−23644
black oil reservoir simulation program user manual 4−10455
blood pump development for artificial heart with polarized EM drive system 4−3186
boat wake loading on long floating structures, computer modelling 4−19125
bogie drive, parallel connected induction motors fed by invertor, improvement of dynamic behaviour 4−7830
bottom-up parsing for a right context-sensitive language *(Japanese)* 4−1416
breathing systems for divers, computer simulation 4−10449
bubble lattice with long range dipole interaction, information bit propag., computer simulation 4−12637
buildings, residential and commercial buildings, MICROPAS computer simulation of energy performance 4−3421
built environment, computer modelling with reference to VISTA 4−19170
bulk materials handling system simulation using 3D colour graphics 4−19168
carrier domain magnetometer, with circular p-n-p-n structure, computer model 4−14382
CCITT secondary area network simulation by microcomputer, directory routing algorithm 4−22125
CCITT secondary area network simulation by microcomputer, packets routing adaptive algorithm 4−22126
cellular mobile radio systems, access protocols and hand-off strategies 4−23543
channel simulator 4−4816
chemical plants, steady-state simulation by dialogue with computer *(German)* 4−3130
chemistry teaching programs for microcomputers 4−6373
Chinese character perception, role of silhouettes *(Japanese)* 4−20059
Chinese character processing, optimising tool 4−2415
circuit breaker interruption, low voltage, arc effects, computer simulation 4−23317
circuit parameter extraction program for LSI artwork verification, CCAP 4−23471
circuits, digital simulation, program system based on SM 600 microprocessor family *(Bulgarian)* 4−3289
circular functions and the microcomputer 4−23169
clouds, aids research in forecasting rain, hail and snow 4−18887
CMOS and NMOS scaled inverters, computer simulation *(Japanese)* 4−21550
CMOS latch-up simulation, mapping of internal distribs. into equiv. lumped element network 4−18984
CMOS static RAM cell for data storage in ternary logic systems 4−21726
coastal area current, diffusion and sand drift analysis using minicomputers *(Japanese)* 4−23259
cold fluidised bed simulation 4−14176
combining supervisory information and computer model for power optimization 4−13868
complex chemical processing plant, digital modelling 4−14639
complex simulator, software structure *(Russian)* 4−18948
computer aided instruction in the nuclear training classroom 4−19373
computer architectures for simulation 4−1935
computer communication systems, simulation, book 4−10266
computer graphics, simulating reality 4−22404
computer graphics system for control and power systems research and teaching 4−19110
computer hardware description languages, simulation attributes 4−17876
computer program for Monte Carlo simulation of power system stability 4−23362
computer simulation and optimization of a series of hydro stations 4−6456
computer simulation conference, Vancouver, Canada (July 83) 4−9395
computer simulation leads to better distribution design 4−3230
computer simulation technology in water and sewage works 4−14673
computer simulations of multiple-effect FFE-VC systems for water desalination 4−6621
computer system for the simulation, identification, control and statistical analysis of technological processes *(Spanish)* 4−23550
computers and engineering, conference, Sydney, NSW, Australia (Aug.-Sept. 1983) 4−6440
contingency planning, case study 4−7056
controller implementation 4−11545
counterspun nutation damper operation under nonideal operating conditions 4−3452
coupled impurities diffusion under oxidising conditions 4−18982

digital simulation continued
coupled transmission lines, time domain anal. using wave digital filters *(Japanese)* 4−23419
crisis management information network, comparison of simulation and actual crisis 4−22903
CROGRO: an interactive forest growth simulator 4−18900
current frequency converter for chemical industry multimotor application *(Czech)* 4−23309
current impressed voltage source inverter fed induction motor control by field orientation 4−7769
dam site preparation sequence scheduling by microcomputer simulation 4−6606
data communication systems, multiprocessor for simulation 4−19047
daylighting model for building energy simulation, Fortran programs 4−10349
DC motor variable-speed drives model reference adaptive control 4−7837
DC-DC series resonant convertor, large-signal dynamic simulation 4−23333
deformation processes, finite element method *(German)* 4−23603
diesel-wind power supplied isolated networks, dynamics simulation 4−14348
diffusion of information model, demonstrating the characteristics of computer simulation 4−3969
digital switching network having bypasses *(Japanese)* 4−3388
discrete event simulation, vectorization 4−9940
discrete simulation problems, microcomputer appls. *(German)* 4−6579
DORMS, design tool for multiple microprocessor systems 4−17059
DORMS, tool for multiple microprocessor system design 4−22330
double squirrel-cage asynchronous motors with drives, dynamical behaviour *(German)* 4−14319
double-cage motor reswitching transients, digital computation 4−3229
double-loop computer network: hardware structure, delay performance and reliability 4−22101
drum boiler and natural gas pipeline network modelling package NAIAD 4−10125
DSAM digital simulation for anlogue systems using robotron A5601 4−3208
dynamic computer control of a robot leg 4−20873
dynamic simulation and parametric sensitivity studies on a central solar domestic hot water system 4−23638
EARLS-2 robot language system with colour graphic simulator 4−5845
educational software, simulation programs 4−19336
EHV lines, reactor-compensated, overvoltages due to open-phase occurrence 4−23329
electric drives, variable-speed, convertor-fed, interactions with supply network 4−6472
electromechanical model of separately excited DC generator under acceleration 4−10111
electron micrographs, high resolution, simulation by high-speed computation techniques 4−3141
elementary school teacher training with microcomputer-based simulation 4−23671
EM disc clutch step movement optimisation algorithms and programs *(German)* 4−18963
EM reception fields in diffusing environments, simulation and meas. *(German)* 4−14533
EMG signal simulation by microcomputer *(French)* 4−23254
emulator-analyser combination to shorten debugging process 4−21542
energy cost relationship to economic growth, ETA-MACRO computer model 4−4115
energy efficiencies of heat pumps in residential buildings 4−10336
environmental stochastic system with power meas., state estimation method appl. 4−343
equipment availability, simulation program for HP-41C calculator *(Croatian)* 4−3213
ESACAP circuit analysis program used on VAX-11/750 computer, graphical examples *(Danish)* 4−10154
ESMP, 130-block analogue computer, digital simulation 4−10313
event graphs for simulation modeling 4−17627
facility layout evaluation 4−18416
fast-moving objects location in TV-images in presence of motion blur 4−14502
fault detection in simulation model development, use of computer graphics 4−17965
fault simulator trainer for nuclear power plants *(German)* 4−16098
finite-element device simulation program 4−14434
flexible manufacturing system performance, job shop model and simulation *(Japanese)* 4−6574
flight line electronic warfare systems testing, using computer controlled system 4−21129
flight simulation program listing for CP/M, in Microsoft BASIC *(French)* 4−23625
FLOWTRAN simulation system 4−6616
focal plane arrays, performance anal. for point source tracking algorithm appls. 4−10237
food functional props. expt. educational simulation 4−6730
FORCASD, software package for simulation and CAD 4−14290
fossil and nuclear power plants transients, Modular Modelling System validation 4−6464
fossil plant training on servicable control board simulator 4−14334
full-motion-video simulation, General Instrument Agile graphics system 4−14784
Galileo dual-spin planetary spacecraft, inertial attitude determ. 4−16457
gas processing industry, complete process flowsheets, computerised optimisation 4−6619
gaze movements in scanning three horizontal targets, anal. *(Japanese)* 4−3171
geometric modelling in computer graphics and drawing standards 4−17799
glutamic acid production, optimal control of fermentor *(Japanese)* 4−16358
graphics and simulation on microcomputers 4−22405
Gunn device, planar, stationary domain form. and transformation *(Chinese)* 4−6478
gyrotrons, large-signal behaviour, self-consistent calc., computer simulation model 4−14440
hand surgery, reconstructive, computer aided planning, muscle, tendon and joint models 4−14222
handprinted Kanji and Roman characters simulation, distorted character generation *(Japanese)* 4−15382
heavy duty electromobile motor reliability mathematical model 4−10105

digital simulation continued
HF bipolar transistors, base widening effect simulation using a highly robust finite difference algorithm 4—23403
high frequency inverter using power MOSFET, characts. 4—3325
hospitals, bed and operating theatre usage, stochastic simulation 4—22915
human breast cancer, computer-aided assessment of receptor status 4—3163
human motion, computer simulation of 3-D motions in loading operations 4—23248
human reproduction, cohort simulation model, theory and appl. 4—6679
HV substations non-equipotential earthing systems calc. *(Polish)* 4—10112
HVAC equipment, state space analysis of dynamic closed loop environmental systems 4—19243
HVAC substation earthing grids, scale model and electrolytic tank tests 4—6469
HVDC convertor static var compensator control in AC/DC power system 4—911
HVDC transmission systems operating characts. improvement by static reactive power compensator 4—10123
hyperthermia treatments, EM and US, survey of computer simulations 4—23241
hysteresis in mechanical and magnetic components 4—3434
I^2L, scaled, CADDET-B two-dimens. device simulation program *(Japanese)* 4—21412
I^2L device circuit model with layout patterns *(Japanese)* 4—23424
I^2L structures, quasi-three-dimensional simulation with SOPHIA program system *(German)* 4—3307
IC CAD, testability of ccts. and evaluation of test programs, software tools 4—10153
IC simulation, development and evolution 4—19032
IC thermal modelling, heat description calc., computer simulation *(Hungarian)* 4—18997
ice/frost growth on cryogenic tanks prediction 4—3454
image and sensor array anal., target tracking by three-dimensional cellular logic 4—10238
image target tracking simulation, in disturbed environment 4—5190
induction motor co-ordinate control system, effects of parameter change 4—931
induction motor drives, thyristor phase-frequency controlled, digital models 4—4502
induction motor with rotor resist. discrete control, mathematical model and digital simulation *(Polish)* 4—11578
industrial appl., survey of practices 4—18915
industrial distillation column pilot plant, process identification, online computer techniques 4—20899
industrial perspective on microwave engineers: CAD in education 4—19469
industrial plants large-scale energy systems simulation models 4—18946
information system dynamics modelling 4—6234
instabilities, fluctuations and transitions, computer simulation 4—6357
instruction integration guidelines 4—3517
instrument performance improvements via control system analysis and design 4—4321
integrated simulation environment, simulation software of the 1990s 4—14843
interactive integer programming 4—11008
interactive power system research simulator development 4—23331
interference in communication channels, simulation using microprocessor systems 4—14537
invertor, parallel type, auxiliary thyristor bridge circuit, computer simulation, starting conditions analysis *(Rumanian)* 4—10110
invertor-fed synchronous motor theory and computer simulation 4—10118
job shop batch size modelling, preliminary review 4- .4680
job skills simulation system 4—3519
JT-60 nuclear fusion test facilities power supply system computer simulation 4—3261
keyboard functions, computer simulation 4—5395
Laguerre filter, orthogonal, linear network, digital simulation *(Russian)* 4—6512
large mixed protocol networks, simulation model 4—3395
laser weapon systems, hot spot tracking loops simulation 4—4719
latent heat thermal energy storage reservoir using spherical capsules *(Japanese)* 4—19255
latent heat thermal energy storage reservoirs, optimum design *(Japanese)* 4—10447
leaching in heaps and dumps simulation as aid to ore process evaluation 4—6659
library network simulation model 4—9757
light emitting right angle diodes, computer aided optimisation *(German)* 4—10166
load bearing characts. of dynamically driven pile, modelling 4—10362
load management, planning for residential systems, LOADSIM computer model, workshop review 4—14363
logic CAD, integrated system with schematic editor and interactive simulation 4—21548
logic circuit fault simulation system on dataflow machine *(Japanese)* 4—12492
logic control systems, simulation using interactive computer graphics 4—11549
logic simulation, extension of functional blocks to sequential ccts. *(Japanese)* 4—16731
logic simulation, IBM Los Gatos machine, hardware 4—23474
logic simulation, IBM Los Gatos machine, introduction 4—23473
logic simulation, IBM Los Gatos machine, software 4—23475
logic simulation, IBM Los Gatos machine, use 4—23476
logic simulation machine, parallel processing 4—12494
LSI CAD, experimentation with integrated process, device and circuit simulators *(Japanese)* 4—23427
LSI devices 4—14463
LV room thermostat performance, switch-feedback model computer simulation 4—7755
magnetic bubble domain dynamically ordered dual-conductor shiftregisters, design by mechanical simulation *(Japanese)* 4—12641
magnetic head zero-load slider bearing, nonlinear dynamic simulation 4—8528
magnetic recording with 3380 type sliders, surface finish considerations 4—8529
magnetic resonance spectra simulation, computer programs 4—23198
magnetic storage, output parameters for peripheral device systems, simulation *(Bulgarian)* 4—5629
maintenance training simulation system design 4—3222

digital simulation continued
MANAGE, interactive simulation model for evaluating effects of management structure on organisation performance 4—2818
manufacturing management learning through computer simulation 4—19311
marine systems, computer-optimized cooling 4—3469
mechanical design, finite-element anal. using computer graphics 4—14605
Megalogician, CAE workstation 4—10149
metabolic states, computer modelling for quantitative assessment 4—9996
methanol, mol. dynamics, far IR spectrosc., interferometric and computer simulation investig. 4—9930
method for modelling electric networks with set accuracy *(Russian)* 4—10101
3-methylcyclohexanone, rot.-translational coupling, computer simulation 4—6362
microcomputer simulations for biology classroom 4—6694
MICRODARE/LABNET software for instrumentation, control, and simulation 4—12209
microprocessor based meas. system error analysis and simulation 4—3321
mineral gas distribution networks, state observation and predictive control simulation *(German)* 4—20536
Minuteman II ICBM squadron, computer simulation of launch procedures 4—2863
mixed digital/analogue circuit, test-requirement-document data prep., large-scale simulator 4—21132
MLD: a language and data base for modeling 4—10085
model order reduction with performance verification by fast digital simulation 4—23565
modelling on microcomputers 4—22732
modern simulation techniques in the protective relaying field 4—23298
modified signals, computer simulation, Fourier transform appl. *(Russian)* 4—4081
modular approach to facilities modeling in an ATE environment 4—21147
Modular Modelling System code for fossil and nuclear power plant dynamic simulation 4—6463
Modys programming language appl. to economic analysis *(Czech)* 4—9192
molecular liquids, field-induced phenomena, computer simulation 4—3138
Monte Carlo simulation of power system stability 4—7803
MOS device description and simulation in Register Transfer languages 4—10182
MOSFET narrow-channel effects, TOPMOST three-dimens. simulation program *(Japanese)* 4—23420
motor drive system microprocessor-based speed control performance, sampling period and sensor performance 4—7838
motor vehicle crash dummy two-dimensional simulation program 4—10333
motor-speed control apparatus, computer simulator *(Japanese)* 4—3415
motorway lighting system maintenance model based on simulation 4—3466
MP/C performance evaluation 4—1662
multi-body systems, kinematics modelling tools 4—6601
multilevel pictures, CCITT compatible coding 4—14484
multilevel transportation network model for optimum routeing 4—7428
multiphase series-compensated transmission line transient performance and protection 4—10119
multiprocessor continuous system simulator *(Japanese)* 4—17144
multivariable paper plant simulation improvements through observer-based estimators 4—4668
Naval ship design, reliability analysis of total systems using component failure data 4—3471
NDT of multilayered structures, computer based acoustic model 4—18837
NELSIM, hierarchical VLSI design verification system 4—8411
Nelson River HVDC system digital simulation by Electromagnetic Transients program 4—3256
neocognition, neural network model of mechanism of visual pattern recognition 4—23242
networks, with two-state semiconductor elements, math. model and digital simulation, appl. in static convertors. 4—19018
neural circuit models, role in voluntary movement 4—15712
neuromuscular synapse simulation 4—23235
new criterion for synchronization of salient-pole synchronous motors 4—3268
non ferrous sand casting foundry, automated, microcomputer simulation 4—19254
non-Markovian systems 4—21993
nonlinear radio paths, simulation using KOMPLAN software package *(Russian)* 4—10251
nuclear facilities, SNAP/SOS package for simulating and analysing safeguard systems 4—3461
nuclear plant, advanced training simulator software maintenance and development facilities 4—18968
nuclear plant, computer based training aids 4—19241
nursing, simulation for teaching about intravenous flow rates 4—6390
nursing simulations design for teaching 4—6391
oil spill response training using computer simulation 4—19363
operation and support of aircraft, computer simulation as aid to decision making 4—3457
operator interrupts for programmable controllers 4—20890
optimization of diagnostic strategies using an epidemiologic patient simulator 4—10008
overhead line dynamic behaviour with high speed trains, computer aided prediction method 4—10355
packet switched data link for aeronautical broadcast channels 4—8031
PARA computer simulation code for plasma driven electromagnetic launchers 4—3147
parallel fault simulation using distributed processing 4—12493
PC, dynamic high speed functional tester, simulation pattern capturing system for design verification 4—23439
personal scientific computing environment: A new approach to power industry computer applications 4—14335
Petri net simulation using Modula-2 sets 4—6330
petroleum industry, benchmarking problems for simulation 4—6617
pH regulation systems design package 4—23623
photovoltaic solar power systems optimisation by controlled DC-DC convertor performance assessment 4—3264
PID tuning and closed loop simulation 4—11787
pin-grid array packages for dense VLSI logic, thermal studies 4—14444
PLA simulation in a RTL environment 4—21562
planning models, interactive techniques, microcomputer implementation 4—22372
plant control system, computer aided software design using data/control flow model 4—22370

digital simulation continued
PLANT Monte Carlo simulation program for anal. of reliability networks 4–3221
polymer solutions, Brownian dynamics simulation in steady shear flow 4–9926
population projection model based on generalised age dependent branching processes 4–6680
port planning and management, simulation models 4–4698
portable microcomputer-based airborne radar screen simulator for operator training *(French)* 4–3382
portable robot task analyser 4–4806
POS terminal simulation program in BASIC 4–2926
power distribution system, line current harmonic's compensation scheme *(French)* 4–10097
power plant availability determ., computer model 4–18931
power plant simulation software 4–10122
power station block steam boiler and programming implementation *(Czech)* 4–18936
power supply lines reflection and refraction simulation by computer *(German)* 4–14317
power system, modeling of fault-induced noise signals for computer relaying applications 4–3240
power system transients caused by short circuits and circuit breaker commutation, computer simulation *(Polish)* 4–6448
power systems, dispatching, dynamic training simulator 4–14360
prediction of the optimum coupling for PLC propagation on double circuit and high phase order transmission lines 4–23324
preperceptual processing of form, computer simulation 4–19057
process control, computerised, performance investigation 4–11790
Process Encylopedia—a software tool for modelling 4–22736
process models for error diagnosis using microcomputers *(German)* 4–4528
process operator training, model building and simulation 4–14799
production line, investigation of measures for increasing productivity *(German)* 4–3219
production system simulator with graphic modelling capability 4–7975
programmer productivity, simulation expt. *(Russian)* 4–7076
PROPS, interactive simulator for job shop manufacturing system evaluation 4–13853
PROSIM language for model construction and simulation *(Dutch)* 4–22496
pulmonary gas mixing during spontaneous breathing and at high-frequency ventilation 4–18855
pulp and paper industry, computer simulation, models, planning and design tool 4–23640
pulse-mode traffic-actuated signal control, operation anal. 4–20920
pupil size effect, systems model 4–4153
PWM invertor-fed induction motor drive system, closed loop control operation hybrid simulation 4–3259
PWM thyristor invertor, 3-phase, having capacitive load, circuit and by computer 4–3262
Q-GERT vs. GPSS for operations research 4–2446
quantitative and qualitative simulation in computer based training 4–3500
queue simulation program in Applesoft BASIC 4–19830
rail vehicle ride control, lateral active pneumatic suspensions 4–12002
railway electrification impact on utility systems 4–6465
rapidly responding exponential systems, computer simulation 4–11007
reactive power control, alternative 12-pulse single transformer arrangement for harmonics reduction 4–11708
real time control systems, three part analysis language appl. 4–14575
real-time control system design using digital simulation methods 4–20276
reliability calculations for capacitor banks 4–6451
ring-bus multiprocessor structure for signal processing 4–16983
robot, pick and place type, externally alterable program control sequence, computer simulation 4–12227
robot gripper positioning, work envelope simulation using computer graphic display 4–8191
robot selection, computer simulation, GRASP program, book contrib. 4–21197
rolling mill, plant maintenance *(Czech)* 4–19244
safety ground locations during HV line maintenance, computer study and model demonstration 4–23327
SAGE, for computerised attainment anal. 4–6618
satellite communications, digitally controlled transversal equaliser use 4–4787
satellite communications link, computer simulation 4–19079
satellite ground station TDMA Simulator for training technicians 4–6548
SAW device electronic circuits, computer simulation programs for analysis, layout geometry and impulse response *(German)* 4–19010
scientific discovery processes studied by computer simulation 4–14700
scientific simulation programs data structures 4–18765
sea dredgers motion computer simulation *(Dutch)* 4–19134
SEM, secondary electron collector, high efficiency, design 4–19029
semiconductor detectors, Monte Carlo program for X-ray detection up to 1.4 MeV 4–6371
semiconductor wafer topography simulation for IC fabrication, SAMPLE program 4–3362
semicustom-IC design, logic simulation 4–12498
ship autopilot, self tuning, computer simulation 4–8027
shopfloor skills and techniques, teaching by computer 4–23283
shovel-truck system in open pit mines, microcomputer simulation CAPS 4–10458
SIDIS microprocessor-based simulation system, appl. 4–15472
SIMBASIC, discrete simulation language for microcomputers 4–17860
Simonds' method in factor analysis by digital simulation models 4–23193
SIMSEM, simulated SEM for students 4–19364
simulator modules for information flow indication between regulating systems *(German)* 4–16199
slip-ring induction motor control by thyristor *(Russian)* 4–18949
small-geometry MOSFETs, hot carrier effects modelling *(Japanese)* 4–23421
SMEP minicomputer based simulator, microcomputers software development appl. *(Czech)* 4–2471
smoke gas recirculation effects on combustion process *(German)* 4–14182
soft-starter fed induction machine simulation 4–3257
software aids for simulation 4–18134
software for robotic work cell design and construction 4–4559
solar cell simulation using boundary element method 4–18983
solar domestic hot water system performance computing 4–19256
solar heating system design computer simulation models 4–10448

digital simulation continued
sound sources, moving, simulation using ABLE 40 computer *(German)* 4–3139
spatial magnetic core reactor processes digital modelling *(Russian)* 4–18961
specialty chemicals plant, simulation for optimization 4–4658
spherical crystal growth in space *(Japanese)* 4–3314
spreadsheet programs for simulation of dynamic processes 4–22733
SSB compatible transmission technique for LW/MW/SW broadcasting, computer simulation study *(German)* 4–19044
statistical information system designs 4–18789
steaming coal utilisation, quality parameter evaluation 4–6655
steel melting process, simulational control, correction process 4–14681
stock exchange trading model, effect of stabilisation policies 4–18340
strapdown inertial attitude reference systems alignment, Kalman filtering appl. 4–16475
submarine simulations for commodore 4–19422
submicron focused ion beam system optics, computer simulations 4–18815
suboptimal control study of boiler-turbine unit *(Chinese)* 4–20602
sulphuric acid plants, modelling and design, specialized programming language appl. *(Polish)* 4–23622
switched capacitor networks, SWITCAP analysis program for network simulation 4–23406
teaching the architectural design of VLSI systems 4–23500
technical devices, motion and control simulation problems *(German)* 4–14568
temperature control, using a small computer, stabilization and optimization *(German)* 4–10301
test-flow options analysis using personal computer 4–23559
THEMIS, an interactive logic simulator, speeds design process 4–16887
thyristor convertors, digital simulation *(Bulgarian)* 4–23315
time critical simulation 4–10067
time-coded emission tomography, 3-dimens. resolution investig. 4–18847
time-sequence controllers, microprocessor simulation *(German)* 4–4333
time-varying dynamic system simulation, parallel multiprocessor system 4–7564
timing recovery system for data transmission, dynamic props. *(Hungarian)* 4–10255
torque characteristic simulation for speed controlled industrial drives *(German)* 4–792
tracking radar, target centroid location estimation, amplitude-angle signature based algorithm 4–3453
training graphics simulation hardware 4–3521
training graphics simulations automated generation, editor 4–3520
TRAME network, congestion control method 4–22120
transistor invertors for induction motor drives, input current harmonics and power factor of operation 4–3263
transmission line simulator, distortionless, interactive, implementation on Intel 8086-based single-board microcomputer 4–14719
TRNSYS/GROCS simulation of the TECH House I ground-coupled series solar-assisted heat pump system 4–23611
truck travel time in open pit mines, microcomputer simulation program CALCUL 4–10457
underground pipelines using jumper cable, simulation of electric protection of balanced network *(Russian)* 4–3238
Unimation PUMA robot, interactive computer graphics simulator of VAL programming language 4–14585
universal asynchronous and synchronous VLSI simulator 4–23502
Universal Communications Controller design package 4–3394
US transducer, design, analysis and evaluation by computer model 4–10165
utility aspects of simulation languages *(Polish)* 4–23285
UV photolithography, reduction projection printing at 365 nm wavelength *(Japanese)* 4–23423
variable speed drives, microprocessor based speed control, regulation and digital filtering *(French)* 4–16146
vectorised multiple execution by Cyber 205 computer 4–22299
vehicle directional response in severe manoeuvres, steering and braking 4–6587

logic analyser, Tektronix type 1240, design, architecture and appls. *(German)* 4—21510
logic analyser display ccts., using CRO, HEX characters 4—1586
logic analyser features and functions *(Swedish)* 4—8383
logic analyser for microcomputers testing *(German)* 4—21509
logic analyser for microprocessor systems testing *(German)* 4—16875
logic analyser triggering 4—1570
logic analyser/generator combination, configs. and features *(German)* 4—5108
logic analysers, config., operation and debugging appl. 4—21508
logic analysers, design and operation 4—1603
logic analysers, glitch mode, latch mode and timing compare, noise margin anal. *(German)* 4—12497
logic analysers for computer cct. testing, introduction *(German)* 4—8117
logic analysers mounting three-pronged attack on hardware and software debugging 4—1253
logic analysis system for hybrid analysis *(German)* 4—5088
logic-timing analysers for enhanced design capabilities 4—1572
logical analysers, product review *(Italian)* 4—1573
man/machine interface with programmable controls *(German)* 4—12846
memory testing, memory system for graphics display unit 4—3304
message display system with a local data network *(Japanese)* 4—22032
microprocessor testing using logic analyser multiplexed disassembly modules, hardware and software debugging 4—21547
MIDAS 7000 logic analysis system for CAE workstations 4—8406
MIFASS Dynamic Situation Display for amphibious landings 4—5589
motor cars, electronic instrumentation *(German)* 4—14672
multichromatic visual-display terminals, visual accommodation and convergence 4—5578
NPC-764 logic analyser *(German)* 4—16882
optoelectronic indicators providing fast operational control *(Russian)* 4—15944
peripherals with graphics capabilities 4—13103
Plessey plasma displays terminal for British Army 4—22195
power plant TELEPERM M system OS254E operator-process communication and monitoring subsystem 4—16163
process control, operator interface developments 4—7607
programmable display pushbutton for multifunction man/machine interfaces 4—22201
pseudo cache between display generator and main memory 4—17487
raster scan system of Sigmex type 7000 appls. *(German)* 4—2168
raster-scan and direct view storage tube displays, visual fatigue and operator performance 4—5576
readability, man-machine system ergonomics 4—2200
refresh buffer, direct data extraction, microprocessor command 4—2182
Rewbichron II LCD display option 4—12838
sensors and switches for data input/output in industrial processing systems, overview 4—5397
Spacelab experiments, versatile ground data display system 4—3451
SR-128 speech recogniser, appl. 4—5643
stereo TV displays, effect of camera separation and head movement on visual performance 4—5579
symbol production, microprocessor-controlled *(German)* 4—13123
Tetronix 1240 fourth generation logic analyser *(German)* 4—1590
thermal power station, high-capacity generating units, automatic control, display systems 4—904
Traster stereo satellite terminal for measuring 3D objects, microprocessor-based system 4—2189
US soft tissue 3D display system, computerised equipment using overlaid intensity-graded sectional images *(Japanese)* 4—14220
VDU card, computer-CRT interface, circuit construction details 4—2171
VDU flicker suppression, interlace refresh method effectiveness exam. 4—13112
vector scan displays, use of HDD-1206 D/A convertor 4—13094
Vegas 6809 microcomputer construction project, display circuitry *(French)* 4—5160
video display card for Apple, Videx Ultraterm 4—17448
video display terminal, perceived flicker meas. method 4—2204
video display terminal-induced visual fatigue 4—5577
visual display code evaluation, extended practice expts. 4—5562
workstations with visual displays in process monitoring, ergonomics *(German)* 4—20450
display instruments *see display instrumentation*
display systems *see display instrumentation*
display tubes, television *see television picture tubes*
displays, radar *see radar displays*
disruptive voltage *see electric breakdown*
dissemination of information *see information dissemination*
distance measurement
automobile odometer design, using non-volatile EEPROM, microprocessor 4—23810
bearing and distance, Texas Instruments TI-55-II calculator appl. 4—6166
capacitive for disk air-bearing magnetic head slider 4—12622
IC layout CAD, accurate graphics measurement routine 4—3305
intensity guided range sensing recognition of three-dimensional objects 4—7289
magnetic disk drive, slider-to-disk spacing measuring instrument *(Chinese)* 4—5627
robot vision system, three-dimensional imaging, book contrib. 4—21671
ropeway monitoring systems cam controller and data indicator 4—16433
rotating tools automatic monitoring, in metal cutting manufacture *(German)* 4—7957
ultrasonic distance sensor from Microsonic *(German)* 4—15978

distillation
binary SRV system control, state-space approach 4—11956
column, adaptive control algorithm 4—11958
column, adaptive control strategies 4—11955
complex problems, graphic input method for natural language communication between computer and process engineer 4—19172
dual composition controller decoupling, steady state results 4—11953
ethanol from sugar beet in pilot plant with direct digital control 4—16394
extractive column, modelling and dynamics 4—11954
industrial distillation column pilot plant, process identification, online computer techniques 4—20899
optimal sequence synthesis using bounding strategy 4—3131
plant automatic using microcomputer systems *(German)* 4—20897
relative gain analysis for an industrial distillation column 4—11959
supervisory process control evaluation 4—11961
synthesis of distillation trains with heat integration by a combined fuzzy and graphical approach 4—20192
whisky production automated at Hiram Walker 4—20906

distortion, electric *see electric distortion*

distortion measurement, electric *see electric distortion measurement*

distributed control
500 MW coal fired power plant, distributed hierarchical control 4—7748
adaptive computer communications network designed with decentralized control 4—12092
alarm monitoring and reporting systems in a distributed control environment 4—4467
automation technology, development trends 4—7860
catalytic reformer appl. 4—11950
centralized water-supply management system for the Higashiura Branch Area *(Japanese)* 4—3437
CMOS microcomputer for distributed control 4—21432
combustible gases, digital monitoring 4—14635
computer control system for wastewater treatment plant 4—16026
computerised systems for distributed control 4—7608
configurable software for a distributed control system *(Italian)* 4—14551
CONIC system for supporting distributed computer control systems, software architecture 4—23548
control of continuous processes with microprocessors and programmable controllers 4—993
control system integration, the shape of things to come 4—7612
Controle Bailey MicroZ distributed monitoring and control system with simulator-corrector *(French)* 4—11535
data acquisition and control system 4—16530
data highway for database management 4—7606
data transfer, integrity in communication link 4—6575
DCS4000 distributed control system development philosophy and architecture 4—15927
decentralised cooperative control method 4—647
decentralised process automation systems, communication problems *(German)* 4—982
decentralised process systems, computer control 4—970
decentralized dynamic routing in data communication networks 4—21036
desalination plant control with microprocessor based digital technology 4—4387
distributed energy control system installation challenge, implementation philosophy and methods 4—20671
distributed industrial process 4—22482
distribution network control for water supply system, Hitachi system 4—16011
double-distributed control network: increasing reliability through field deployment of controllers 4—20734
electronics computing, conference, Cleveland, USA (Feb. 1984) 4—23488
ESS distributed-control switching system, central maintenance and administration unit 4—21024
factory automation computer systems, Mitsubishi Factory Land *(Japanese)* 4—16286
fuel, steam and power management in industrial plants 4—960
glass container manufacturing plant, distributed computer control and monitoring 4—16382
Gulf States Utilities Power System monitoring and control implementation 4—11697
hierarchical/distributed systems automatic control design, establishment and utilisation *(French)* 4—20660
hyperbolic problem with pointwise stress constraints 4—4277
industrial control, products and trends 4—978
industrial plant chiller control systems, optimisation methods appl. for energy saving 4—11660
industrial process control systems 4—20707
industrial processes appl. 4—11766
intelligent digital transmitter for analogue transducers 4—783
ITT 1240 Digital Exchange, design 4—8061
ITT 1240 distributed control digital exchange for international traffic appls. 4—4769
ITT 1240 system architecture 4—22056
KBUS local loop for connection of distributed programmable control *(French)* 4—20466
linear systems, distributed control 4—11447
local control system construction using BIS microcontroller series 145 *(Russian)* 4—4319
MACTUS 800 distributed instrumentation and control systems *(Japanese)* 4—15938
man-machine interface for coal-mining plant control 4—808
manufacturing processes, National Bureau of Standards, research into automation using Forth 4—10289
manufacturing systems control 4—16250
microcomputer-based programmable controller systems 4—20732
microprocessor boiler control systems Micro-Z—in nuclear power generation 4—16134
microprocessor communications network, design 4—1217
microprocessor self-testing for mine monitor systems 4—813
microprocessor-based process automation *(German)* 4—980
mine, automated mill control 4—815
MODIAC local network, communication and management structure *(Italian)* 4—12916
monitoring and control, optical networks appl. 4—4522
multi-microcomputer system as universal control equipment *(German)* 4—20436
MV substations small-capacity remote control systems evaluation *(French)* 4—7820

distributed control continued
national energy control center for the Republic of Mexico *(Korean)* 4—16136
New Micrex distributed process control system, configurable to user needs 4—15929
new synchronization scheme for microprocessor based real-time control systems 4—22653
numerical control, DNC functions *(German)* 4—4608
oil refinery changeover to microprocessor control 4—11945
optical fibre loop network system for distributed computer control 4—11777
packet-switched computer network, probabilistic routing algorithm 4—2123
paper industry, process control systems development, case histories 4—7988
pilot chemical plants, advanced distributed computer system 4—4659
pilot system of optical networks for distributed monitoring and control in industrial plants 4—20704
plant chiller distributed control optimisation methods 4—20286
plant wide automation concepts 4—7853
pressure sensors and transmitters for distributed control, developments 4—20488
process computer control, present and future developments *(Spanish)* 4—20427
process computers, communication channels reliability 4—17161
process control operator interface systems design requirements 4—16178
process control systems based on Foster-Perros model, performance 4—20727
programmable controllers, selection guide 4—15959
Proway, evolving standard for process control data highways 4—8826
real-time programming techniques for distributed control systems 4—15878
ROLAIDS, distributed ATE system 4—21117
selection, specification and installation 4—991
self-reconfiguring communications ring for distributed computer control schemes 4—8077
sensor information preprocessing system for manipulators based on distributed microcomputers 4—4632
serial bus for microcontrollers in distributed control systems 4—15933
shared-memory multimicrocomputer system design 4—21785
Space Station, attitude control and stability 4—4732
Space Station, decentralised control for evolutionary system growth and docking 4—4730
structurally fixed modes, graphical test, large scale systems appl. 4—11373
Supervisor to link μDCI process controllers 4—7634
thermal generating stations control in Mexico *(Spanish)* 4—7824
total digital supervisory-control system for combined-cycle plants *(Japanese)* 4—20653
ventilation, microprocessor-based fail-safe control system *(Russian)* 4—16080
Z8 microprocessors connected by telephone pair *(French)* 4—973

distributed feedback lasers
No entries

distributed parameter networks
3-D transmission-line matrix method, parallelepiped meshes and variable-size mesh *(French)* 4—23514
beamforming network, 16-port, broadband, CAD technique 4—10212
microstrip N-ports, discontinuities, broadband characterisation and computer-aided modelling, improved resonator method 4—10214
microwave microstrip circuits, MCCAD CAD system for design and optimisation 4—19026

distributed parameter systems
ϵ-coupled and singularly perturbed distributed-parameter systems, optimal control 4—20378
absolute stability problem, principle of absence of bounded modes 4—7565
authenticated algorithms for Byzantine agreement 4—11476
automotive engines, idle speed control 4—11649
boundary control problem with distributed parameters, Riccati equation solutions 4—20380
boundary control systems, robust controller 4—11466
boundary value problems, parabolic type, optimal control 4—678
compensator design using direct approach 4—15887
complex cascade systems, synthesis technique *(Bulgarian)* 4—15890
coordinated control with distributed observations 4—11477
detection/communication problems, recursive soln. 4—10907
diffusion type singularly perturbed systems with feedback control, asymptotic analysis 4—20261
Dirichlet boundary feedback parabolic equations, stabilisation and structural assignment 4—679
discrete time systems, optimal feedback control 4—15882
dynamic system, spectral representation of region of controllability 4—11324
elastic aerospace structures, sensor/actuator location principles 4—8049
engineering sciences and mechanics, conf., Tainan, Taiwan (Dec. 1981) 4—7703
enhanced modal control Riccati equation solutions 4—16474
first order solution of the optimal control problem for distributed parameter elastic system 4—7575
fluid amplifier, freq. response anal. using unsteady flow characts. 4—4386
full-order closed-loop asymptotic stability 4—7574
functional differential eqns. of retarded- and neutral-type, analytic solns. and piecewise continuous controls 4—19825
heat conduction, nonlinear optimal control 4—15822
hierarchical/distributed systems automatic control design, establishment and utilisation *(French)* 4—20660
hyperbolic problem with pointwise stress constraints 4—4277
identification of distributed-parameter vibration systems 4—408
identification of noisy distributed parameter systems using optimal stochastic approximation procedure 4—406
image motion analysis using concept of weak solutions to distributed parameter systems 4—4039
information theoretic analysis, practical approach 4—15885
investigation using variational methods 4—10980
large sparse nonlinear equation system solving 4—15877
linear diffusion systems, feedback stabilisation 4—677
linear hamiltonian systems, Riccati group invariants 4—7520
linear stochastic systems, parameter identification method *(Japanese)* 4—20379
linear systems, finite dimensional discrete time control 4—7573

distributed parameter systems continued
Lyapunov method appl. 4—11462
mobile control sources for implementation of distributed control functions 4—11461
modal control systems with distributed parameters, synthesis *(Russian)* 4—15883
multivalued fields and control systems with unbounded controls 4—15788
multivariable process control survey 4—642
Neumann boundary feedback of parabolic equations, stabilization in case of trace in feedback loop 4—15875
noisy systems, simple 'in structure' estimation algorithm for space-dependent parameters 4—11467
nonlinear input-output differential systems, finiteness criterion 4—690
nonlinear systems, optimal feedback control 4—15888
observer theory, impact on automation of distributed processes *(Spanish)* 4—373
optimal control forces, independent modal space control 4—11471
optimal control problem with initial state not a priori given 4—11358
optimal estimation and control, group theoretical approach 4—11351
optimal regulator problem, first order solution 4—15881
optimal steady state filtering, fast computational approach 4—4282
parameter estimation of nonlinear distributed systems under noisy observations 4—407
process control systems based on Foster-Perros model, performance 4—20727
pseudo-parabolic systems with stochastic coefficients, state estimation 4—11457
real time parameter identification using Lyapunov design method 4—4274
real time parameter identification using Lyapunov design method 4—4275
real-time programming techniques for distributed control systems 4—15878
realisation theory and infinite dimensional root locus 4—674
regulator synthesis in frequency domain 4—11473
retarded control problems *(Chinese)* 4—4271
rotating disk vibration, identification and control 4—4295
sponge iron production process simulation 4—20742
stability nonlinear control systems described by partial differential equation 4—15874
state control of systems with distributed parameters 4—4281
state identification in distribution dynamics systems 4—11470
state parameter estimation problem 4—3970
state space and frequency domain methods appl., book 4—4283
structural stability *(Russian)* 4—15884
systems with distributed parameters, control synthesis 4—4197
Tokamak and solar power satellite comparison 4—8052
vibroacoustic field reproduction via solution of constrained inverse linear problem 4—11472
Wiener functionals for an N-level uniformly distributed discrete random process 4—411

LTS-2010 test system, software package 4−14380
machine language program for flashing LED *(German)* 4−6486
metal-semiconductor-metal contact one-dimensional transport eqns., steady-state computer soln. 4−10139
MOS devices, modelling of technological processes 4−18972
MOSFET narrow-channel effects, TOPMOST three-dimens. simulation program *(Japanese)* 4−23420
MOSFET static power invertor, config. and design using computer programs, household photovoltaic appl. *(Spanish)* 4−14358
noise immune codes, microcomputer decoding feasibility 4−14467
operational amplifier response characteristics, compensation program 4−14420
PAL programming using personal computer *(Dutch)* 4−23378
PCB fault location, contact-point minimisation *(Russian)* 4−6504
PCB inspection using Teknispec automated vision system 4−3281
PCB test strategies, LSI/VLSI technology, cost and quality anal., model 4−23441
PCB test strategy costing *(French)* 4−6501
PCBs, design for shipment 4−23408
pre-test analog ATPG 4−10202
Racal Redac systems, computer-aided engineering for the electronics industry 4−3300
redundant memories, defect anal. system 4−14410
RF amplifier, design program for HP-41 calculator 4−10129
semiconductor barrier characts., computer anal. *(Korean)* 4−10138
semiconductor electrophysical properties meas. using computing complex AMTS 1533 *(Russian)* 4−16549
semiconductor testing, role of software in integrated development systems 4−14476
Smith chart anal. program for TRS-80, in BASIC 4−14451
software technique for smoothing processor's analogue output 4−3282
solid-state waveguide resonant array switches, limiting parameters 4−6515
STAMP, system testability and maintenance program 4−10198
system-level fault models 4−10207
telecommunications, KLIMA program for time-dependent temp. characts. computation of electronic components 4−14470
test generation algorithms 4−10210
test generation models for busses and tri-state drivers 4−10205
test-flow options analysis using personal computer 4−23559
testability analysis for analog and digital circuits 4−10200
testing, conference, Philadelphia, PA, USA (Oct. 1983) 4−23436

electronic engineering computing continued
transducers dynamic response modelling, MEDIEM package 4−3151
transistor parametric frequency divider for operation in low microwave range *(Polish)* 4−6511
twin-trace scan for VIC 20, BASIC program 4−6485
two-dimensional doping distributions near mask edges in semiconductors, num. simulation 4−3361
VLSI circuit, automatic inspection system *(Russian)* 4−19007
VLSI circuit simulation, model parameter extraction technique and optimisation, SUXES computer program implementation 4−14436
VLSI design, testability considerations 4−10206
VLSI semiconductor device, two-dimens. anal. using general-purpose interactive software 4−14433
VLSI test software development for LSI testing with Megatest MegaOne 4−10132
VLSI test system, MegaOne 4−8114
watch packages CAD *(French)* 4−10157
ZX81 A/D and D/A convertor interfaces, used for function generator, DVM *(German)* 4−1557
GaAs MESFET, finite-element program GRID/FET for transient phenomena modelling 4−14435
InP, single and double drift avalanche diodes, electric field and carrier current profiles anal. 4−14439
Si IC fabrication processes, one-dimens. computer simulation, migration and redistribution effects 4−3359

electronic equipment manufacture
automated soldering of high-density PCBs 4−1121
cable extrusion, automatic data logging for process anal. 4−5522
calculator production and sales plans 4−21764
chip resistor automatic mounting technology for PCB assembly 4−1124
computer aided engineering used from initial design to automated electronic equipment production 4−16269
computer-assisted quality management for electronics production *(German)* 4−23412
computer-integrated manufacturing techniques 4−4557
connector plugs, press-fit pins insertion, computer-controlled system *(German)* 4−1043
demand-push and demand-pull flexible manufacturing systems in Japan 4−11883
digital switching system manufacturers' prospects 4−8060
electronic device production, application of CAE, review *(German)* 4−6491
flexible assembly system, conveyers and tote box storage system 4−16045
industrial robot, used for the automatic insertion of electronic components 4−16265
integrated PCB production, using ATE networking 4−8136
Irish electronics factory, technical training and knowledge 4−19563
linear circuit printing, optimal hatching 4−23417
multilayer circuit boards, fully automatic presses with peripheral and transport system *(German)* 4−11842
PC, automated twisted-pair wire bonding, computer-controlled equipment, solder-reflow process 4−20911
PC technology, pocket calculator programming *(German)* 4−14428
PCB, automatic component insertion machines, PANASERT series, NC instruction tape preparation system *(Japanese)* 4−4591
PCB assembly, computer controlled insertion station 4−3409
PCB component insertion, automatic, taping and forming machines 4−1122
PCB component mounting, automatic assembly equipment conforming to high-density packaging 4−1120
PCB design, layout and production, CAD system and techniques *(German)* 4−6492
PCB design and layout, CAD technique for manufacturers *(German)* 4−6497
PCB drilling, specialized machine tool, CNC system 4−20912
PCB drilling and routing machines, computer digitizing control system 4−1116
PCB line uses large-scale computerization for increased circuit density, higher yields 4−20910
PCB manufacturing quality improved with use of ATE 4−8134
PCB test data management system, implementation using LAN in factory environment 4−22944
PCB Thema Telesis CAD/CAM system 4−1117
PCBs, computer-controlled manufacture, total factor automation concept *(German)* 4−1118
PCBs, high density, CAM 4−1113
production planning, aggregate and decomposition method, electronic tube production unit appl. 4−7408
production scheduling and material requirement planning with inventory management system 4−6151
PWB, computerised manufacture and testing, automated handling requirements 4−20832
PWB industry, impact and market aspects of CAD/CAM 4−6488
robot applications 4−20757
robotic assembly, workcell circuit board assembly 4−16238
robotics and machine vision appl. 4−1114
Solder-Wrap CAM concept, discrete wire wrapping for prototypes and small scale circuit production 4−4677
Stone International CAD/CAM system experience and conclusions 4−9656
tape recorders, robots for assembly production lines, merits and software techniques *(Japanese)* 4−4587
USA developments in electronics, up to 1986 *(Czech)* 4−19499
wire/cable manufacturing, coating equipment, microprocessor-based control systems 4−1010

electronic equipment testing
A/D convertor, transition noise meas., microprocesor based method 4−21111
adjustable thermostats for temp. testing in range −60°C to 200°C 4−15914
automatic testing, conference, Wiesbaden, Germany (March 1983) 4−12125
automatic washing machine microprocessor controlled ATE, high level test language design 4−12171
automotive electronics, testing trends 4−21095
British Telecom's system X, circuit testing provision 4−21072
cable tester, microprocessor control 4−1261
CAD for electronics industry, microcomputer-based ZZ 4−14452
CAMELOT, computer aided measure for logic testability, written in PASCAL 4−3318

electronic equipment testing continued
- card debug through isolation to a failing micro-instruction cycle 4—1262
- channel simulator 4—4816
- circuit boards and electronic components testing by automatic measuring and test system *(German)* 4—16554
- computer customer engineer/operator panel, circuit board testing using plug compatible fixtures 4—8638
- computer-aided quality management *(German)* 4—18998
- computer-aided testing, mechanical reliability for electronic products 4—14480
- conference, Philadelphia, PA, USA (Oct. 1983) 4—23436
- cost prediction model, Test Program Set project 4—23491
- CRT displays, video data wrap test 4—13124
- data convertor performance improvement, error correction technique 4—21504
- digital circuits, first-order systems, simple limit cycle phenomena, investigation and testing appl. 4—12553
- digital electronics troubleshooting from first principle, export systems appl. 4—14443
- digital in-circuit testing, hardware architecture 4—21591
- digital instrument testing, microprocessor-based system *(Russian)* 4—8139
- disc drive performance evaluation with margin analysis 4—13174
- disc drives and components, test procedures 4—1727
- flight line electronic warfare systems testing, using computer controlled system 4—21129
- functional unit design for optimised depth of monitoring and interunit connections 4—3312
- Hewlett-Packard 3065 PCB test family, using local computers, system controller 4—1281
- HVDC convertor station, SF_6 gas insulated, control and protection system *(Japanese)* 4—16140
- hybrid/digital circuit board ATE 4—1280
- integrated PCB production, using ATE networking 4—8136
- level sensitive scan design boards, manufacturing, test, and diagnosis 4—21522
- magnetic tape reel drive, assessment test technique 4—13179
- maintenance automation using personal computer 4—14281
- matrix printers, plug-in diagnostic indicator card 4—8923
- memory-emulation diagnostic technique appl. 4—22391
- microprocessor boards and systems, testing by memory emulation technique 4—21523
- multiple test processors in integrated system 4—1908
- noise meas., using minicomputer-based system 4—1283
- nonfunctional testing, design for test via standardised design and display techniques 4—8121
- OSI protocols testing and National Bureau of Standards 4—22025
- PC, dynamic high speed functional tester, simulation pattern capturing system for design verification 4—23439
- PCB, ATE and testing techniques for manufacturing appl. *(German)* 4—21082
- PCB, combined CAD/ATE system, config. and features 4—1259
- PCB, high-speed in-circuit testing 4—21590
- PCB, VLSI device-to-board test UKRAINE translator, design 4—21109
- PCB automatic testing, financial justification 4—19659
- PCB fault location, contact-point minimisation *(Russian)* 4—6504
- PCB function tester, ATE config., operation and programming aspects *(German)* 4—12157
- PCB manufacturing quality improved with use of ATE 4—8134
- PCB test data management system, implementation using LAN in factory environment 4—22944
- PCB test strategies, LSI/VLSI technology, cost and quality anal., model 4—23441
- PCB test strategy costing *(French)* 4—6501
- PCB testing, HP5005A signature anal. system *(Spanish)* 4—3273
- PCB testing using ATE 4—21124
- PCBs, automatic test equipment 4—4805
- PCBs, automatic test equipment 4—10152
- PCBs, automatic visual inspection 4—14447
- performance meas., computer-based signal processing system appl. 4—4077
- pin electronics architecture and its effect on throughput 4—23492
- power supply testing, using discrete modules 4—8137
- pushbutton switch tester based on computer system 4—21154
- PWB, computerised manufacture and testing, automated handling requirements 4—20832
- quality control, new possibilities for improvement *(French)* 4—10172
- radar test system using IEEE-796 bus, alternate master approach to system test 4—8146
- REMUS standard test system, adaptation for testing various electronic equipments *(German)* 4—12168
- RF component testing, use of automatic test equipment 4—4813
- Rohde & Schwarz Automatic RX/TX Tester SMAT appl. 4—4824
- S/N ratio automatic meas., using ISAAC/Apple system 4—21130
- space-borne and Earth station assemblies testing, microcomputer-assisted anal. *(German)* 4—10075
- system test, control interface testing appl. 4—21112
- testability design and rating system, advanced appl. 4—23495
- testing costs predictability, problem areas, design strategies and software support 4—12169
- user-configurable tester for mixed technology devices 4—21079
- weapons systems for Swiss Army, production and maintenance ATE, test program production *(German)* 4—12167
- Winchester disc drive assembly and testing by robots 4—4560

electronic funds transfer systems *see EFTS*

electronic mail
- ACIMAIL electronic mail service for interlibrary loans among Australian university libraries 4—9717
- Adems, administrative electronic message system, use by insurance company 4—13745
- AGORA message system architecture as defined by KAYAK project 4—2676

multivariable $L\infty$ sensitivity optimization and Hankel approximation 4—11402
multivariable PI controllers design using optimal control procedures 4—645
multivariable root loci, geometric conditions for generic structure 4—11375
multivariable self tuning regulators, state space design 4—15859
multivariable systems, stabilisability and Ljusternik-Snirel'mann category of real Grassmannians 4—11374
multivariable systems, state feedback decomposition via block-pole placement 4—4231
multivariable systems, two step decoupling algorithm 4—11379
multivariable three dimensional systems, state reconstruction in low sensitivity design 4—7568
multivariate systems, pole assignment problems *(Japanese)* 4—11385
Neumann boundary feedback of parabolic equations, stabilization in case of trace in feedback loop 4—15875
noiseless in communications channels, bandwidth expanding scheme in presence of unknown jamming noise 4—15440
nonlinear control systems, feedback decomposition 4—4284
nonlinear distributed parameter systems, optimal feedback control 4—15888
nonlinear feedback systems, limit cycle stability/instability, describing function analysis 4—4289
nonlinear feedback systems with discontinuous elements, self-excited oscillations 4—681
nonlinear sampled data control systems, sufficient conditions for chaos 4—7544
nonlinear sampled data systems with dynamical multiplicative perturbations, robustness 4—20978
nonlinear singularly perturbed system, two-time-scale feedback design 4—11490
nonlinear stochastic systems with nonquadratic criteria, optimal control 4—15893
nonlinear system, tracking control using sliding surfaces, appl. to robot manipulators 4—11484
nonlinear systems, feedback controller, computer aided design 4—7578
nonlinear systems, Hammerstein class identification, model parameter eval. with feedback in linear part *(Russian)* 4—7580
nonlinear systems, identification from steady state frequency response 4—687
nonlinear systems, linear compensator design for bounded input bounded output stability 4—11488
nonlinear systems, linear input-output responses synthesis 4—20383
nonminimum phase plants, exact model matching *(Japanese)* 4—634
nonstationary dynamic systems with coordinate-parametric feedback, control 4—20363
normal matrix approximations and their use in the assessment of stability in the presence of uncertainty 4—11345
operational amplifier response characteristics, compensation program 4—14420
optimal control problem for automatic transmission 4—15817
optimal digital control systems, design *(Japanese)* 4—15815
optimal digital regulator having controlling delay shorter than sampling period *(Japanese)* 4—15824
optimal linear multivariable stochastic discrete time systems design, direct polynomial approach 4—4252
optimal multivariable tracking systems, design technique 4—15871
perturbation suppression by decentralized output feedback *(German)* 4—15838
PID and I-PD control, transition to modern control *(Japanese)* 4—11383
pneumatic astable multivibrator with positive feedback system *(Japanese)* 4—11511
pole assignment problem by output feedback *(Japanese)* 4—15270
pole shifting, minimising the control variable *(German)* 4—4195
pole/variant zero placement, control law 4—11330
polynomial systems theory and multivariable feedback compensator design 4—338
position control, Gould Model C211 microprocessor-based feedback controller 4—4304
power system generators, linear and nonlinear optimal controllers design 4—7809
power systems, appl. to pole assignment by state feedback *(Japanese)* 4—11628
precompensator design for achieving decoupling condition in frequency domain 4—11317
process control systems appl. 4—4513
properness of feedback transfer matrices 4—11315
proportional-derivative output feedback dynamic compensator, pole assignment with output feedback 4—20263
pulse-controlled power supplies with feedback loop, stability study *(Czech)* 4—16154
PWM invertors with instantaneous feedback, control strategy analysis and verification by simulation 4—916
R/C helicopter, training simulator design using model following servo controller *(Japanese)* 4—1156
rational transfer function model for feedback system design 4—626
real time sputter deposition monitoring using glow discharge mass spectroscopy 4—12201
realistic feedback control of interconnected turbogenerators 4—15816
reduced order compensator design, appl. of similarity invariants of linear systems 4—4185
reduced-order control, optimal design of controllers, integrated approach 4—11357
regulator for linear systems with delay, robustness *(Japanese)* 4—20372
reluctance motors, closed loop microprocessor control system, strategy implementation study 4—16135
RF power amplifier, power stabiliser cct. 4—696
robot design, arm position sensing 4—21191
robot tactile sensing, book contrib. 4—21196
robotic manipulator, cartesian assembler, low level control scheme 4—8189
robustness assessment of stability of feedback design 4—15804

- decision quality as a function of search depth on game trees 4—3986
- design process, frames, metaphors, and games 4—5725

game theory continued
differential game, three-player, with integral constraints on controls 4—10897
differential game, two-person, with vector quality criterion, multiple-valued and optimal guaranteed estimates 4—10898
differential games, cooperative equilibria 4—10909
differential games, successive pursuit of three evaders 4—15152
differential games, three level incentive strategies 4—10893
discrete systems, group pursuit problem 4—7537
evolutionary game, recurrence of the unfit, differential-equation model 4—3900
extensive two person games, evolutionary stable strategy 4—15153
extremal control problem in game posing 4—11359
extremality and equilibrium, the case of weak equilibria 4—10885
extremality and equilibrium with respect to given functions and game theoretic models, case of strong equilibria 4—10886
final offer arbitration, equilibrium strategies 4—249
finite acyclic labelled digraph acyclic supertournaments enumeration *(German)* 4—10889
firing game with time lag 4—10895
general exchange economy 4—4121
Harsanyi's solution simplified, comparison with the NTU-value 4—4120
hierarchical differential games, optimal strategies 4—15168
imperfect noncooperative learning and multiclass classification, appl. of game theoretical pattern recognition 4—19854
infinite stochastic automata, behaviour in games 4—16705
informational properties of the Nash solution of LQG dynamic games 4—10903
Life game, VLSI implementation 4—18796
linear pursuit game with an unknown trap 4—19855
linear regression coefficients, estimation as antagonistic game *(Russian)* 4—7135
linear systems with uncertain dynamics, robust filtering and prediction, game theoretic approach 4—3935
low information Nash equilibria for oligopolistic markets 4—15609
management science and operations research, differential game models appl. 4—516
managerial decisions, choosing between Bayes methods and game theory 4—15562
mining under water hazard, multiobjective management by game theory 4—15589
mixed theory of information, charact. of inset entropies and appl. in gamble theory 4—20068
Nash equilibrium points and the Lefschetz fixed point theorem 4—3897
Nash strategies for discrete-time systems with slow and fast modes 4—11410
NFL games, profitability of wagering 4—19857
non-side payment games, selection of values 4—19847
nonlinear differential games of pursuit 4—10899
nonlinear multistep problems of control and observation 4—7518
operations research appl., conf., St. Gallen, Switzerland (Aug. 1982) 4—15529
operator's expected gain for a certain carnival game 4—15154
optimal control problem for automatic transmission 4—15817
optimal pursuit-evasion between two realistic aircraft 4—16441
optimization of diagnostic strategies using an epidemiologic patient simulator 4—10008
organizational game rules modelling with superposed automata nets 4—19860
pebble game, trees, min cut linear arrangement, algorithm 4—19920
pebble game applied to pyramid graphs 4—21369
probabilistic information's impact on decision behaviour and performance in an experimental game 4—19849
pursuit methods in the successive encounter problem 4—15151
qualitative differential games with two targets 4—10896
ranking in tournaments and group decisionmaking 4—15166
repeated games without a recursive structure-solution 4—3896
road vehicles, optimal automatic transmission 4—20923
robust Nash strategies for a class of nonlinear singularly perturbed problems 4—15766
signals with arbitrary distribution interference, optimum readout processing 4—19859
simple games, factorisation 4—7134
single stage Stackelberg games, derivation of necessary and sufficient conditions via inducible region concept 4—19853
singular linear quadratic differential games with bounds on control 4—3898
stochastic Stackelberg games 4—10904
subjective probability and the theory of games 4—15162
team cooperation, dynamic behaviour 4—10908
three person Baccarat 4—11174
totally bounded games 4—250
two processes using single resource, game theoretic view 4—7133
vector optimisation from coalition-game theoretical point of view 4—4093
von Neumann type growth model, solution concept 4—20131

families of systems and deformations 4−7182
graphics, Beta-splines, local control of bias and tension 4−2361
graphics component geometry, solid model input through orthographic views 4−2364
graphics on microcomputers, coordinate geometry for pixel specification 4−22426
interference between solids, detection algorithm, simplex method appl. *(Japanese)* 4−21240
location problems, constrained, in plane and on sphere 4−15546
nearest neighbours problem, fast algorithm solution 4−21244
packing problem for projective geometries over GF(3) with dimension greater than five 4−492
polygons, digital planimetry in APLSF, program description 4−6323
polyhedral intersection, fast detection 4−16652
scan-line hidden surface removal procedure for constructive solid geometry 4−2350
specialised hardware for geometric modelling and display primatives 4−2368
two-dimensional hidden-line algorithm for geometric problems 4−12297
VLSI array designs, unification with geometric transformations 4−8454

geophones *see seismometers*

geophysical equipment
see also atmospheric measuring apparatus; data loggers; geophysical prospecting; geophysical techniques; meteorological instruments; oceanographic equipment; seismometers
borehole water level and temp. monitoring with portable device 4−12202
electrical quadrupole, Z-parameters long-term stability meas., intrum. *(Russian)* 4−4802
microcomputer-controlled data logger for engineering geophysics 4−12203
photogrammetric rectification equipment, RECTIMAT-C system of VEB Carl Zeiss Jena 4−16520
portable digitized multi-channel data recording system for deep seismic sounding *(Chinese)* 4−5514
reflectance microscope, automated, for mapping of polished coal surfaces 4−16574
remote sensing photographic equipment system developed by VEB Carl Zeiss Jena 4−18883
remote sensing photographic system, high-performance, MSK-4 multispectral camera 4−18884
remote sensing photographic system FEAG digital photowrite and photoscan system 4−16521
small-scale geophysical surveying using microcomputer data gathering system 4−23262
stereoscopic digitising plotting system for cartography 4−14246
surveying instrument, portable, microprocessor-controlled, design and operation 4−16592
O_2 in hydrological water samples, electrochemical analysing instrument 4−820

geophysical prospecting
acoustic logging instrumentation, data digital recording and processing *(Russian)* 4−6406
computer programs for hand-held calculator 4−18891
deep seated base metal deposits, simulation as tool for exploration planning 4−528
electrical logging diagrams, algorithm for quality monitoring and correction *(Russian)* 4−10041
electrical quadrupole, Z-parameters long-term stability meas., intrum. *(Russian)* 4−4802
gravimetry and magnetics inverse problem, simultaneous soln. by nonlinear programming, Fortran 4−18879
mineral exploration computer graphics *(Hungarian)* 4−18882
minerals exploration, surface representation via computer mapping 4−18894
pattern recognition in oil and gas seismic exploration 4−14242
reflection seismology, one-dimensional inverse problem 4−10044
reservoirs computer aided recognition from borehole data and rock characts. *(Russian)* 4−10042
seismic reflection time information inversion 4−10049
seismology, downhole-crosshole reflection profiling method 4−23272
small-scale geophysical surveying using microcomputer data gathering system 4−23262
vertical electric logging, direct problem, soln. by optimum algorithm 4−23264
well log data processing, karotage interpreter subsystems (KISS) *(Hungarian)* 4−14244

geophysical techniques
see also atmospheric techniques; hydrological techniques; ionospheric techniques; oceanographic techniques
autoregressive spectrum analysis using Marple's algorithm 4−6402
coal, polished surfaces mapping by automated reflectance microscopy 4−16574
data analysis, kriging surface interpolation 4−12252
digital edge enhancement technique for Thematic Mapper data 4−10056

geophysical techniques continued
discrete multivariate anal. statistical techniques for Landsat classification accuracy assessment 4−18886
electrical logging diagrams, algorithm for quality monitoring and correction *(Russian)* 4−10041
geological sample, computer program for chemical anal. to study sample origin 4−3190
geometric correction process for Landsat 4 Thematic Mapper data 4−10051
gravimetry and magnetics inverse problem, simultaneous soln. by nonlinear programming, Fortran 4−18879
gravity models, harmonic coeffs. testing and comparison procedure 4−3188
image parametric/non-parametric local adaptive enhancement 4−10055
image processing, algorithms for data smoothing, edge and line detection and vectorization 4−10057
imaging processing for remotely sensed data 4−14239
Karhunen-Loeve expansion as feature ordering technique for limited training sample size 4−14243
Landsat MSS imagery, digital geometric distortion correction *(Chinese)* 4−10224
Meteosat-2 images, rectification method for satellite attitude/position var. 4−10053
microcomputer-controlled data logger for engineering geophysics 4−12203
multiple scene precision rectification of spaceborne imagery with very few ground control points 4−18885
astronomical navigation principles and BASIC program for position finding *(French)* 4−18896
normal-incidence geo-optimal deconvolution algorithm for seismology 4−10048
numerical integration of related Hankel transforms by quadrature and continued fraction expansion 4−18777
petrography, image analysis 4−10047
prospecting techniques, computer programs for hand-held calculator 4−18891
remote sensing, computer method for pattern recognition of aerial features 4−18878
remote sensing, relative elevation determ. from LANDSAT imagery 4−14247
remotely sensed data, segmentation using parallel region growing 4−10058
SAR image registration to Thematic Mapper imagery 4−10050
SAR imagery enhancement, adaptive filtering use 4−10054
seismic horizon extraction by heuristic methods 4−6411
seismic refl. profiling data, movie film computer graphics methods 4−23263
seismic travel time curves, determ. method 4−10049
seismic velocity estimates from three-dimens. data, algorithm 4−14240
SLKAAR digital data, algorithm for geometric and radiometric corrections 4−10052
small-scale geophysical surveying using microcomputer data gathering system 4−23262
spaceborne SAR data for mapping, image processing and algorithms 4−23265
surveying, implementation of Watson's algorithm for computing two-dimensional Delaunay triangulations 4−23270
synthetic aperture radar, data anal. for sea ice props. determ. 4−23266

geophysics

IDL, top down design, COMDEC algorithm, VLSI macro, examples 4—23482
IDL (Interactive Design Language) features and philosophy 4—22518
image processing and object recognition, LIVIA user-oriented language 4—13437
image processing architectures and languages 4—21676
image processing language, IPL 4—13438
image processing language development and structure 4—9210
image processing languages for automated microscopy 4—21175
industrial process control, real-time programming languages *(Spanish)* 4—22476
industrial process real time applications *(German)* 4—13411
industrial programmable controllers programming problems *(French)* 4—20468
information retrieval, common command language, status *(Hungarian)* 4—9829
information retrieval using a transportable natural language interface 4—2722

high level languages continued
instruction set architecture for Abstract Forth Machines 4—13388
integrity rules specification language, user-oriented, based on Update Protocol Model 4—22536
Intel iAPX-432 system as support for CHILL parallel constructs 4—16812
intermediate level language for VLSI design 4—9155
interpretation, design tradeoffs 4—22562
interpretive language for text processing 4—2445
IPL, image processing and programming environment 4—22532
kernel for high level real-time programming in process control appls. 4—22541
knowledge representation, logic role 4—5806
knowledge representation language, IS-A 4—5805
knowledge representation systems, completeness 4—5809
knowledge representation tools for the design, training, and use of information systems 4—5711
LAMBDA, form-based language for office automation 4—22531
Lambda computer system architecture for combining LISP engine, UNIX bases processor and virtual memory 4—5126
LEM, hardware support for interactive programming environments 4—5837
lexical analysis of keywords 4—17862
LISP and PROLOG machines in artificial intelligence 4—8625
LISP for robot/artificial intelligence system programming 4—2442
LM-Geo programming language for assembly robots 4—5842
LMAC system for robot cooperation, synchronisation tools 4—6581
logic as the fifth generation computer language 4—9193
logic programming—the base of the Japanese Fifth Generation Project *(Hungarian)* 4—17861
logic programming as a representation of knowledge 4—5808
logic programming in information retrieval, Prolog and Loglisp 4—9835
LOGLAN class prefixes *(Polish)* 4—13420
LOGLAN classes *(Polish)* 4—9178
Logo, features and facilities 4—17854
Logo, high-level programming language for primary education 4—17873
Logo, user friendly programming languages 4—5832
LOGO and turtle graphics 4—6691
Logo examples 4—5823
Logo graphics language usage in education 4—19347
LP/PROTRAN, a problem solving system for linear programming problems 4—14085
LSI/VLSI design, high level language components 4—5065
MACBASIC 3 enchancements, Booleans, 8-color plotter, 10 MB Winchester, buffers [MACSYM] 4—13390
MacPitts designs, test generation 4—23448
MACSYM 150/350 software, MACBASIC 3 and MP/M-86 4—13503
MAUS (2D), measurement evaluation language for measuring dimensions of complex piece-parts *(German)* 4—23289
metalanguages standards 80 to 83 4—17845
Micro MUMPS, simple database language for personal computers 4—9355
micro-PROLOG, programming in logic, book 4—22515
micro-Prolog for ZX Spectrum 4—22488
microcomputer language design 4—2453
microcomputer organ interface—improvisation by Forth 4—17858
microcomputer software, PASCAL as replacement for FORTRAN 4—9179
microcomputers, mainframe-level languages and programming tools 4—9201
microcomputers' use of ATARI PILOT for programming language learning, in BASIC 4—3710
microprocessor control chip, R65F11, with Forth in ROM 4—16811
microprocessor-based mixed event programmable controllers, development system, universal compiler, CCDL 4—22540
microprogramming languages 4—22528
MIRA-RC language, graphic application *(Italian)* 4—22475
MLD: a language and data base for modeling 4—10085
MMSFORTH version 2.2, vectored I/O single key macros 4—13220
MODULA, introduction to, comparison of PASCAL, MODULA, CHILL and Ada, book 4—2449
Modula debugging package 4—17964
Modula II compiler of Modula-2 language 4—5856
Modula-2, development from Pascal 4—9200
Modula-2, lexing and parsing 4—9188
Modula-2, Pascals' powerful heir 4—9181
Modula-2, systems programming language 4—2440
Modula-2 language, computer architecture 4—5128
Modula-2 solutions to PASCAL design flaws 4—22474
Modular, automatic translation to Ada 4—22493
multi-robot control using production system language 4—20866
multicomputers and image processing, workshop, Abingdon, England (May 1982) 4—10270
multiple-microprocessor programming techniques: MML, a new set of tools 4—17907
multirobot high level programming system for assembly 4—4633
MUMPS for hospital information systems *(Japanese)* 4—2845
MUMPS language evolution 4—2457
MUMPS microcomputer systems, implications 4—2458
natural language access to data bases? *(German)* 4—9806
natural language computing 4—5807
natural language for database access 4—14061
natural language for database queries: a laboratory study 4—9156
natural language grammars for an information system 4—3063
natural language interface determining the necessary characteristics 4—5716
natural language interface-two-way 4—5860
natural language man-machine interfaces 4—2320
natural language processing system, unidentified words shape descriptor 4—9173
natural language processor for data type specifications 4—17884
natural language query system design 4—22659
natural language question answering system 4—6278
natural-language processor prototypes, standard format for description 4—16786
natural-language question-answering programs, denotational semantics 4—16785
natural-language question-answering system, paraphrase component 4—18663
